

# MARVEL

# SHOULDER POSITIONER SYSTEM

**Operates using a 6000N linear actuator**

**Supports up to 500 kg load capacity**

**Adjustable movement range  
from 90° to 195°**

**Fully compatible with all  
operating table systems**

**Designed for versatility across all  
types of shoulder operations.**

**The Premium Shoulder Positioner System is engineered  
to deliver precision, stability, and comfort during all  
types of shoulder surgical procedures.**

**Built with uncompromising quality and medical-grade  
materials, it ensures seamless integration with operating  
tables while maintaining the highest standards of safety  
and performance.**

## Key Features:

316L Medical-Grade Stainless Steel

High-precision machining

Acrylic board surface

Leather-covered cushions

6000N linear actuator

500 kg load capacity

Adjustable movement range from 90° to 195°

Remote-controlled operation

Internal battery system

Compatible with 12V / 24V power adapters

Multi-directional adjustment: Up / Down / Left / Right / Front / Back

Includes two support modules: one for the head and one for the chin

Omni-Directional Arm Support

## Applications:

Suitable for all shoulder surgical procedures, including arthroscopy, open surgery, trauma repair, and advanced orthopedic operations.

## Technical Specifications:

- \* Material: 316L Stainless Steel
- \* Actuator Force: 6000N
- \* Load Capacity: Up to 500 kg
- \* Power: 12/24V Adapter + Internal Battery
- \* Movement Range: 90° to 195°
- \* Head & Chin Positioners: 6-direction adjustable
- \* Surface: Acrylic
- \* Cushions: Premium leather covering
- \* Arm Support: Omni-directional adjustable
- \* Compatibility: Universal (fits all operating tables)
