

## This Best Practice Statement hair extensions

At SBR we recognize the importance of properly washing and cleaning hair extensions before installing them. This Best Practice Statement outlines the recommended procedures for washing and cleaning hair extensions to ensure quality installation and to maintain their appearance and longevity.

This Best Practice Statement applies to all hair extensions provided by SBR and is intended to be followed by all customers and installers.

### Best Practices:

1. Gently wash the hair extensions with a mild shampoo: Use a gentle, sulfate-free shampoo to wash the hair extensions. Avoid using hot water, as it can damage the hair.
2. Use a conditioner: Apply a conditioner to the hair extensions to help restore moisture and shine.
3. Rinse thoroughly: Rinse the hair extensions thoroughly with cold water to remove any soap residue.
4. Gently towel-dry: Gently towel-dry the hair extensions to remove excess moisture.
5. Allow air-dry: Allow the hair extensions to air-dry completely before installing them.
6. Avoid using harsh chemicals or dyes: Avoid using harsh chemicals or dyes on your hair extensions, as they can damage the hair.
7. Avoid using excessive heat: Avoid using excessive heat on your hair extensions, as it can damage the hair.
8. Handle with care: Handle the hair extensions with care to avoid tangling or matting.

Following these best practices can help prevent damage to the hair extensions, ensure quality installation, and improve their longevity. Failure to follow these best practices can result in suboptimal installation, damage to the hair, and reduced longevity.

### Responsibilities:

\* Customers: Customers are responsible for following these best practices when washing and cleaning their hair extensions before installing them.

\* Installers: Installers are responsible for ensuring that the hair extensions are properly washed and cleaned before installing them.

### Consequences of Non-Compliance:

Failure to follow these best practices can result in suboptimal installation, damage to the hair, and reduced longevity..
