## AGRO COMMODITIES

# AGRO COMMODITIES

Agro commodities are raw or processed agricultural products like grains, pulses, seeds, and oil crops, exported globally for food, feed, and industrial uses, supporting trade and food security.

ORIGIN INDIA

## BASMATI & NON-BASMATI RICE

Basmati and Non-Basmati Rice from India are globally exported for their quality, aroma, and versatility—ideal for daily meals, international cuisines, and bulk food industry use.

ORIGIN INDIA

## WHEAT

Indian wheat is known for its high protein content and strong gluten strength, making it ideal for bread, pasta, and chapati. Widely exported for food processing and staple consumption globally.

ORIGIN INDIA

## MILLET (BAJRA)

Highly nutritious and drought-resistant grain, Bajra is exported for its health benefits and use in multigrain foods, porridge, and bakery products.

ORIGIN INDIA

## MAIZE (CORN)

Maize is a versatile crop exported for food, animal feed, and industrial use. Indian maize is valued for its high starch content and golden-yellow kernels.

ORIGIN INDIA

## SORGHUM (JOWAR)

A gluten-free grain rich in fiber and protein, Sorghum is used for flour, snacks, and livestock feed in export markets across Asia and Africa.

ORIGIN INDIA

## SESAME SEEDS (WHITE/NATURAL/HULLED)

Sesame seeds are rich in oil and protein, exported widely for tahini, bakery, oil production, and seasoning in natural or hulled forms.

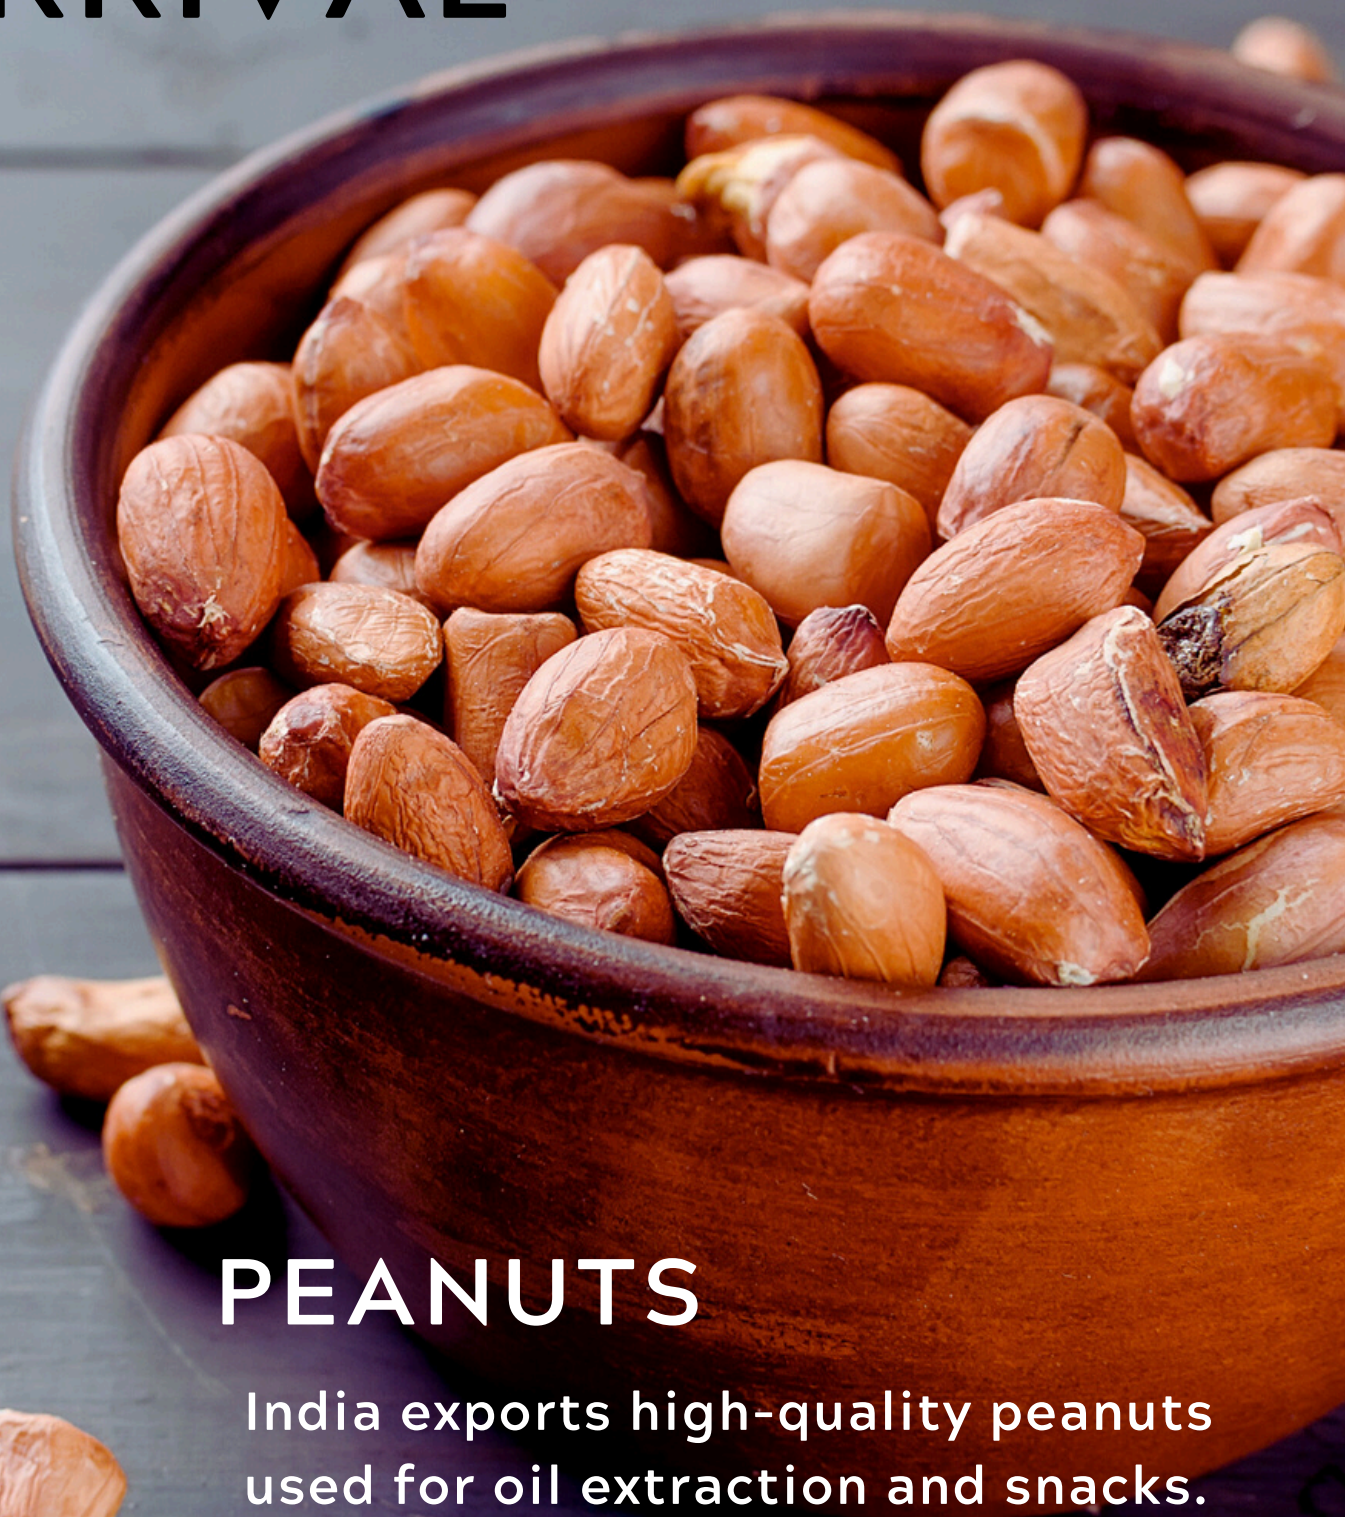

ORIGIN INDIA

## CHICKPEAS (KABULI & DESI)

Chickpeas are a top export legume, used in hummus, soups, and snacks. Indian Kabuli and Desi varieties meet global standards for quality.

# NEW ARRIVAL

## PEANUTS

India exports high-quality peanuts used for oil extraction and snacks. Available in raw, roasted, and blanched forms with strong global demand.

ORIGIN INDIA

## COTTONSEED

Used in oil extraction and animal feed, cottonseed from India is a valued agro-industrial export due to its high oil content and quality.

ORIGIN INDIA

## GROUNDNUTS (RAW & BLANCHED)

Groundnuts are exported for direct consumption and processing. Indian varieties are oil-rich, clean, and ideal for confectionery and snacks.

ORIGIN INDIA

## FENNEL SEEDS

Fennel seeds are sweet and aromatic, exported for culinary, digestive, and herbal uses. Popular in the food and pharma industries.

ORIGIN INDIA

## MUSTARD SEEDS

Used in pickles, oils, and seasoning, mustard seeds from India are exported for their pungent flavor and high oil content.

# BEST SELLER
