

DIEGO NUNO

(+1) 760-600-3717 - diegonuo@outlook.com - www.diegonuno.com

I am a **Data Analyst and Software Engineer** with experience driving innovation and delivering impactful solutions. Skilled in **analysis** and **observation**, providing actionable insights that enable businesses to make informed decisions. Known for building strong, **trustworthy relationships** and **adapting** quickly across industries. Currently transitioning into technology-focused roles to contribute to meaningful projects that shape the future.

SKILLS

Soft

- Attention to detail
- Process optimization
- Team collaboration (working under pressure with others)
- Customer-facing communication
- Problem Solving
- Data Analysis

Hard

- Coding Languages: Python, C#, SQL, Java, HTML, CSS, JavaScript, R.
- Tools/Technologies: Pandas, Linux, Data structures, Git, Jupyter, R Markdown.
- Tableau and Power BI
- API Integration & Automation
- Machine Learning Fundamentals
- Agile Methodologies (Scrum, XP)

EXPERIENCE

Case Study - Present | Cyclistic

January 2026

SQL, R, Tableau, Google Sheets, Google Docs, Notion

Cyclistic is a hypothetical company that wants to uncover the right marketing strategy to make regular customers into annual members (membership program) so the company can have more profits. My role was to answer: . How do annual members and casual riders use Cyclistic bikes differently? and provide insights that helps the marketing team to develop the strategy.

- Developed Data visualizations using Tableau
- Cleaning, preparing and analyzing data with SQL and Sheets.
- Ask and create insights so the marketing leader take the right decisions.

Portfolio website | [ig0nu.github.io](https://github.com/diegonuo)

Oct 2023 - December 2024

HTML, CSS, JAVASCRIPT

Developed and launched a personal portfolio website, taking full ownership of the coding, design, planning, and deployment processes.

- Implemented multiple versions, including one using THREE.JS to showcase 3D graphics and interactive elements.
- Demonstrated expertise in front-end and back-end development, ensuring a seamless user experience and optimized performance.
- Utilized strong project management skills to organize and prioritize tasks effectively, delivering the project on time.

- Developed a desktop application to streamline business operations, enhancing product management and sales processes.
- Utilized C# and SQL to create a robust and efficient system for inventory control and transaction management.
- Led the project team, overseeing the design, main programming, and overall project execution.
- Designed user-friendly interfaces and integrated features to improve user experience and system functionality.
- Demonstrated strong leadership and project management skills by coordinating efforts and ensuring timely delivery of the project.

STRENGTHS

Analytical and Problem-Solving skills

Demonstrated ability to address complex issues and explore various solutions, a highly sought-after competency in numerous professional fields.

Adaptability and Proactiveness

Committed to staying prepared and informed about new technologies, demonstrating flexibility and a proactive approach to challenges without rigid adherence to specific methodologies.

Innovation and Continuous Improvement

Persistent focus on enhancing efficiency and cost-effectiveness, underscoring a dedication to ongoing improvement and innovation.

LANGUAGES

- Languages: **Spanish** (Native), **English** (C1), **Japanese** (JLPT-N4 in December)

EDUCATION

Software Engineering - UNID - 2023- 2024

Technical Highschool Degree in coding - UNIVA - 2018 - 2021

College of the Desert- Computer Science- 2025 - 2025

CERTIFICATIONS

- **Google Data Analytics** Certificate
- Career Essentials in **Generative AI** by **Microsoft** and LinkedIn
- Python **Data Structures** and Algorithms
- Ethics in the Age of Generative AI
- Developing your emotional Intelligence
- +35 more certifications linked on my LinkedIn
