

GALKOMPS

SOLUTIONS BEYOND

INTRODUCTION

Established in 1993, as a small family business, driven by passion for leather products and recognized by the customers for uncompromised quality level and attention to details. The company has constantly grown and evolved, investing in new technologies, machinery and most important - skilled employees in both R&D and production department.

In 2021, we are proud to present **GALKOMPS** - highly specialized company segment for research and development, production and distribution of professional defense, law enforcement and security equipment.

Brand new **MPS** (Military/Police/Security) product line with more than 50 products includes combat/tactical platforms (vests, belts, backpacks) and components (pouches, carriers, holsters, bags) that are intended to be used separately or as a part of an integrated equipment system for soldiers, police officers, security officers or any similar duty activity.

Implementation of latest market trends in production technologies such as laser cutting, usage of special laminates or bonded fabric compositions, thermoforming technologies and production digitalization brings new products, new look and functionality, fresh energy, cost effectiveness and finally a well-established and reliable product portfolio of equipment with exquisite quality level and functionality.

Customers or end-users have an option to choose from our existing pre-developed line of products or decide to take a custom approach and to engage into an individual R&D session with our constructors and engineers in order to create fully custom product solutions for more precision and detailedness.

Our equipment is built to answer all your service calls and to work together with your needs in any environment. **Solutions beyond!**

M

Stands for Military. The company provides numerous personal equipment solutions for different military branches, from infantry to special forces and more. Protective vest, MOLLE platforms, load bearing solutions, belts systems and different carriers that can accommodate various items for all purposes.

P

Stands for Police. You can rely on our line of inner belts, duty belts, duty sets, holster and backpacks specially designed for law enforcement purposes. High quality materials and precision make will ensure adaptiveness, durability and versatility while protecting law and order.

S

Stands for security. Providing versatile solutions for security line of work. Weather it is a firearm carry solution or an equipment bearing item, choice of styles, sizes, colors and other options will get you covered for any need.

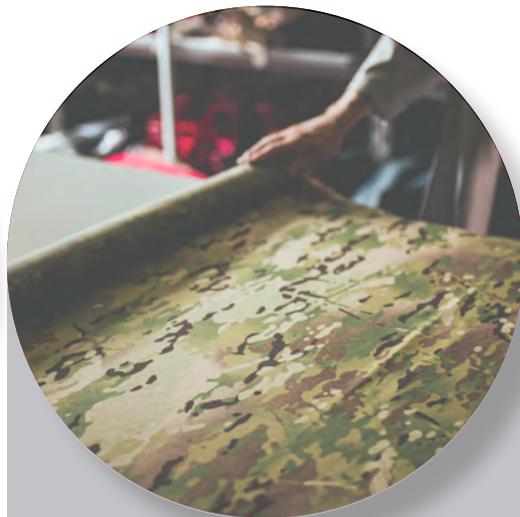

DEVELOPMENT

PRODUCTION

THE PROCESS

IDEA - everything starts with an idea, a vision of a product. Transfer the thoughts to paper, transfer the paper to pattern, then bring it to life by making a first prototype that will be polished and detailed to the last thread before it is good enough to be adopted as an in-line product.

SELECTION - careful selection of finest, highest quality fabrics and trims is essential. Choose the fabrics based on the needed properties, match the accessories to withstand intentional use, match the colors in the best possible way and it's ready to hit the production run.

GO DIGITAL - all patterns are digitalized and fine-tuned before the fabrics are processed ensuring high usage of fabric with minimum losses. Precision cutters and trimmers are here to output an accurate part that will later be used by our sewers to be built into the final product.

SEWING - once all is ready, we engage the production line. From simple straight sewing lines to different bar tack application, manual as well as the automatic machines are used to connect the dots and ensure durability and high product lifetime.

QA - quality assurance is an extremely important segment. Every piece that comes off the production line - every piece no matter how small or big - passes through the rigorous hands of our QA inspectors before being packed. Trimmed, cleaned, functionality checked, sewn right? If it meets all these criteria's, it's ready to roll.

PACKING & DELIVERY - getting the goods to the hands of the customer - that's what it's all about. Carefully sorted, packed and protected the equipment is finally ready to hit the road, air or sea to reach their new owner.

PRODUCT

SEGMENTS

VESTS

Plate carriers, tactical vests, light concealed mesh vest, load bearing options. Versatile solutions for any purpose with numerous additional options and accessories will create a modular equipment platform adjustable for any scenario in different environments.

VESTS

PLATE CARRIER (45-0305*)

**This item code is for front and back side ONLY*

45-0305 is lightweight, versatile and modular plate carrier that provides a perfect platform for additional build-up. Users have an option to choose between three different cummerbunds, three different back panels, pouches and holders. Front side of the carrier is covered in laser cut MOLLE slots with hook&loop platform that allows application of 5.56 holder flap.

Features:

- ◆ Body made of genuine Invista yarn Cordura® fabric
- ◆ Side parts lined with SPANDEX fabric for accommodating different width of ballistic plates
- ◆ Laser cut
- ◆ Front upper MOLLE hook&loop
- ◆ QR buckles on two cummerbund selections

Item is available in other colors

PLATE CARRIER 45-0305 | Add-ons

45-0305 Plate carrier set offers various add-ons such as back panels, pouches, holders and soft armour. **Each item is available in other color combinations.**

MULTI PURPOSE BACK PANEL 45-0166

- Designed for carrying on plate carriers
- Two multi-purpose compartments
- 3 compartments for 5.56 rifle magazine
- Laser-cut MOLLE on the sides for adding various pouches
- Extension for radio antenna
- Compartment for 3L bellows

Item is available in other colors

DANGLER POUCH 45-0366

- Made from durable Cordura® fabric
- Waterproof zipper with pull tabs
- Laser-cut MOLLE system
- Interior lined with foam padding and soft hook-and-loop (Velcro)
- Adjustable compartments for customized organization
- Shoulder straps for comfortable carrying
- G-hook for quick removal of the shoulder straps
- Light sticks compartment on top
- Tourniquet compartment

VESTS

Plate carrier (45-0143*)

**This item code is for front and back side ONLY – need to add cummerbund and front panel option*

Extremely versatile and modular contemporary plate carrier, the 0143 provides freedom of choice while building your vest platform. Users have an option to choose between three different cummerbunds that are interchangeable or can work stacked. Front hook&loop panels work in the same way – three options, stackable

Features:

- ◆ Body made of genuine Invista yarn Cordura® 500D fabric
- ◆ Side parts lined with SPANDEX fabric for accommodating different width of ballistic plates
- ◆ Laser cut parts made with UltraCOMP fabric or PALSTEX fabric (depending on color) *
- ◆ Front upper MOLLE/hook&loop triangle
- ◆ Top front admin zippered compartment
- ◆ QR buckles on two cummerbund selections

**UltraCOMP used in Multicam and Black, PALSTEX used for Ranger Green (RAL7013)*

VESTS

Features:

- ◆ Padded inner mesh side with air channels
- ◆ Front sewn-in female buckles for front panel attachment
- ◆ MIL-SPEC webbing and QR buckles on shoulder area
- ◆ Rear zip-off MOLLE lasered panel
- ◆ Extendable rear extraction handle
- ◆ Padded shoulder pads with anti-slip fabric

Front and back plate compartment can fit standard 25x30cm (9.8" x 11.8") shooters cut ballistic plate or SAPI/ESAPI Medium (24x32cm) ballistic plate with thickness up to 2.5cm (1").

Cummerbund options:

1. Fully elastic sides with three slots on each side for spare magazines/radios/etc. – full freedom of motion
2. QR Mesh/webbing VENT sides with MOLLE fields – for ultimate breathability
3. QR full MOLLE sides made from UltraCOMP, lined with mesh, featuring side pocket for ballistic inserts or accessories

Front panel options:

1. Hook&loop panel – attachment of hook&loop pouches, insignia...
2. Flat full MOLLE panel – attachment of any MOLLE compatible pouch/carrier/holster/etc.
3. Triple integrated spare magazine panel – kangaroo pouch that accommodates three rifle magazine pouches – closure with top retention elastic cord – front part with additional MOLLE area

BELTS

Building our way up from inner belts over to MicroMOLLE battle belts to more wider options such as duty belt or MOLLE sleeves, our belts can act as a stand-alone item or be used as a part of the tri-belt system for ultimate experience. Concealed options are covered with leather or BIOTHANE options.

BELTS

Our belt systems consists of three essential pieces allowing the user to configure his waist carry platform in the best possible way for the upcoming mission or tasks. All three pieces can be consolidated into one solid and versatile belt system, or be interchangeably used per segments. Inner belts connect to the MICRO Molle battle belt with hook&loop tape keeping the battle belt firmly in position during movement. MICRO Molle battle belt acts as a low-profile narrow carry platform for essential waist molle setup, while MOLLE sleeve provides room and positions for more extensive attachments.

Belt system consists of:

1. Inner belt with outer loop tape

2. MICRO Molle Battle belt

3. MOLLE sleeve

BELTS

Inner belt with outer loop tape

Inner belt features:

- ◆ Body made with 40mm MIL-SPEC nylon webbing
- ◆ Front square guide-thru ring
- ◆ Top puller made with UltraCOMP fabric
- ◆ Belt adjustment in two ways: overlapping over the square ring or attaching around user body
- ◆ Insignia position if overlapping adjustment is used
- ◆ Rear elastic movement absorption part reinforced with UltraCOMP fabric – moves with the user and absorbs hip motion without creating hotspots

MICRO Molle Battle belt

MICRO Molle Battle belt

- ◆ Body made with special 45mm Type 13 MIL-SPEC nylon webbing
- ◆ Outer laser-cut MOLLE fields, D-ring retention and size adjustment puller made with UltraCOMP fabric

BELTS SETS

Belts sets are composed from several products (pouches, carriers, holsters) that are usually worn together is specific lines of duty or work. Sets were constructed based on references from past orders or requirement from law-enforcement agencies or professionals in the industry who have used and thoroughly field tested all selected set components.

DUTY BELT SET – created for law enforcement uniform everyday use. Provides solid platform for securely carrying handgun, handcuffs, OC spray, writing notebook, single pistol magazine and police rubber baton. All components are mounted with injection molded rubberized belt loops. Connection between inner and outer belt with hook & loop tape and belt keepers secures the belts firmly in place.

Duty belt set consists of:

- ◆ Inner belt 950-0013 – 40mm wide
- ◆ Duty belt 45-0095 – 50mm wide
- ◆ Level 3 retention holster 950-0014
- ◆ Handcuffs/notebook pouch 45-0096
- ◆ OC Mk-3 spray pouch 45-0007
- ◆ Single pistol mag pouch 950-0015
- ◆ Flashlight tunnel carrier 45-0086
- ◆ Baton carrier 45-0011

Duty belt set features:

- ◆ Invista Cordura® 1000D fabric
- ◆ Inner belt lined w. 2mm foam
- ◆ Duty belt lined w. 6mm foam
- ◆ All-around reinforcement
- ◆ Front duty belt 3-point security buckle
- ◆ Handcuff pouch with rear notepad slot
- ◆ All pouches closure with press buttons
- ◆ Pistol magazine thermoformed pouch
- ◆ Holster with two external retentions
- ◆ Baton carrier made with rubberized loop and plastic ring 30mm inner diameter
- ◆ Delivered with two (2) belt square rings and four (4) belt keepers with press buttons
- ◆ Available in six (6) sizes (X-Small, Small, Medium, Large, X-Large, XX-Large)

Enhanced version of the duty belt set features:

- ◆ Duty belt with heavy-duty magnetic buckle 45-0241-4907
- ◆ Kydex flash light carrier 45-0240-151
- ◆ Cordura/Kydex handcuff pouch 45-0239-4907-151
- ◆ Cordura/Kydex Pistol magazine pouch 45-0192-151

- ◆ You can find more information on each carrier inside their belonging category within this catalogue

BELTS SETS

CORDURA/LEATHER BELT SET – crossover between a full-blooded duty LE set and concealed belt set. Allows usage of pouches both on duty line of work or as a concealed option. Leather surface provides more formal look and the set is mostly used for police officers which are protecting facilities or providing security to other objects.

Cordura/Leather belt set consists of:

- ◆ Inner belt – 40mm wide
- ◆ Duty belt – 50mm wide
- ◆ Quick draw leather holster
- ◆ Handcuffs pouch with internal divider
- ◆ Extendable baton carrier
- ◆ Leather single pistol mag pouch
- ◆ Flashlight tunnel carrier

Item codes:

- Duty belt: 45-0028
- Inner belt: 45-0029
- Leather Holster: 44-0364
- Handcuffs pouch: 45-0025
- Leather pistol magazine pouch: 45-0033
- Extendable baton carrier: 45-0026
- Flashlight tunnel: 45-0027

Duty belt set features:

- ◆ Body of both belts made from genuine Invista yarn Cordura® 1000D fabric
- ◆ Inner belt lined with 2mm foam
- ◆ Duty belt lined with 6mm foam
- ◆ All-around edging tape reinforcement
- ◆ Front duty belt 3-point security buckle
- ◆ Handcuff made from leather with front Cordura insert
- ◆ Leather pistol magazine pouch with screw for adjusting retention strength and draw force
- ◆ Delivered with two (2) belt square rings and four (4) belt keepers with press buttons
- ◆ Available in six (6) sizes (X-Small, Small, Medium, Large, X-Large, XX-Large)

BELTS SETS

LEATHER BELT SET – mostly used as a concealed carry option, either for private individuals or for LE departments that are engaged into CPU or VIP protection purposes. Leather used is genuine cow hide naturally tanned material of finest quality. Different thickness of leather is used for different parts of this set.

Leather belt set consists of:

- ◆ Leather belt – 35mm wide
- ◆ Quick draw leather holster
- ◆ Handcuffs pouch
- ◆ Leather single pistol mag pouch

Item codes:

Leather belt – 44-0355

Quick draw leather holster- 44-0367

Handcuffs pouch- 44-0353

Leather single pistol mag pouch- 44-0354

Leather belt set features:

- ◆ Leather belt made with 2 layers of naturally tanned leather with overall thickness over 4.5mm
- ◆ Brass front buckle – nickel coated with strong buckle pin
- ◆ Quick draw leather thermoformed holster sewn with waxed thread
- ◆ Tension screw allows adjustment of retention and draw force
- ◆ Leather pistol magazine pouch with screw for adjusting retention strength and draw force
- ◆ Available in six (6) sizes (X-Small, Small, Medium, Large, X-Large, XX-Large)

BELTS SETS

CONCEALED CARRY BELT SET – made with super-resistant coated webbing. Looks and feels like leather with much higher scratch resistance, folding resistance and general life time of the products. Using hot stamps, it is possible to make detailed markings or logos on pouches or carriers. Compared to leather, this belt set is lighter, slicker in design, more adaptive to different sizes of carried items and much more wear-tear resistant. All pouches and carriers from this set can also be mounted on any molle surface due to rear pouch attachment design with hook&loop straps.

Concealed carry belt set consists of:

- ◆ Coated webbing belt – 38mm wide
- ◆ Kydex holster with 2 belt loops
- ◆ Single pistol magazine pouch
- ◆ Handcuffs pouch
- ◆ OC MK-3 spray pouch
- ◆ Flashlight pouch
- ◆ Badge carrier
- ◆ Neck ID carrier

Item codes:

- Coated webbing belt: 45-0132
- Kydex holster with 2 belt loops: 44-KY001
- Single pistol magazine pouch: 45-0133
- Handcuffs pouch: 45-0137
- OC MK-3 spray pouch: 45-0134
- Flashlight pouch: 45-0135
- Badge carrier: 45-0138
- Neck ID carrier: 45-0173

Concealed carry belt set features:

- ◆ Belt material with 2 fullers for real leather appearance
- ◆ Front strong metal buckle
- ◆ Two belt keepers
- ◆ Magazine pouch made with 40mm coated webbing and side elastics for accommodating different caliber magazines
- ◆ OC spray pouch and flashlight pouch made with 40mm coated webbing and side elastics
- ◆ Handcuffs pouch made with combination of Cordura 1000D and coated webbing, with key storage under the main flap
- ◆ Badge carrier made with combination of Cordura 1000D and coated webbing, closure with one-way press buttons
- ◆ Neck ID carrier using ball chain for attachment, made with UltraCOMP fabric

HOLSTERS

Concealed leather type holsters, OWB/IWB Kydex thermoformed solutions, OWB duty level 3 duty options, with or without a tactical light – you name it, we make it! All holsters are available for several different firearms models and can be accompanied by various spare magazine pouches.

HOLSTERS

Holsters are divided into three main categories based on the material of make:

- ◆ Kydex thermoformed holsters
- ◆ Leather holsters
- ◆ Cordura/Kydex hybrid duty holsters

All three holster types are available for various handgun models, so it is essential to determine the handgun manufacturer, exact model and caliber of the weapon to ensure the holster will be a perfect fit.

KYDEX THERMOFORMED

options are slick in design, extremely lightweight and durable with large selection of different attachments like high ride belt loop, mid ride loops or tactical drop leg panels. These holsters are highly resistant to abrasion and cracking in low temperatures. Kydex holsters come out on top when it comes to retention and reholstering as they always keep the shape. Kydex holster can be made in Level 1 thru Level 3 security retention.

LEATHER HOLSTERS

are most usually selected for concealed line of work and for private individuals. Leather is thermoformed around the handgun providing a snug fit with possibility to adjust retention strength with a built-in screw. These holsters are slightly angled backward for better draw position while crouching. Attachment of the leather holster to the belt is done thru two leather loops on the back side of the holster. Most usual retention level for leather holsters is Level 1.

CORDURA/KYDEX HYBRID

solutions are one of the best options for law enforcement duty work. Kydex provides strength and durability thru out the holster frame, Cordura provides less sturdy product and softens the look and feel while several internal or external security devices allow selection of every retention level needed.

KYDEX PRODUCT LINE

Vacuum thermoformed Kydex holsters are a popular choice for firearm enthusiasts who prioritize durability, versatility, and customization. Kydex is a thermoplastic material that is known for its ability to withstand high impact and extreme temperatures, making it an ideal choice for holsters that need to withstand the rigors of everyday use.

DURABLE & RESILIENT

The Benefits of Kydex Holsters

One of the benefits is their ability to be customized to fit individual preferences. The holster can be adjusted to accommodate various carrying positions, including inside the waistband (IWB), outside the waistband (OWB), and appendix carry. Additionally, the retention level of the holster can be adjusted to provide a perfect balance between security and accessibility.

Another advantage of vacuum thermoformed Kydex holsters is their ease of maintenance. The smooth surface of the Kydex material is resistant to dirt and sweat, making it easy to clean and maintain. This also makes it a great option for those who carry their firearms in harsh environments.

RTI HOLSTER WITH BELT, VEST & DROP LEG ATTACHMENT

The set consists of the Kydex holster, horizontal belt attachment, vest attachment and drop leg platform. RTI (Rapid Transition Interface) disc enables three ways of carrying your holster and is mounted on its back. It allows fast and reliable change of the position of your holster from the belt to a drop leg platform or a vest, depending on the type of the mission you're preparing for.

Features:

- ◆ Pistol model: HS 2000
- ◆ Horizontal belt holster attachment
