

Harmonya Premium Media Player — Version 2.0

Developed by The Harmonya Chronicles™ Creative Studio

The music, the story, the experience — now, your own.

A next-generation audio player for creators, artists & storytellers

Originally developed to power *The Harmonya Chronicles™* music experience, the **Harmonya Premium Media Player** is now available as a **standalone professional audio player** —

crafted for musicians, podcasters, audiobook publishers, and creative studios who demand beauty, control, and reliability.

Built entirely in **pure HTML, CSS, and JavaScript**, this lightweight player can be embedded on **any website or WordPress installation**, without ads, external branding, or dependencies.

Features that make it stand out

 Feature	Description
 Immersive Audio Interface	Elegant, minimal, and responsive design — looks great on desktop or mobile.
 Full Playback Control	Play, pause, shuffle, seek, and volume controls — all in one seamless bar.
 Playlist Support	Organize tracks into albums or playlists with cover images and metadata.
 Pure & Lightweight	No frameworks, no tracking, no third-party branding — full creative freedom.
 Built-In Licensing System	7-day trial by default; lifetime activation with a single key.
 Embed or WordPress Plugin	Works natively on any HTML site or via shortcode: <code>[harmonya_player config="..."]</code> .
 Fully Customizable	Adjust gradients, colors, and labels directly via <code>config.json</code> .

THE HARMONYA CHRONICLES

 Feature	Description
 Support & Updates	With a lifetime license it works always. If you want to develop further, you can do it yourself or Connect with our development team to develop your own requirements

Technical Highlights

- 100% **vanilla JavaScript** (no React, Vue, or jQuery required)
 - Supports **MP3, M4A, OGG** audio formats
 - Mobile-friendly layout with adaptive controls
 - **Host-agnostic:** works on Hostinger, Squarespace, Wix, WordPress, or custom HTML pages
 - **Offline capable:** cached player code continues to work even if offline
 - Smooth integration with **Google Analytics / Matomo / custom logs** (optional hooks)
-
