THE END OF GREENWASHING

TRANSPARENCY, TRACEABILITY, AND GENUINE SUSTAINABLE IMPACT

We believe true sustainability can only be achieved when there is transparency and traceability. Without genuine proof of the use of recycled materials in a product, all sustainability claims can be considered greenwashing. Our IMPACT and CHANGE collections aim to end greenwashing and lead our industry in a new direction.

IMPACT THE POWER OF TRACEABILITY

AWARE

All recycled content claims are validated with AWARE™ which unites a physical tracer with public blockchain technology for trusted traceability.

CHANGE. SERIOUS SUSTAINABILITY

DESIGN & SUSTAINABILITY

CHANGE Collection is all about design, sustainability & giving back. All recycled fabrics, plastics, and materials used in this collection are 100% certified by the Global Recycled Standard (GRS) and Recycled Claim Standard (RCS).

From each of these collections, 2-3% of sales are donated to [water.org](https://www.water.org) to help provide water-stressed communities with lifetime access to safe water & sanitation.

Tacx Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

Small Bottle. BIG IMPACT.

Each Ocean Bottle purchased funds the collection of 1000 plastic bottles entering the ocean. That's 11.368kgs of plastic. You can make an impact on ocean plastic today! The funds from the purchase of an Ocean Bottle go towards local communities living near plastic waste streams, who are paid Fairtrade International wages for the collection of ocean-bound plastic. This is all made possible with the help of Plastic Bank and powered by a traceable IBM blockchain verified plastic collection system. The double wall insulation keeps your cold drinks cold and your hot drinks hot. Designed with a dual opening function the leak proof lid gives you the option to sip from the spout and the base and provides easy access for filling, cleaning and adding ice.

MADE FROM WASTE, TO END WASTE.

We believe that Circular Design can save the world.

Circular Design is a workable solution at a time when the world desperately needs solutions. We create products made with recycled materials, designed to last and fully recyclable. We work to a simple yet immensely challenging rule of 100-10-100. Any product created can only be justified if it's trying to or helping to achieve 100% recycled content, designed for at least 10 years use and then 100% recyclable at the end of its useful life.

1.  Make from recycled materials.
2.  Design to last.
3.  Ensure 100% recyclable.

the Future is Circular.
