

Russo-Ukrainian conflict.

Open source analyses of the conflict from the 1st of October 2024 to the 31st of October 2024.

KLA Solutions. *Report.*

About.

About KLA Solutions.

KLA Solutions is a European firm specialising in geopolitical consulting. Founded in France, we currently have representatives in Finland and Germany.

Originally working with Open-source intelligence (OSINT), we have developed our spectrum of data collection with human and academic sources.

Whether the matter is supply-chain surveillance, new market risk Analysis or geopolitical risk auditing for target investments. We dedicate our time and effort to helping your company navigate this complex, international environment.

KLA Solutions' entire team is welcoming you aboard and is prepared to answer any questions that you have regarding geopolitics.

About this report.

The war between Ukraine and Russia started in 2022. It is the first high-intensity conflict with this extent of media coverage. The information war has become essential for the belligerents. Therefore, they share an abundance of images of the combat to influence public opinion. On top of those videos and images, we can include the ones posted by civilians on social media. The analyses of those videos allow us to locate and date them precisely.

In this report, we use and assemble open-source information to consolidate a precise understanding of the conflict. We authenticate and compare that information with official and academic sources from various angles.

Information provided by human sources of the region can also be used of the report, but they will be appointed as such of the report body.

This report covers a considerable array of elements of the conflict. Covering a spectrum from foreign support and adjustments to existing policies to precise military events and related developments. The period covered by the study goes from the *1st of October 2024* to the *31st of October 2024*. The report can also include facts dated before or after the designated range.
