About PV Shield Energy

PV Shield Energy is a cleantech company dedicated to making solar energy accessible, affordable, and sustainable. With decades of combined experience, we deliver turnkey EPC solutions for industries, institutions, and residences.

Vision Statement

To become a world-class leader in renewable energy, empowering India through sustainable solar innovations.

Mission Statement

To provide cost-effective solar energy through innovation, integrity, and responsibility

Overview of Key Services

Solar EPC Solutions

Full-scope engineering, procurement & construction

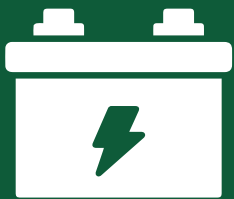

Permits, compliance, installation & quality assurance

Rooftop Solar Systems:

Commercial & industrial scale rooftop installations

MW-scale execution with lifetime support

Energy Storage Solutions:

Hybrid solar + battery systems

Grid stabilization, peak shaving & microgrid systems

Our Core Value

Integrity

Ownership

Innovation

Agility

Performance-driven

Simplifying Solar From Concept to Commissioning

A seamless journey from sunlight to savings.

Project Execution

How We Execute:

Our in-house team handles design realization, licensing, local compliance, and quality execution. We prioritize timelines, transparency, and client collaboration."

Client Testimonial

"Working with PV Shield Energy was smooth and professional. Our factory rooftop installation now saves over ₹12.5 lakh/ monthly." — Mauli Plasto Industries

O&M Services and Energy Storage Systems

O&M Services:

SCADA-enabled monitoring

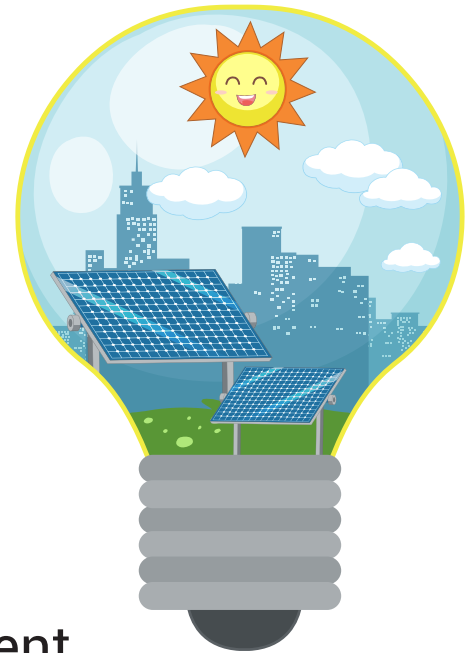

24/7 remote support

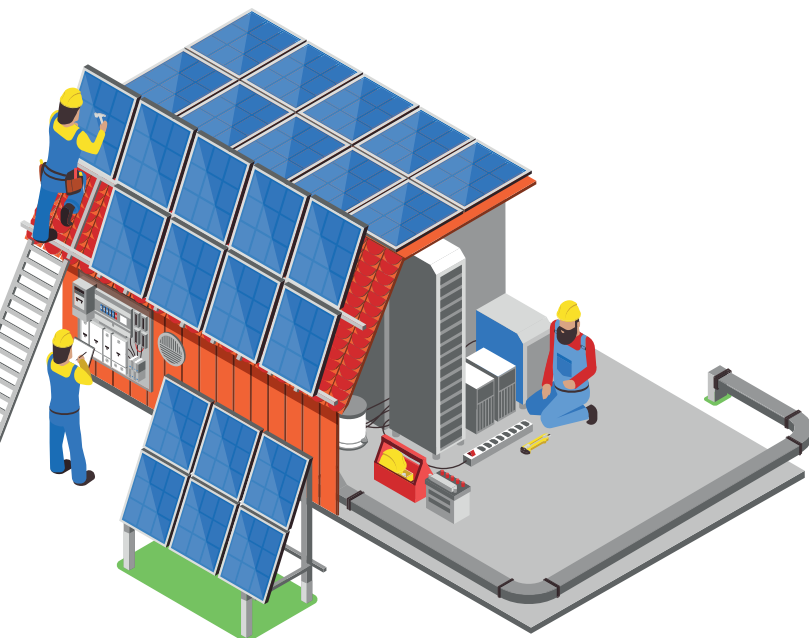

Preventive maintenance

Inventory & spares management

Energy Storage Systems:

- Real-time battery SOC feedback
- Frequency regulation, load balancing
- Microgrid & off-grid installations

How It Works

Step 1: Free Consultation

We begin with a free consultation to understand your energy needs and budget.
Schedule via call, website, or WhatsApp
Consultation lasts ~30 minutes

Step 2: Site Assessment

Our engineers visit your location to assess sunlight exposure, space availability.
Drone or manual inspection
Shade analysis and panel placement planning

Step 3: Installation

Certified technicians install the system using top-quality materials within 1–3 days.
Safety compliant, Clean and fast service
Minimal disruption

Step 3: System Activation

We test and activate the system, connecting it to the grid or battery storage if applicable.
Post-installation checklist
Quality assurance report

Step 5: Monitoring & Maintenance

Track your energy production via a mobile app, and enjoy proactive maintenance from our support team.
24/7 monitoring , Periodic performance reviews
Support hotline

Let's Go Solar Together

**Thank you for considering
PV Shield Energy as your
solar partner.**

**We're here to empower you
with clean, cost-saving
energy**
