

TONZILCA WHITEPAPER

WELCOME TO TONZILLA

Hey Dragon tamers! How's it going? Welcome to the first dragon meme project on the TON Network, where laughter meets the mission to conquer new frontiers and establish "The Dragon Planet" as our next habitat!

Born in the #YearOfTheDragon , TONZILLA arrives to destroy the jeets with its flames and empower the flight of its holders to infinity.

Not only a meme project, also including utility making possible buybacks & burn to give more value to \$TZILLA and make it as more as deflationary as possible.

Tonzilla does not have any team tokens, obviously team purchased at some \$TZILLA , actually there are whales with more tokens even than the team.

100% of the TOTAL SUPPLY was added to LP, and LP is fully burned 🔥

TOKENOMICS

Zero buy and sell tax

TOTAL MAX SUPPLY: 100.000.000 \$TZILLA

100% of tokens added lo Liquidity Pool

100% of the Liquidity Pool is burned

No team tokens

- New partners
- Meme contests
- Huge marketing
- Huge partners
- Expand \$TZILLA
- Crypto influencer
- NFTs TONZILLA
- Second donation

Stage 4

- Premier CEX list
- Meme contests
- Third donation
- Dragon partners
- New utilities
- Crypto chads in
- NFTs utility

As mentioned before, TONZILLA is already working with some utilities to bring more value to the project.

Of course it is a meme token, but also we added that plus giving an extra value to the project.

Actually, we developed already our own price bot, with an amazing look and we are still working to improve it.

We also offer customized price bots for other projects, so that revenue and the ads one, will be used for marketing, and buybacks & burn of \$TZILLA.

Also, we developed a buy bot and trending bot that is in beta phase, but we are very happy of the results, as it is one of the more fast bots giving the buys practically in real time. The revenue of this bots will also be used with the same purpose to impulse the dragon to higher heights.

The team wants the best to TONZILLA community so it will try to bring more utilities.

ACTUAL BOT EXAMPLES
