ABOUT *GP*

Golden Plaster is a trusted name in the gypsum construction material industry, committed to providing superior-quality plaster solutions that simplify construction, enhance structural integrity, and ensure aesthetic appeal. Our products are engineered to serve the evolving needs of modern architecture, bringing speed, strength, and sustainability to every surface.

With an unwavering focus on innovation and quality control, we aim to redefine the standards of internal wall and ceiling finishes across residential, commercial, and institutional sectors.

Crafted with precision for superior interiors and exteriors

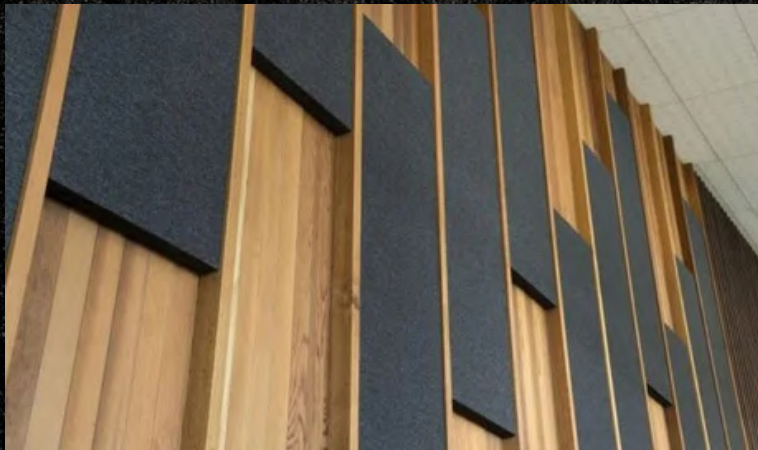

Golden Plaster is your trusted partner in delivering premium interior and exterior construction solutions. With decades of experience in manufacturing and supplying high-quality products, we serve a global clientele by providing innovative solutions in false ceilings, partitions, flooring, acoustic treatments, insulation materials, and wall cladding. Established with a commitment to quality and excellence, Golden Plaster is your go-to destination for all construction and interior fit-out needs.

01

ACOUSTIC TREATMENT & SOUNDPROOFING

Acoustic Panels & Boards:

- Wood Wool Acoustic Panels — Fire-resistant, high sound absorption (NRC up to 0.90), sizes and thickness customizable. Ideal for home theaters, studios, and auditoriums.
- Polyester Acoustic Panels — Eco-friendly PET material, sound absorbing and thermal insulating, with NRC values up to 0.80. Perfect for wall and ceiling applications.
- Magnesium Oxide Soundproof Boards — Moisture-resistant, termite and fireproof solutions for partitions. Used widely in commercial and residential spaces requiring noise control.

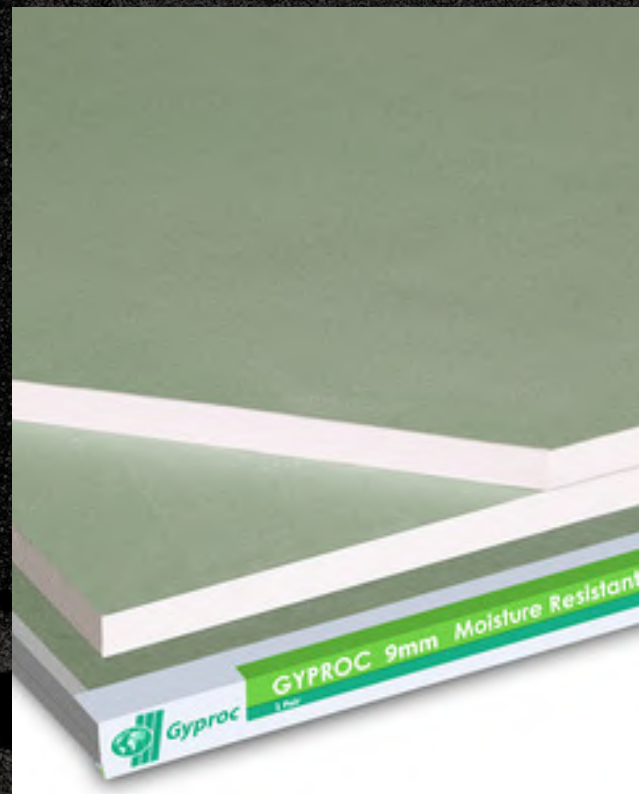

Insulating Materials:

- Fiberglass Wool Rolls — Lightweight thermal and acoustic insulation.
- Mineral Rock Wool Slabs — High fire resistance, superior sound absorption, suitable for ceiling and wall partitions.
- Polyester Wadding — Non-toxic, environment-friendly insulation alternative to traditional fibers.

03

False Ceiling & Partition Channels

Ceiling Section: Forms the primary supporting grid for false ceilings.

Intermediate Channel: Connects and supports ceiling panels, maintaining level and alignment.

Ceiling Angles: L-shaped brackets for securing to the main structural ceiling or walls.

Perimeter Channel: Secures the grid structure to surrounding walls or partitions, providing boundary support.

04

Wall Plastering Materials & Floor Guard Solutions

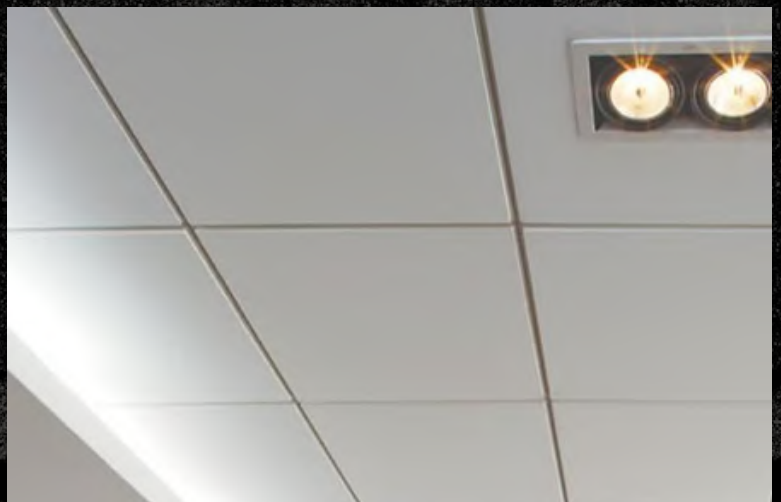

Plaster of Paris (POP) / Gypsum Powder:

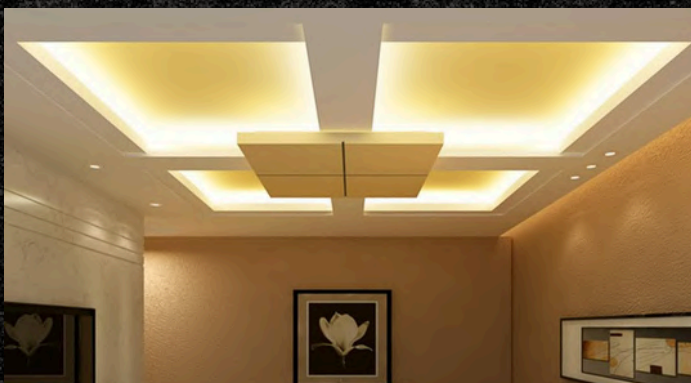

High-quality, fine powder used for smooth wall and ceiling coatings, decorative molding, and repair works. Rapid setting with a durable, crack-free finish—ideal for precise architectural detailing and finishing in interiors.

05 Grid Ceiling Tile Systems

our Grid Ceiling Tile Systems provide a strong, durable framework to support ceiling tiles with ease of installation and customization:

- **Components:** Includes pre-coated galvanized steel main tees, cross tees (in 1200mm and 600mm lengths), and perimeter wall angles that form a modular grid.
- **Design:** The grid creates a suspended ceiling framework in standard module sizes (600x600mm or 600x1200mm) to fit different tile dimensions.
- **Material:** Made from corrosion-resistant galvanized steel or aluminum for longevity and strength.
