#### Why This Timeline Is Trustworthy & Why the Bible Is a Real Historical Record

This timeline is rooted in decades of biblical scholarship, archaeological discovery, and historical documentation. Each book of the Bible is situated within the broader context of real-world events—from ancient Egypt and Babylon to the Roman Empire. The writings were preserved on materials like animal skins and papyrus, carefully copied by scribes, and passed down through generations with unmatched accuracy. The Dead Sea Scrolls, found in the mid-20th century, confirmed that even centuries-old manuscripts of the Old Testament had been faithfully preserved. Similarly, the New Testament is supported by over 5,800 Greek manuscripts—more than any other ancient document. This guide reflects both the internal consistency of Scripture and the external historical data that aligns with its timeline. More than a sacred book, the Bible is also a trustworthy historical record—and above all, the unfolding story of Jesus Christ, who is revealed from Genesis to Revelation. Its timeline is not a mythological arc but a divine narrative embedded in real time, real places, and real people.
