INNOVATION MADE VISIBLE

IN VECTA DESIGN WE BELIEVE IN EXCELLENT QUALITY, INSPIRING DESIGN AND AN AMAZING FINISHING

The brand Vecta Design was established in 2006 – with the vision to be the market leading solution provider of stretch ceilings. Nowadays we offer a complete line of products with many unique profiles and new lighting solutions in combination with excellent quality and variation of stretch ceiling materials. We offer everything one professional needs in order to create modern-day elegant and consistently exciting interior design.

ACOUSTIC WALL AND CEILING SOLUTIONS

Improving the acoustics of your space is simpler than you might imagine. Our perforated stretch material offers a durable, flame-retardant acoustic membrane with endless design options, including modules, panels, or full ceiling and wall coverings. With up to 100% acoustic absorption (achieving sound absorption class A, coefficient 1), this material not only absorbs echoes but also minimizes reverberation, providing dual benefits in one solution. What's more, our acoustic solution seamlessly integrates with light modules, offering a versatile combination of functionality and aesthetic appeal.

INNOVATIVE PROFILE SYSTEMS

No matter the construction task at hand, Vecta Design's profile collection offers exceptional versatility, ensuring you'll discover reliable and durable products tailored to your needs. Our range includes modular, construction, lighting, and separator profiles, perfect for elevating interior design to new heights. With a focus on quality and thoughtful design, our profiles are crafted for effortless and comfortable installation. If you value uniqueness and bespoke solutions, allow us to bring your interior design aspirations to life.

SAFETY

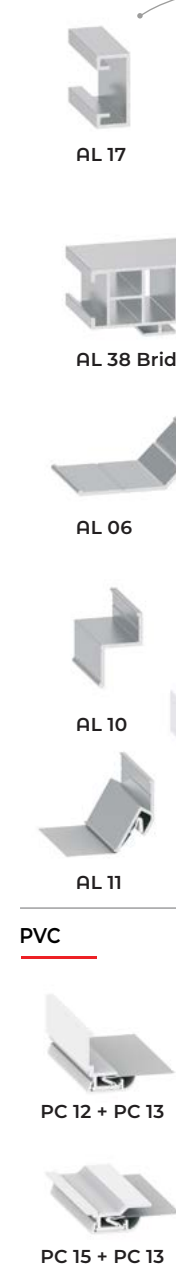

Vecta Design consistently conducts rigorous testing on its products to ensure their quality. Our range meets highest standards for fire safety, acoustic performance, and thermal insulation. Additionally, our stretch ceiling systems withstand high humidity, being both moisture-resistant and allergy-free.

When it comes to production, Vecta Design exclusively utilizes certified materials sourced from reputable European manufacturers. Furthermore, all our products are accompanied by a CE quality certificate, affirming their compliance with European standards.
