APD Small Pet Door

About This Pet Door

This Cat & Small Dog Door is multi-purpose cat flap and small dog door that is aesthetically pleasing regardless of the installation location. This door is designed to suit installation into wooden doors, security screen doors, glass windows and hinged in out style doors however not sliding doors due to side on profile width unless the door has a minimum 17mm clearance so the door can slide past. This door has a high impact Bayer 100% Polycarbonate flap which makes it virtually impossible to break, combined with a brush weather strip seal which prevents the draft and dust and a 4-way locking system so your pet can come in and stay in, go out and stay out, be locked either in or out or be able to come and go freely.

Key Benefits

- Generous flap size 150mm x 155mm
- Fits doors 3 - 40mm
- Fits glass (single & double glazing), sliding doors (patio & ranch slider) with a minimum 17mm clearance
- Virtually unbreakable Polycarbonate flaps
- Available in white frame with clear flap
- Four-way locking
- Brush weather seal to reduce draughts
- Self lining design
- Self closing magnetic locating flap
- Low maintenance, simple to clean
- Suits cats and small dogs * see sizing note below
- Manufacturer provides a 3 warranty against faulty manufacture
- Comes with installation guide and screws so the door simply clamps either side of the glass, security screen door or timber its being fitted to.
- Made Specifically For: cats and small dogs
- Flap size 150mm x 155mm
- Over-all size 250mm high x 240mm wide
- Wood & Glass cut out 175mm high x 185mm wide

SKU: APD4

APD SUPER TOUGH SINGLE GLAZE OR DOUBLE GLAZE CAT FLAP & SMALL DOG DOOR

About This Pet Door:

This robust cat and small doggie door works really well in a double glazed unit installation covering the internal black silicone seal and providing great draft stopping features. Due to the wider side on profile this pet door will not work in a sliding door or directly next to a sliding door where the door has to cross over. See our installation photos and videos for example of ideal installations to suit your furry friends best ease of access.

Flap Size: Height 205mm x Width 185mm

External Door Size: 295mm in diameter

Glass Hole Size: 267mm in diameter *the same as the Transcat cat door but can also be simply modified to suit holes as small as 245mm if you are upgrading from a similar round broken pet door.

- Super quiet action compared to other small doors which frighten our smallest friends
- Easy to remove flap for training first timers and cleaning
- Strong flap and hinge design
- More generous flap size than most clear round small pet doors
- 4 way locking design - in/out, in only, out only, locked
- Brush weather seal prevents drafts and dust
- Robust UV stable, 100% poly-carbonate construction ensures a virtually unbreakable flap
- UPGRADED Version Dog Door - from the old standard Transcat Cat Door

SKU: APD 2

APD SMALL RECTANGLE CAT & DOG DOOR

About This Pet Door

These multipurpose doors are designed to sit flush with your door regardless of its type. Whether it's a sliding door, window, screen door or a timber door, this slimline product covers any application. The flaps are virtually unbreakable, which is a signature feature in pet doors by Aussie Pet Doors. For added security, frames are fitted with security slides that lock the flap in place. When not locked, the flap is held in place via two powerful magnets which still allow the flap to be used. It also comes with a full brush weather seal to prevent draughts.

Small Door Specifications

- Flap size - 240mm High x 175mm Wide
- External frame size - 335mm High x 263mm Wide
- Glass Central Cut Out Size: 295mm high x 225mm wide. Can also be fitted as a corner cut out or side notch. Please check with the installer for rebate variations to allow correct cutout size.
- Up to approximately 6-8kgs * See below note and photo examples attached of our installations
- Suits Cats and small Dogs With An Approx. Shoulder Height Of 330mm Shoulder
- Fitting should always be made with the dogs best ease of access in mind.

Ideally suits

- Cats
- Smaller Maltese Shitzu
- Miniature Dachshunds
- Toy and teacup breeds
- Smaller West Highland Terriers
- Similar size breeds also multi pet homes (medium and small dog/cats) or older dogs with access issues.

SKU: APD10S

MEDIUM ROUND DOG DOOR

About This Pet Door

These versatile dog doors are suitable for MOST glass fitting applications. These doors will not fit into sliding doors as the frame is approximately 20mm thick. They are designed to fit into single glazing, double glazing. They are ideal in a double glazed unit (covering and UV protecting the ugly black silicone seal) or a fixed window where a door does not slide over. An excellent feature of this door is it comes with internal access only additional metal security pins for added protection.

Made from high impact polycarbonate, the flaps are virtually unbreakable and seal against draughts using a silicone coated brush weather seal. Available in white frame only with a frosted flap to which helps the flap to look newer for longer unlike the clear flap which are marked easily.

Medium Door Specifications

- Generous flap size: H x 300mm x W 295mm
- Overall outside diameter 430mm diameter
- Cut out size for glass is 385mm diameter - Same as Transcat Dog Door or Dogwalk Slimline Dog Door

SKU: APD-4RM

APD MEDIUM WHITE RECTANGULAR DOG DOOR

About This Pet Door

These multipurpose dog doors are designed to sit flush with your door regardless of door type. Whether it is a sliding door or a window, this slim line door will cover any of these applications. The door flaps are virtually unbreakable, a signature of Aussie Pet Doors range. For added security the frames are fitted with security slides locking the flap securely in place. When not in the locked position the flap is held in place against strong winds when closed, via 2 powerful magnets which still allow the flap to be used by cats and small dogs and comes with a full brush weather seal to prevent draughts, a great feature to this super strong medium sized doggie door.

Medium Door Specifications

- Suits Medium Dogs With An Approx Shoulder Height Of 460mm Shoulder
- Up to approximately 18kgs * See below note and photo examples attached of our installations

APD SERIES 2 - MEDIUM ALUMINIUM FRAMED DOOR (SINGLE OR DUAL FLAP OPTION)

About This Pet Door

This super strong aluminium framed pet door is designed to be aesthetically pleasing while maintaining the rugged durability of aluminium construction. The dual flap model is available for glass window and doors, timber doors, security screen doors and wall mount applications. Flexible and virtually unbreakable flaps seals against the aluminium frame on the inside and outside with a brush weather seal, which is held in place by powerful magnets and yet easy enough for cats and small dogs to be able to open. The flaps feature magnets on the long sides of the flap as well as the entire width of the short side on the bottom of the flaps. Extra large dog doors can also add security concern right? Ultimate security is provided with this pet door via a tough aluminium panel with a robust locking mechanism, stronger than any other lock on other doors, good luck to an intruder who dares to enter a backyard after seeing a door of this size and not wondering what giant could greet them! The TPU flap remain flexible in extreme climates unlike PVC flaps which become brittle and fail, in our years of fitting these doors and supplying to trade we have not had a replacement flap concern, they are that good!

Medium Aluminium Dog Door Specifications:

- Flexible Flap Size - 318mm x 225mm
- Overall Size - 400 x 303mm
- Suggested Cut Out Size for Glass, Timber or Screen Door Installation = 370mm x 275mm

Door Features:

- Available in a pleasing anodised silver frame.
- Unique brush weather seal to prevent drafts
- Largest Size Pet Door Available
- Flaps held in place by powerful magnets

Available From:

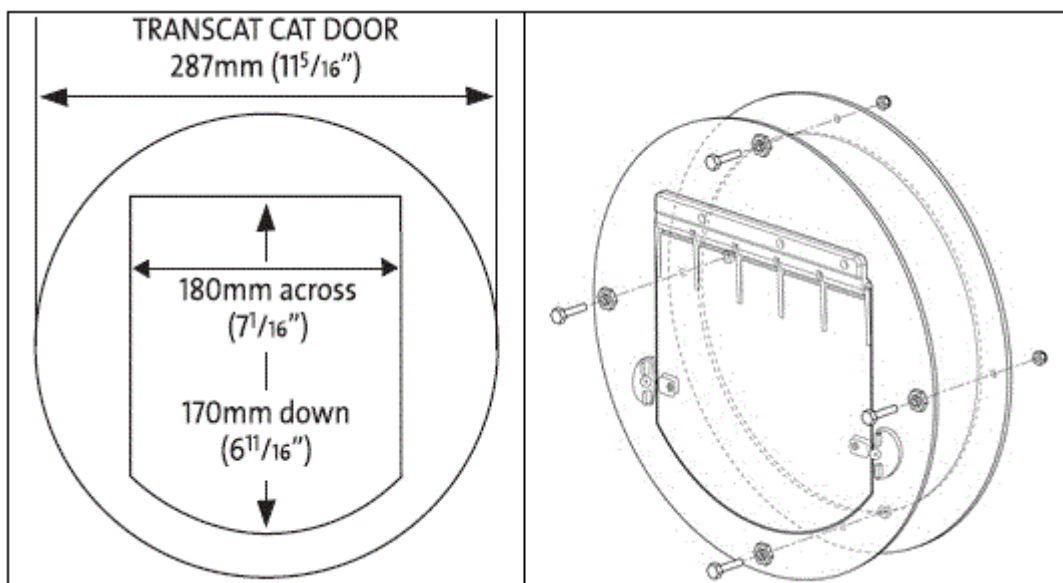

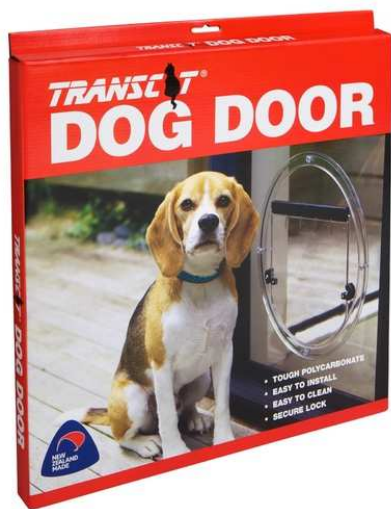

- ▶ **Sleep without interruption** - your pets love to stay inside with you, but also need the flexibility to come and go, that's why every home needs a Transcat Pet Door.
- ▶ **Convenience for you** during meals, at night, and when you're out - you won't have to worry about letting your pet in or out throughout the day or night.
- ▶ **Convenience and protection for your cat** - they can go outside for exercise and come back inside when it's too hot, cold or *scary*.
- ▶ **Hygiene** - No more accident because you didn't put your pooch out in time. You can even get rid of the cat litter box!
- ▶ **Protect your furniture** - Pets can sometimes scratch furniture and doors if they can't get out when they have to go out!

Features of the Transcat Clear Cat Door

- ✦ Weather resistant flap;
- ✦ Transparent rigid flap with magnet to stop the flap from opening at will;
- ✦ Slim, Clean and Clear design to suit your decor (doesn't stand out);
- ✦ Lockable security barrier so you decide which pet comes in and out;
- ✦ 2 year Manufacturer's Guarantee

- Lockable security barrier so you decide which pet comes in and out;
- Made in New Zealand;
- 2 year Manufacturer's Guarantee.

The Large Transcat door is ideal for medium dogs up to a small Beagle size.

Dimensions

Overall size: 400mm

Flap width: 285mm

Flap height: 245mm

Installation into Single Pane Glass

The glazier should be consulted about where to cut the hole but owners should also consider factors such as the height of the dog's legs and whether or not they are fully grown. The dog should also be able to go through the dog door without having to jump up or crouch down.

The hole in the glass should be 385mm in diameter.

Installation into a Double Glazed Panel of Glass

The glazier should be consulted about where to cut the hole but owners should also consider factors such as the height of the dog's legs and whether or not they are fully grown. The dog should also be able to go through the dog door without having to jump up or crouch down.

The hole in the glass should be 385mm in diameter. The hole should be sealed by the glazier to maintain the integrity of the double glazing.
