

ATS Resume Scorecard Diagnostic

Know if your resume is competitive — before you apply.

The ATS Resume Scorecard Diagnostic is a reusable tool that compares your resume directly against a specific job description and provides a structured alignment score based on the scoring matrix and algorithms used by actual ATS platforms.

It evaluates keyword alignment, required skills, role fit, impact strength, and structural clarity to help you understand how competitive your resume is for a given role.

How to Run a Scorecard

- Click the private access link below.
- Log into your own ChatGPT account (Free or Paid).
- Click on the “I’d like to run a Match Scorecard” button.
- Paste your resume (plain text – remove your name, address, etc... before pasting your resume).
- Paste the full job description (plain text).
- Review your structured ATS Match Scorecard.
- Re-run the tool anytime to test different roles or track improvement as you update your resume.
