

SPACELINE

VERSATILE LINEAR PROFILE

A truly integrated solution for elegantly structuring architectural spaces:

Open-plan spaces, corridors, meeting rooms, reception areas, SPACELINE is a modular lighting system designed for installation in lines or individual modules.

It is available in a complete range :

- Ceiling-mounted light
- Suspended light
- Recessed light
- Wall-mounted light

Optical systems optimised for specific applications.

SPACELINE ensures perfectly even, uniform distribution of light over long lengths, with no interruption of light or light flees, even in corners.

SPACELINE OBLIC and PRECI extend the use of this family with controlled, directed light emissions at the bottom. These direct lighting functions can be enhanced by indirect lighting to improve the quality of visual perception.

Modules for in-line or individual installation are available in 4 lengths ranging from 840 mm to 2240 mm and can be combined with 90° corner modules.

The line of all spaces

SPACELINE distributes light evenly over long distances without interruption, even in corners.

Workspaces,
meeting rooms,
corridors,
shops,
cultural centre,
schools

...

direct lighting witch **lenses** / standard or compact profile

PRECİ or OBLIC **lenses**

Symmetric or asymmetric beam
± 2400 lm/m / UGR<19

Modules	PRECİ lens Symetrical 80°	OBLIC lens Asymetrical
	Power and light output	Power and light output
± 840 mm	9W / 1300lm	18W / 1960lm
± 1120 mm	12W / 1830lm	24W / 2660lm
± 1400 mm	15W / 2340lm	30W / 3360lm
± 2240 mm	24W / 3960lm	48W / 5400lm

LEDs CRI80 ou CRI90, 3000K ou 4000K, others on request

PRISM **lenses**

With or without louver housing
± 2400 lm/m / UGR<19

2024 new feature

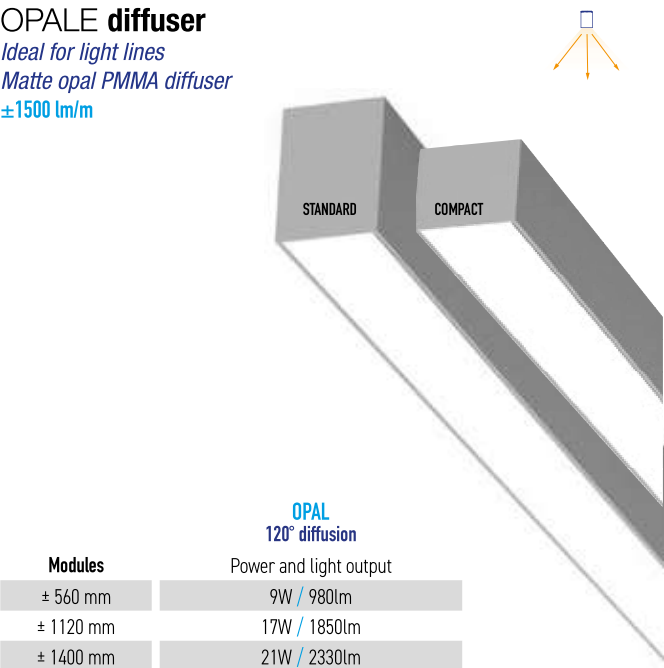

Modules	Collimateur PRISMATIQUE Symétrique 60°
	Power and light output
± 840 mm	9W / 1300lm
± 1120 mm	12W / 1830lm
± 1400 mm	15W / 2340lm
± 2240 mm	24W / 3960lm

LEDs CRI80 ou CRI90, 3000K ou 4000K, others on request

direct lighting witch **diffusers** / standard or compact profile

OPALE **diffuser**

Ideal for light lines
Matte opal PMMA diffuser
±1500 lm/m

Modules	OPAL 120° diffusion
	Power and light output
± 560 mm	9W / 980lm
± 1120 mm	17W / 1850lm
± 1400 mm	21W / 2330lm
± 1680 mm	25W / 2850lm
± 2240 mm	32W / 3700lm
± 2800 mm	39W / 4620lm

LEDs CRI80 ou CRI90, 3000K ou 4000K, others on request

MICRO PRISMATIC **diffuser**

Ideal for comfortable light lines
Micro-prismatic PMMA diffuser
± 1600 lm/m • UGR<19

Modules	MICRO PRISMATIC 120° diffusion
	Power and light output
± 560 mm	9W / 960lm
± 1120 mm	17W / 1820lm
± 1400 mm	21W / 2300lm
± 1680 mm	25W / 2800lm
± 2240 mm	32W / 3650lm
± 2800 mm	39W / 4520lm

LEDs CRI80 ou CRI90, 3000K ou 4000K, others on request

indirect lighting / standard profile only

Translucent diffuser
PMMA

TRANSLUCIDE
120° diffusion

Modules	Power and light output
± 1680 mm	22W / 2800lm
± 2240 mm	32W / 4200lm
± 2800 mm	43W / 5600lm

LEDs CRI80 ou CRI90, 3000K ou 4000K, others on request

installations

All the luminaires in the SPACELINE range are available as individual modules or as modules for lining up. They are available in a range of lengths and can be combined with corner modules, opening up infinite possibilities for layout, assembly and combinations to emphasise or structure space.

Suspended

- standard or compact profile
- quick adjustments
- fixing system can slide, enabling free positioning

Ceiling mounted

- standard ou compact profile
- invisible bracket fixing.
- flush ceiling position

Recessed

- standard ou compact profile
- with frame 76 mm
- without frame 61,6 mm
- ceiling thickness from 3 to 2 mm

Wall mounted

- standard ou compact profile
- wall mouting
- 50 mm wall offset

tailor-made continuous line - *Gives free rein to the imagination*

Continous line assembly

Fast, reliable connection system for perfect continuity of the light line.

L junctions

With fast, reliable connection systems. Continuous light flux even in corners

Custom angles

Adapting to architecture, creating innovative shapes, giving free rein to your imagination.
