About Get Orbit AI

Get Orbit AI is a multi-disciplinary solutions company helping businesses modernize how they build, source, sell, and present themselves online. We combine hands-on industry experience with modern engineering across manufacturing, supplier networks, custom systems, and digital brand management so our clients can launch faster, operate leaner, and compete confidently in their market.

Our team has delivered work across diverse domains and geographies, serving more than 40 clients to date with a balance of strategy, design, and engineering. Whether you need a polished business website, a custom internal tool, an AI-driven workflow, or a reliable supplier partner, we operate as a single accountable team you can grow with.

OUR MISSION

Empower businesses with scalable, innovative digital solutions and dependable industry partnerships so they can focus on growth.

OUR VISION

To be the trusted long-term partner for ambitious businesses across manufacturing, supply, technology, and brand connecting the dots between physical operations and digital growth.

What We Do

Six core service areas, designed to be combined or used independently based on your needs.

Custom Website Development

Portfolio sites, business websites, e-commerce, and conversion-optimized landing pages. Hand-crafted, fast, mobile-first, and built to scale.

Custom Systems & Software

Bespoke internal tools, dashboards, automations, and integrations that connect the systems you already use and remove manual work.

Manufacturing Support

Project coordination, vendor selection, prototyping support, and process documentation for businesses bringing physical products to market.

Supplier & Sourcing

Trusted supplier discovery, due diligence, negotiation, and ongoing supplier management — across India, USA, and partner geographies.

Brand & Digital Management

End-to-end brand identity, social presence, content, and digital marketing that consistently represents your company at its best.

AI Tools & Automation

Practical AI workflows — content, analytics, customer support, and decision support — embedded into the tools your team already uses.

Industries We Serve

Get Orbit AI works across multiple domains bringing pattern recognition from one industry to challenges in another.

Manufacturing

Process documentation, vendor coordination, digital ops, and product launch support.

Supply & Distribution

Supplier sourcing, vendor due diligence, and ongoing supplier relationship management.

Retail & E-commerce

Brand sites, online stores, catalog management, and customer-facing automation.

Professional Services

Portfolio websites, client portals, and internal workflow tools.

Startups & SMBs

End-to-end launch — brand, website, and the systems that scale with growth.

Education & Training

Course pages, learning portals, content management, and AI-assisted tooling.

Why Get Orbit AI

One accountable partner

Strategy, design, engineering, and supplier coordination from a single team fewer handoffs, less translation cost, faster outcomes.

Cross-domain experience

We've worked across manufacturing, supply, custom systems, and digital brand work. That breadth shows up as better judgment on every project.

Practical AI, not hype

We use AI where it genuinely improves throughput or quality and skip it where a simpler solution wins.

Built for the long term

Documented, maintainable systems and clear ownership. Hosting from \$5/month and predictable ongoing support.

Global reach, local presence

Teams and contact lines in India and the USA convenient for businesses operating across both markets.

How We Work

01

Discovery

Free consultation to understand goals, constraints, and what success looks like.

02

Proposal & Plan

Clear scope, timeline, deliverables, and pricing written down before anyone signs.

03

Build

Iterative delivery with regular check-ins. You see progress weekly, not at the end.

04

Launch & Support

Smooth handover, hosting from \$5/month, and ongoing support packages tailored to your needs.

LET'S BUILD SOMETHING.

Free consultation. Clear pricing. Predictable delivery.
