

Workshop Introduction

We specialize in Growth Mindset development, Team Storytelling, Change Management, Strategy & Planning, Sales Training, and Coaching for executives, founders, and emerging leaders. Whether you're scaling, pivoting, or just trying to get unstuck, we bring fresh perspective and practical tools to move your vision forward.

No two teams are the same, and **no two workshops should be either.** Our approach is more like guiding a river rafting trip than delivering a pre-packaged training. Yes, we bring the gear, the experience, and a map — but we also know that every group, every current, and every rapid is different.

Performing
Teams don't
happen by
accident**

11

From leadership development to strategic planning, communication, and beyond — our workshops are designed to meet you where you are, and help guide you where you want to go. **We're not here to drop in, deliver, and disappear.** We're here to co-pilot, co-create, and amplify what's already possible within your team.

We co-create every workshop with you, aligning to the goals and outcomes you're aiming for — even if you're not exactly sure what those are yet. Whether you're looking to build trust, clarify direction, improve collaboration, or simply reconnect as a team, we start by listening. We assess, diagnose, and immerse ourselves in your team's dynamic so we can navigate alongside you, adjusting in real-time to what's needed most.

Growth Mindset Workshop

This workshop is for leaders and teams who are ready to evolve- not just in what they do, **but in how they work together.** Whether a team is navigating change, recalibrating after growth, or trying to break free from old patterns, this experience meets you where you are.

11

Ideal participants include intact teams led by people who are respected and trusted within their org, leaders who value connection and creativity but need help embedding those into daily work, and teams ready to trade perfectionism for progress. From startups to enterprises, from mid-level managers to executive leadership, the common thread is a willingness to lean in, reflect, and co-create something better.

Why now?

Most teams say they want innovation, agility, and trust. But few create the psychological safety and communication norms that make those things possible.

If your team is hitting **communication friction, change fatigue, or the “we know we need to collaborate better but don’t know how” wall, this is your moment.** In a business world that demands faster decisions and continuous reinvention, the real differentiator isn’t just strategy-it’s mindset.

This workshop helps your team turn vague aspirations into clear actions, transforming how people think, listen, take risks, and work together.

This isn’t training, it’s a turning point

Our Growth Mindset Workshops are designed to shift **how your team works, thinks, and connects.** Through a blend of improv-based tools, curiosity-driven dialogue, and guided practice, your team will walk away with the clarity, trust, and language to collaborate more boldly and lead with intention. We bring the map, you bring the team- and together, we’ll navigate toward what’s next.
