

Partner Line Card

4Media represents best-of-class AV/IT products and solutions for various markets and applications. We work with our partners and clients to develop a winning approach and position them to gain a competitive advantage.

Liberty offers a complete technology ecosystem with advanced infrastructure solutions for A/V, security, connectivity, wireless, and DAS—serving commercial, industrial, government, residential, and academic markets.

Stewart Audio is an American manufacturer of audio products for the professional AV market. Their broad array of compact standard and network amplifiers span both analog and digital worlds and include a combination of features with Dante, RS232 and DSP.

SP Controls, a Stewart Audio company, was the first to introduce a user-configurable, easy-to-use, simple AV control system. Their expanded ecosystem of control, audio, and switching solutions are affordable, reliable, and ideal for classrooms, training rooms, and conference rooms.

Virtual Technologies, Inc (VTI) delivers cutting-edge and innovative display solutions, from interactive flat panels to LED video walls, proven to be successful in K-12, Higher Ed, and corporate markets.

Watchfire's products include indoor and outdoor LED displays, fixed digit and video scoreboards, digital billboards, and software solutions. The excellence in every Watchfire display begins with their outstanding engineering team designing a quality product and extends beyond the installation to support and customer service.

Zenapptic is an open, scalable platform for building epic real-time virtual experiences for any real time data visualization or live event application. The Zenapptic platform can deliver impacting content, to any screen, across a wide range of applications, including experiential spaces, digital workplace solutions, experience centers, virtual production, and more.
