Meeting rooms, training rooms and more:

We design, install, and configure audio-visual equipment for meeting rooms, training rooms, town halls, and communal areas.

Our solutions encompass video conferencing systems, projectors, screens, sound systems, digital signage, TVs and large format/LED displays.

Seamless collaboration and communication:

Equip your Teams rooms and Zoom rooms with the necessary hardware and software for efficient video conferencing, screen sharing and collaboration.

Leverage our expertise to design training rooms optimised for clear communication and presentations.

Advanced workplace technology solutions:

In addition to AV, we offer a range of workplace technology solutions to streamline your operations and enhance user experience:

- **Room and desk booking:**
Integrate room and desk booking systems with your AV systems for effortless scheduling.
- **Distributed audio systems:**
We create and install distributed audio systems to create the perfect soundscape throughout your building.
- **Digital signage:**
Design, installation and maintenance of digital signage systems to display dynamic content, announcements, wayfinding information and more.

Vision-Tech AV: Your Workplace Technology Partner

Vision-Tech AV goes beyond traditional audio-visual solutions to provide a comprehensive suite of services that elevate your entire workplace technology experience.

We understand the evolving needs of modern businesses and can equip your space with the tools to foster collaboration, improve productivity and empower your workforce.

Expert project management and detailed design:

Our experienced project managers ensure your AV and workplace technology installation runs smoothly, on time and within budget.

We provide detailed technical drawings, schematics, rack layouts, GA/RCP markups and AV network designs for a clear roadmap of your system.

Enhanced user experience:

Unlock powerful AV control with our user-friendly GUI design services and programming.

Our team is proficient in industry-leading control systems, crafting intuitive interfaces for effortless operation.

Streamlined installation process:

Pre-configuration services minimise on-site installation time and ensure your system is ready to function flawlessly upon arrival.

We offer thorough equipment testing, firmware/software updates, pre-loaded login details, DSP configuration and detailed AV network deployment plans.

Trusted AV installation and commissioning:

Our certified engineers deliver high-quality installations, leveraging access to top-tier equipment, tools, and specialist LED display services.

Meticulous commissioning includes equipment configuration, comprehensive system testing, audio balancing, room equalisation, display optimisation, AV network deployment, control system setup and full system testing with a final commissioning report.
