

One platform for every AI model

Give your employees access to the AI solutions they need, all from one secure, controlled platform.

AI IS ALREADY IN YOUR COMPANY – WHO'S MONITORING IT?

With most employees having unregulated access to AI tools at work, your company could be at risk of facing compliance violations, data leaks, and costly security and legal consequences.

+75%

OF WORKERS ARE USING THEIR OWN AI TOOLS AT WORK WITHOUT IT OVERSIGHT

01

DON'T LET SHADOW AI PUT YOUR BUSINESS AT RISK

Consolidate your employee's AI activity on one platform that you manage, guaranteeing safe and compliant AI usage.

Centralize access to 30+ LLMs under one plan, eliminating the need for fragmented spending on multiple subscriptions.

Safeguard your data through a secure Azure instance, ensuring sensitive data is never used to train public LLMs.

Apply access & governance controls to eliminate shadow AI and guarantee compliant, authorized usage.

Access **30+ LLMs** for just **75% of the cost** of one

02

EASILY CREATE AND DEPLOY AI AGENTS ACROSS YOUR ORGANIZATION

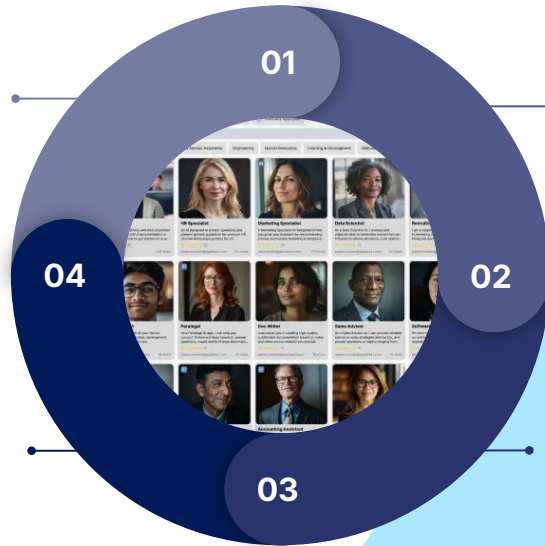

Access the no-code agentic AI tools your company needs. Build and deploy intelligent agents that deliver time and cost savings across departments.

Customize your agent

Train your agent using your own data sources and select the LLM tailored to your needs

Augment agent knowledge

Utilize predefined data pipelines to augment the agent's knowledge

Deploy at scale

Embed agents into your business workflows or integrate via APIs

Orchestrate complexity

Build sophisticated agents that manage complex workflows and perform tasks

03

STREAMLINE AI MANAGEMENT TO SAVE TIME & MONEY

Manage your AI agent's end-to-end to ensure optimal performance, maximize utility, and deliver ongoing cost savings.

Automate data updates to keep knowledge base current with real-time data from drives, websites, and other custom sources.

Easily switch LLMs as new versions are released, without the hassle of changing plans, reintegrating, or retraining your agent.

Track & monitor performance and resource consumption to optimize utility and avoid unnecessary costs.
