Multi-Stage Treatment Train Influent is routed through a robust sequence of physical, chemical, and biological processes:

- **Receiving & Screening** - Inline strainers remove gross solids and debris.
- **Equalisation & pH Control** - Large EQ tanks buffer flow and neutralize extremes.
- **Primary Chemical Treatment** - Coagulant / flocculant addition, dissolved-air flotation, and clarifiers strip oils, TSS, and heavy metals.
- **Biological Oxidation** - High-rate aeration basins reduce BOD/COD; nutrient control maintains a healthy biomass.
- **Advanced Polishing** - Media filtration, carbon adsorption, or membrane ultrafiltration delivers a crystal-clear effluent ready for discharge or reuse.

~ ER. AVINASH MISHRA (CEO&MD), SCHICKSAL GROUP

Our Core Products

- Clarifier System
- Filtration Plant
- Water Softener Plant
- Reverse Osmosis Plant
- Ultra Filtration Plant
- Desalination Plant (SWRO)
- Demineralisation Plant
- Sewage Treatment Plant
- Effluent Treatment Plant
- Condensate Polishing Unit
- Zero Liquid Discharge System
- Oil Water Separator
- Online Monitoring System
- Dosing Systems
- Surge Vessel/Air Vessel
- Fabrication
- Storage Tanks
- ASME Vessels
- Pressure Vessel
- Electrical Control Panels
- Revamping & Refurbishing
- Operation & Maintenance
- AMC
- Environmental Consultancy (NOCs)

Delivering Sustainable Engineering Solutions Across India

Our Core Services

+91-8700613321

www.schicksalengineering.com

Directorschicksalengineering.com

Environmental & Regulatory Services

- Environment / Forest / Wildlife Clearance
- Statutory NOC & Regulatory Compliances

Impact Assessment

- Environmental Impact Assessment (EIA)
- Socio-Economic Impact Assessment
- Groundwater Impact Assessment
- Biodiversity Impact Assessment

EHS & Sustainability

- Environment, Health & Safety (EHS) Audit & Training
- ESG & BRSR Reporting

Laboratory Services

- Testing & Analysis of:
 - Air
 - Water
 - Noise
 - Soil
 - Stack Emissions

Waste & Water Management

- Solid Waste Management Solutions
- STP / ETP / RO / WTP Design & Installation
- Rain Water Harvesting (RWH) Systems

Industries We Serve

- Building & Infrastructure
- Area Development Projects
- Mining & Industrial Units
- Highways & Urban Development
- Municipal & Government Projects

Sampling & Testing

- Group I – Pollution & Environment
 - Subgroup I – Wastewater (Effluent/Sewage)
 - Subgroup II – Wastes (Liquid/slurry/sludge/solid/semisolid)
- Group II – Atmospheric Pollution
 - Subgroup I – Ambient Air
 - Subgroup II – Ambient Noise
 - Subgroup III – Work zone or Indoor Noise
 - Subgroup IV – Source Noise Level (DG or Machinery)
 - Subgroup V – Stack Emission
 - Subgroup VI – Work Environment & Indoor Air Quality
- Group III – Residues in Water
 - Subgroup I – Trace Metal Elements
- Group IV – Water
 - Subgroup I – Drinking Water
 - Subgroup II – Groundwater
 - Subgroup III – Packaged Drinking Water
 - Subgroup IV – Surface Water

Industries

- Mfg. Plants & Refineries
- Pulp & Paper Industries
- Centralised Waste Treatment
- Hotels & Restaurants
- Schools & Collages
- Housing Societies
- Wash Out Facilities
- Municipal Wastewater Plants
- Food & Beverage
- Pharmaceuticals
- Hospitals
- Electroplating & Chemicals

AMCs

- Water Softener Plant
- Reverse Osmosis Plant
- Ultra Filtration Plant
- Demineralised Plant (DM-RO)
- Demineralisation Plant
- Sewage Treatment Plant
- Effluent Treatment Plant
- Condensate Polishing Unit
- Zero Liquid Discharge System
- Scrubbers
- Anodising Plants

SMART ELECTRICAL PANELS FOR RELIABLE INDUSTRIAL PERFORMANCE

ABOUT ASD

ASD (Advanced Systems & Drives) delivers **HIGH-PERFORMANCE ELECTRICAL PANELS** designed for **INDUSTRIAL AUTOMATION, power DISTRIBUTION, AND PROCESS CONTROL.** Engineered with precision and safety, our panels ensure **EFFICIENCY, DURABILITY, AND SEAMLESS OPERATIONS.**

PRODUCT RANGE

- ✓ **MCC PANEL** (*Motor Control Center*)
Controls multiple motors from a centralized system.
Sizes: up to 4000A.
Uses: STP/ETP/ROnG, intercios
- ✓ **PCC PANEL** (*Power Control Center*)
Main power distribution panel for high load applications.
Sizes: up to 6300A.
Uses: industries, large facilities
- ✓ **APFC PANEL** (*Automatic Power Factor Correction*)
Improves power factor & reduces electricity bills.
Sizes: up to 500 KVAR.
Uses: factories, commercial buildings
- ✓ **VFD PANEL** (*Variable Frequency Drive*)
Smooth motor control & energy saving
Sizes: 1 HP to 500 HP.
Uses: Pumps, blowers, HVAC

KEY FEATURES

- ✓ Branded Components (Siemens / Schneider / ABB / L&T)
- ✓ Robust MS Enclosures (IP54 / IP55)
- ✓ Energy Efficient Design
- ✓ Safety Protections & Interlocks
- ✓ PLC & Automation Ready
- ✓ Custom-Built to Requirement

APPLICATIONS

- ✓ Water Treatment Plants
- ✓ Industrial Automation
- ✓ Manufacturing Units
- ✓ Production Machinery
- ✓ Solar & Renewable Systems
