

ANTHONY FAUCI

Dr. Fauci’s catastrophic failure to achieve beneficial health outcomes during the COVID-19 crisis is consistent with the disastrous declines in public health during his half-century running NIAID. For anyone who might have assumed that federal and public health bureaucrats survive and flourish by achieving improvements in public health, dr. Fauci’s durability at NIAID is a disheartening wake-up call. By any measure, he has consistently failed upward.

Fauci has presided over cataclysmic declines in public health, including an exploding chronic disease epidemic that has made the “Fauci generation”—children born after his elevation to NIAID kingpin in 1984—the sickest generation in American history, and has made Americans among the least healthy people on the planet. His obsequious subservience to the Big Ag, Big Food, and pharmaceutical companies has left our children drowning in a toxic soup of pesticide residues, corn syrup, and processed foods, while also serving as pincushion for 69 mandated vaccine doses by age 18—none of them properly safety tested.

When Dr. Fauci took office, America was still ranked among the world’s healthiest populations. An August 2021 study by the Commonwealth Fund ranked America’s health care system dead last among industrialized nations, with the highest infant mortality and the lowest life expectancy. If health care were an Olympic sport, the US might not qualify in a competition with other high-income nations.

Following World War II, life expectancy in the US climbed for five decades, making Americans among the longest-lived people in the developed world. IQ also grew steadily by three points each decade since 1900. But as Tony Fauci spent the 1990s expanding the pharmaceutical and chemical paradigm—instead of public health—the pace of longevity and intelligence slowed. Life expectancy decrease widened the gap between the US and its peers to nearly five years, and American children have lost seven IQ points since 2000.

Under Dr. Fauci’s leadership, the allergic, autoimmune, and chronic illnesses which Congress specifically charged NIAID to investigate and prevent, have mushroomed to afflict 54% of children, up from 12.8% when he took over NIAID in 1984. Dr. Fauci has offered no explanation as to why allergic diseases like asthma, eczema, food allergies, allergic rhinitis, and anaphylaxis suddenly exploded beginning in 1989, five years after he came to power.

On its website, NIAID boasts that autoimmune disease is one of the agency’s top priorities. Some 80 autoimmune diseases, including juvenile diabetes and rheumatoid arthritis, Graves’ disease, and Crohn’s disease, which were practically unknown prior to 1984, suddenly became epidemic under his watch.

Autism, which many scientists now consider an autoimmune disease, exploded from between 2/10,000 and 4/10,000 Americans when Tony Fauci joined NIAID, to one in thirty-four today. Neurological diseases like ADD/ADHD, speech and sleep disorders, narcolepsy, facial tics, and Tourette's syndrome have become commonplace in American children.

The human health, and economic costs of chronic disease dwarf the costs of all infectious diseases in the US. By this decade's end, obesity, diabetes, and pre-diabetes are on track to debilitate 85% of Americans. America is among the ten most over-weight countries on Earth. The health impacts of these epidemics, which fall mainly on the young, eclipse even the most exaggerated health impacts of COVID-19.

Since genes don't cause epidemics, it must be environmental toxins. Many of these illnesses became epidemic in the late 1980s, after vaccine manufacturers were granted government protection from liability, and consequently accelerated their introduction of new vaccines. The manufacturers inserts of the 69 vaccine doses list each of the now-common illnesses—some 170 in total—as vaccine side effects. So vaccines are a potential culprit, but not the only one.

Other possible perpetrators—or accomplices—that fit the applicable criterion—a sudden epidemic across all demographics beginning in 1989—are corn syrup, PFOA flame retardants, processed foods, cell phones and EMF radiation, chlorpyrifos, ultrasound, and neonicotinoid pesticides.

Tracing the etiology of these diseases through epidemiological research, observational and bench studies, and animal research is exactly what Congress charged Fauci to perform. But Tony Fauci controls the public health bankbook and has shown little interest in funding basic science to answer those questions.

Any serious investigation into the source of the chronic disease epidemic would certainly implicate the powerful pharmaceutical companies and the chemical, agricultural, and processed food multinationals that Dr. Fauci, and his twenty-year business partner, Bill Gates, have devoted their careers to promoting. His capacity to curry favor with these merchants of pills, powders, potions, poisons, pesticides, pollutants and pricks has been the key to Dr. Fauci's longevity at HHS.

Due to his vast budgetary discretion, his unique political access, his power over HHS and its various agencies, his moral authority, his moral flexibility, and his bully pulpit, Tony Fauci has more power than any other individual to direct public energies toward solutions. He has done the opposite. Instead of striving to identify the etiologies of the chronic disease pandemic, Dr. Fauci has deliberately and systematically used his staggering power over Federal scientific research, medical schools, medical journals, and the careers of individual scientists, to derail inquiry and obstruct research that might provide the answers.

The historical underpinnings of the cataclysm began in 2020. The very governmental health regulators, social media eminences, and media companies that idealistic populations relied upon as champions of freedom, health, Constitutional Republic, unalienable God-given rights, and evidence-based public policy seemed to collectively pivot in a lockstep assault against free speech and personal freedoms.

Suddenly, those trusted institutions seemed to be acting in concert to generate fear, promote obedience, discourage critical thinking, and herd seven billion people to march to a single tune, culminating in mass public health experiments with a novel, shoddily tested and improperly licensed technology so risky that manufacturers refused to produce it unless every government on Earth shielded them from liability.

Across Western nations, citizens experienced all the well-worn tactics of rising totalitarianism—mass propaganda and censorship, the orchestrated promotion of terror, the manipulation of science, the suppression of debate, the vilification of dissent, and use of force to prevent protest. Conscientious objectors who resisted these unwanted, experimental, zero-liability medical interventions faced orchestrated gaslighting, marginalization, and scapegoating.

American lives and livelihoods were shattered by a bewildering array of draconian diktats imposed without legislative approval or judicial review, risk assessment, or scientific citation. So-called Emergency Orders closed our businesses, schools, and churches, made unprecedented intrusions into privacy, and disrupted our most treasured social and family relationships. People the world over were ordered to stay at home.

Standing in the center of all the mayhem, with his hand on the helm, was one dominating figure. As the trusted public face of the United States government response to COVID, Dr. Anthony Fauci set this perilous course and sold the American public on a new destination for our Republic.

There is a pervasive web of deep financial entanglements between Big Pharma and the government health agencies. The CDC, for example, owns 57 vaccine patents and spends \$4.9 of its \$12.0 billion-dollar annual budget (as of 2019) buying and distributing vaccines. NIH owns hundreds of vaccine patents and often profits from the sale of products it supposedly regulates.

High-level officials, including Dr. Fauci, receive yearly emoluments of up to \$150,000 in royalty payments on products that they help develop and then usher through the approval process. The FDA receives 45% of its budget from the pharmaceutical industry, through what are euphemistically called “user fees.” The disastrous health of the American people is no longer a mystery. Imagine what the environment would look like if the EPA received 45% of its budget from the coal industry! Many never quite realize how thoroughly the decades of attacks succeeded in transforming those agencies into subsidiaries of Big Pharma.

Anthony Fauci helped orchestrate and execute 2020’s historic coup d’etat against Western countries. It was a carefully-planned militarization and monetization of medicine that has left American health ailing, and its Republic shattered, the dangerous concentrated mainstream media, Big Tech robber barons, the military and intelligence communities and their deep historical alliances with Big Pharma and public health agencies. Of the many in power that have worked hard to prevent the public from learning it, the main character is Anthony Fauci.

As the world’s faith in American leadership dwindled, the singular US institutions that were seemingly immune from international disillusionment were our public health regulators; HHS—and its subsidiary agencies CDC, FDA, and NIH—persisted as role models for global health policies and gold standard scientific research.

Dr. Anthony Fauci spent half a century as America’s reigning health commissar, ever preparing for his final role as Commander of history’s biggest war against a global pandemic. Beginning in 1968, he occupied various posts at the National Institute of Allergy and Infectious Diseases (NIAID), serving as that agency’s Director since November 1984.

His \$417,608 annual salary makes him the highest-paid of all four million federal employees, including the President. His experiences surviving 50 years as the head of a key federal bureaucracy, having advised six Presidents, the Pentagon, Intelligence agencies, foreign governments, and the WHO, seasoned him exquisitely for a crisis that would allow him to wield power enjoyed by few rulers and no doctor in history.

Turning their backs to the foreboding horizon, trusting Americans manned the oars and blindly obeyed his commands—little realizing they were propelling our country toward the desolate destination where Republics go to die. Many Americans, dutifully locked in their homes in compliance with Dr. Fauci's quarantine, took consolation in their capacity to join a Tony Fauci fan club.

Dr. Fauci encouraged his own canonization and the disturbing inquisition against his blasphemous critics. In a June 9, 2021, interview, he pronounced that Americans who questioned his statements were, per se, antisience. *"Attacks on me,"* he explained, *"quite frankly, are attacks on science."* The sentiment he expressed reminds us that blind faith in authority is a function of religion, not science. Science flourishes on skepticism toward official orthodoxies.

Fauci twice lied to Americans to promote his agendas—on masks and herd immunity—raised the prospect that some of his other "scientific" assertions were, likewise, noble lies to a credulous public he believes in unworthy of self-determination.

In August 2021, Dr. Fauci's acolyte—CNN's television doctor, Peter Hotez—published an article in a scientific journal calling for legislation to "expand federal hate crime protections" to make criticism of Dr. Fauci a felony. Dr. Hotez, who said that vaccine skeptics should be snuffed out, evidently forgot the millions of dollars in grants he has taken from Dr. Fauci's NIAID since 1993, and more than \$15 million from Dr. Fauci's partner, Bill Gates, for his Baylor University Tropical Medicine Institute.

Dr. Fauci's direct and indirect control—through NIH, Bill and Melinda Gates Foundation, and the Wellcome Trust of some 57% of global biomedical research funding—guarantees him this sort of obsequious homage from leading medical researchers, allows him to craft and perpetuate the reigning global medical narratives, and can fortify the cannon that he himself, is science incarnate.

High-visibility henchmen like Hotez—and Pharma's financial control over the media through advertising dollars—have made Dr. Fauci's pronouncements impervious to debate and endowed the NIAID Director with personal virtues and medical gravitas supported by neither science nor his public health record. By the latter metric, his 50-year regime has been calamitous for public health and for our Republic. His administration of the COVID plandemic was, likewise, a disaster.

As the world watched, Tony Fauci dictated a series of policies that resulted in by far the most deaths, and one of the highest percentage COVID-19 body counts of any nation on the planet. Only relentless propaganda and wall-to-wall censorship could conceal his disastrous mismanagement during COVID-19's first year. The US, with 4% of the world's population, suffered 14.4% of total COVID deaths.

After achieving these cataclysmically awful results, Fauci's media savvy and his skills for deft maneuvering beguiled incoming (R)esident Joe Biden into appointing him as the new administration's COVID Response Director.

Blinded by generously stoked fear of deadly disease Americans failed to see the mounting evidence that Dr. Fauci's strategies were consistently failing to achieve promised results, as he doggedly elevated Pharma profits and bureaucratic powers over waning public health.

From this 50-year saga, Dr. Fauci's remedies are often more lethal than the diseases they pretended to treat. His COVID prescriptions were no exception. With his narrow focus on the solution of mass vaccination, Dr. Fauci never mentioned any of the many other costs associated with his policy directives.

Anthony Fauci seemed to not have considered that his unprecedented quarantine of the healthy would kill far more people than COVID, obliterate the global economy, plunge millions into poverty and bankruptcy, and grievously wound the constitutional republic here and democracies globally. We have no way of knowing how many people died from isolation, unemployment, deferred medical care, depression, mental illness, obesity, stress, overdoses, suicide, addiction, alcoholism, and the accidents that so often accompany despair. We cannot dismiss the accusations that his lockdowns proved more deadly than the contagion.

US life expectancy decreased by 1.9 years during the quarantine. Since COVID in the UK was 82.4, which was above the average lifespan, a virus could not by itself cause the astonishing decline. Between 2018 and 2020, the average Hispanic American lost around 3.9 years in longevity, while the average lifespan of a Black American dropped by 3.25 years. Between 2018 and 2020, the 1.9 year decrease in average life expectancy at birth in the US was roughly 8.5 times the average decrease in 16 comparable countries, all of which were measured in months, not years.

These are numbers we aren't at all used to seeing in this research; 0.1 years is something that normally gets attention in the field, so 3.9 years and 3.25 years and even 1.4 years is just horrible. We haven't had a decrease of that magnitude since World War II.
