

DISTILLED COW URINE

In Ayurvedic medicine, they call cow urine the fountain of youth. The elixir of life is cow urine!

In India, they're using distilled cow urine therapy. This is where they evaporate all the water out of the urine and you have the leftover crystals, and they use that as a therapy. E. coli bacteria and yeast infections are obliterated by this distilled cow urine, and even more so by crude cow urine than by any antibiotic they used.

Cow urine and horse urine, are used for autoimmune diseases from Crohn's to colitis in humans. Dr. Stanislaw Burzinski was using *antineoplastons* for brain tumors. These are anti-tumor cells, specifically from horse urine. But human urine is the holy grail because it's autologous and obviously what's from the same species as you.

To kill parasites, helminths or worms, tapeworms, roundworms, the cow urine is destroying worm parasites. And a quarter of the time it took for drugs to do it. It was within hours, not days like the drugs. Every bacteria, every yeast, and every single parasite were annihilated by urine. It's exponentially faster than all the drugs they were using. It takes 72 hours for a drug like amoxicillin to kill the E. coli bacteria. It only takes 18 hours to kill all of it with just cow urine. This is massively fast for detoxifying from pathogens.

Science has been able to prove, one after another, that it's even more potent than antibiotics that were designed by drug manufacturers to beat these diseases, and cow urine can do it well, what is the propensity and potential of human beings own urine to magnify the potential for healing?

People are reversing their eyesight issues, dropping a point a month with myopia, by putting fresh urine directly in the eyes. He wasn't even drinking it. In 4 weeks, they get their eyesight back. Folks that couldn't read a menu before the urine therapy could put it in front of their eyes and read it, even in the dark. After only a 4 week period of applying it directly.
