A Note from the Founding Member

Dear Friends,

I'm thrilled to introduce the **EAW Global Aqua Expo 2026**, a significant milestone in our ongoing mission to advance water and wastewater management globally. Over the past two decades, our commitment to this cause has been unwavering, and this new initiative is another step towards creating a global platform that fosters innovation, collaboration, and sustainable solutions.

The 20th EverythingAboutWater Expo 2025 was a resounding success, uniting global industry leaders, innovators, policymakers, and stakeholders. This milestone event underscored the importance of robust platforms that tackle India's water challenges while fostering international collaboration and knowledge sharing.

We are committed to making **EAW Global Aqua Expo 2026** a pivotal event. Our vision is to create a premier international platform where global brands, technology providers, and decision-makers can showcase, share, and scale their solutions for a water-secure future.

Mark your calendars for **August 6-8, 2026, at Pragati Maidan, New Delhi!** This expo provides an opportunity to showcase innovative technologies, forge strategic partnerships, and shape the future of the water and wastewater sector.

I warmly welcome you to be part of this exciting journey and join us in making the **EAW Global Aqua Expo 2026** a landmark event.

Together, let us drive change and build a more sustainable tomorrow!

With best regards,
Shivani Ghorawat

Earth Water Foundation

About the Event

The **EAW Global Aqua Expo 2026** is a premier international exhibition dedicated to the water and wastewater industry, bringing together global leaders, innovators, policymakers, and solution providers under one roof. Organized by the Earth Water Foundation, the event is designed to be a platform for showcasing cutting-edge technologies, exploring business collaborations, and addressing pressing water challenges through innovation and partnerships.

Following the resounding success of the 20th edition of the EverythingAboutWater Expo 2025, the Global Aqua Expo is envisioned as a larger, more inclusive stage where international brands and domestic players can exchange knowledge, demonstrate advanced solutions, and connect with key stakeholders.

From 6–8 August 2026 at Hall No. 1, Pragati Maidan, New Delhi, the event will feature global pavilions, live demonstrations, networking opportunities, and knowledge-sharing sessions—making it a must-attend gathering for everyone working towards a water-secure future.

Why Delhi, India?

Delhi, the capital of India, is not only the nation's political and economic hub but also one of the fastest-growing markets for water and wastewater solutions. With its strategic connectivity, world-class exhibition facilities, and proximity to government institutions, Delhi is the ideal host city for an event of this scale.

India stands at the centre of global attention when it comes to sustainable water management, and New Delhi provides direct access to:

- Government ministries and regulators driving national water policies.
- A rapidly expanding industrial and urban base in need of advanced solutions.
- International accessibility through a well-connected airport and transport network.
- **Pragati Maidan, India's most iconic exhibition venue, offering state-of-the-art infrastructure.**

Hosting the EAW Global Aqua Expo 2026 in Delhi ensures maximum participation from both Indian and international stakeholders, making it the perfect destination to connect, collaborate, and create opportunities in the global water sector.

India & Global Water Market – Needs, Growth & Opportunities

Water is one of the most critical challenges of our time, and both India and the world are witnessing an urgent need for sustainable Water and Wastewater solutions.

Global Outlook

- The global water & wastewater treatment market is projected to cross USD 1 trillion by 2030, driven by urbanization, industrial growth, and climate resilience needs.
- Rising demand for smart water technologies, desalination, and zero-liquid discharge systems is opening new opportunities for global players.
- International governments and private sectors are increasingly investing in circular economy models and sustainable water infrastructure.

India's Opportunity

- With over 1.4 billion people, India represents one of the world's largest and fastest-growing markets for water solutions.
- Government-led missions like Jal Jeevan Mission, Smart Cities and Namami Gange are fuelling massive demand for advanced technologies and services.
- The Indian water industry is expected to grow at ~9–10% CAGR, with huge potential in urban utilities, rural access, industrial wastewater and smart water management.
- Partnerships with housing societies, municipal boards and industries are creating new opportunities for global players to enter and expand in India.

Why Exhibit?

EAW Global Aqua Expo 2026 offers exhibitors a unique opportunity to:

1. **Connect with Decision-Makers**
Meet industry leaders, government authorities, municipal bodies, and global buyers driving investments in the water sector.
2. **Showcase Cutting-Edge Technologies**
Present your innovations and solutions to an international audience actively seeking sustainable and cost-effective water management systems.
3. **Explore Business Opportunities**
Tap into India's fast-growing USD 20+ billion water sector and access potential collaborations, joint ventures, and new market entry points.
4. **Strengthen Your Brand Presence**
Position your company as a thought leader and trusted partner in one of the world's most dynamic water markets.
5. **Build Long-Term Partnerships**
Network with stakeholders across the value chain – from policymakers and urban planners to industrial players and NGOs.

Be part of India's water revolution and showcase your solutions on a global stage!

Exhibitor Profile

The EAW Global Aqua Expo 2026 is open to the entire spectrum of the water and wastewater industry. From manufacturers and technology providers to distributors and system integrators, the expo provides a platform for everyone involved in delivering water solutions.

Exhibitor categories include:

1. Water Purification & Treatment Solutions

- Manufacturers of RO, UV, UF, nanofiltration, and hybrid systems
- Alkaline & ionized water system providers (domestic & commercial)
- Smart purification systems with IoT, AI & real-time monitoring
- Low-cost and rural solutions for underserved communities

2. Industrial & Municipal Water Management

- EPC companies & system integrators for turnkey water/wastewater projects
- Industrial water treatment solutions – effluent treatment, cooling towers, boilers, process water
- Municipal corporations & urban utilities – water distribution & sewage treatment technologies
- Manufacturers of pumps, valves, pipes, and membranes

3. Wastewater Recycling & Sustainability

- Zero-liquid discharge (ZLD) systems
- Decentralized wastewater solutions
- Recycling & reuse technologies
- Energy-efficient & eco-friendly systems

4. Dealers, Distributors & Channel Partners

- Domestic & commercial purifier dealers/distributors (including alkaline/ionized water dealers)
- OEM suppliers of components, filters, membranes, cartridges & spare parts
- Importers & exporters of water treatment systems

5. Bottled Water & Packaged Solutions

- Alkaline, ionized and mineral water brands
- Bottled water plant manufacturers & franchise operators
- Water vending machines & dispensers
- Packaging & bottling equipment suppliers

6. Smart Technologies & Digital Solutions

- Water quality testing devices & labs
- Smart metering & water efficiency monitoring systems
- AI & predictive maintenance technologies
- Leak detection & pipeline monitoring solutions

7. Consultants, Services & Institutions

- Engineering consultants & project management firms
- Research institutions & universities
- NGOs & social enterprises working in water & sanitation
- Certification & standards agencies (BIS, WHO, ISO, etc.)

Visitor Profile

The EAW Global Aqua Expo 2026 is designed to attract a wide spectrum of visitors from across industries, institutions, and government bodies. Whether you are a buyer, policymaker, or business leader, the expo offers insights and connections for all stakeholders who depend on safe, sustainable, and efficient water solutions.

1. Business & Industry Buyers

- Food & Beverage Industry – breweries, soft drinks, dairy, packaged food & beverages
- Pharmaceuticals & Healthcare – hospitals, laboratories, medical device manufacturers
- Textiles & Leather – dyeing, washing, and effluent-heavy industries
- Power & Energy – thermal power plants, renewable energy water needs
- Oil & Gas, Chemicals & Petrochemicals – process water & wastewater management
- Electronics & Semiconductors – high-purity water for manufacturing
- Mining, Steel & Heavy Industries – industrial water consumption & wastewater reuse
- Manufacturing Units and Industries – All other manufacturing industries

2. Water Sector Stakeholders

- Dealers, distributors & franchisees of domestic and commercial water purifiers (including alkaline & ionized water systems)
- Drinking water & bottled water entrepreneurs
- Housing societies & real estate developers seeking centralized water purification systems
- System integrators, EPC contractors & OEM buyers
- Agriculture & Irrigation stakeholders using water-efficient technologies

4. Wellness, Lifestyle & Hospitality

- Healthcare & wellness centers adopting alkaline & ionized water solutions
- Hotels, resorts & restaurants requiring safe water for guests & operations
- Fitness centers spas & gyms promoting healthy water consumption

3. Government & Institutions

- Central & State Government departments (Jal Shakti, Urban Development, Pollution Control Boards, Jal Jeevan Mission, Smart Cities Mission)
- Municipal corporations & water utilities
- Public-private partnership (PPP) stakeholders
- Standardization & certification agencies (BIS, WHO, ISO, etc.)
- Defense & railways looking for large-scale water management solutions
- growing water sector

5. Knowledge, Research & Finance

- Research & academic institutions working on water technology
- NGOs & social organizations focused on sustainability & safe drinking water
- Investors, venture capitalists & entrepreneurs exploring opportunities in India's growing water sector

Knowledge & Learning Sessions

EverythingAboutWater Global Conclave 2026

Date: 6 August 2026

The EverythingAboutWater Global Conclave 2026 will serve as a premier knowledge-sharing platform, bringing together industry leaders, policy makers, experts, innovators, and decision-makers from across the

globe. This one-day conference will focus on the emerging challenges, breakthrough technologies, and sustainable solutions in the field of water and wastewater management.

Participants will gain valuable insights into global best practices, regulatory frameworks, market trends, and investment opportunities, while also exploring how innovation and collaboration can drive progress in the water sector. With thought-provoking keynote addresses, engaging panel discussions, and case study presentations, the conclave is designed to inspire action and spark partnerships that can shape the future of water management.

Advance Level Training on Wastewater Treatment Design, Calculation & Troubleshooting

Date: 7 August 2026

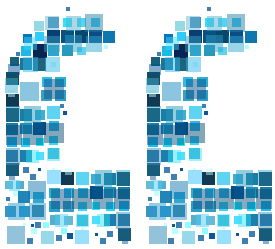

This intensive, hands-on training program is tailored for engineers, plant operators, consultants, and industry professionals who wish to deepen their technical expertise in wastewater treatment. The training will provide in-depth knowledge of system design principles, detailed calculation methods, and effective troubleshooting techniques required for modern wastewater treatment plants.

Key highlights include:

- Detailed sizing of coagulation, flocculation, and clarification systems
- Designing of filtration and chemical dosing units
- Softener system design and application
- Reverse Osmosis (RO) membrane system design (manual and computerized using industry software tools)
- Real-world troubleshooting strategies for operational challenges

Led by renowned industry experts and trainers, this program ensures participants walk away with practical knowledge, technical confidence, and applied skills that can be directly implemented in their projects.

Hear from Our Previous Participants

It was an honor for VA Tech Wabag to participate in Water Expo 2025 as the Sustainability Partner. The event served as a remarkable platform to exchange ideas, showcase innovations, and engage with global leaders in the water sector. Our Head of Sustainability, Dr. Bhushan Pachpande, was privileged to deliver a keynote session on Circularity in water for Sustainability, reaffirming Wabag's commitment to building a Cleaner, Greener, Bluer planet for future. We sincerely thank EverythingAboutWater (EAW) for organizing such a well-curated event that inspires collaboration and drives the water industry forward.

EverythingAboutWater Expo 2025 was a very good platform for showcasing advance solutions in area of Harmful Algal Blooms monitoring using FlowCam (Flow Imaging Microscopy). Many visitors to our stall were amazed to see offerings by Yokogawa in area of Drinking water health monitoring. This expo gave us first opportunity to connect with policy makers, Scientists and collaborators in area of Drinking Water monitoring. In fact one/two enquiries were made from fellow solution providers as well. We will look forward to associate further with Expo team.

Exhibiting at 20th Edition of Everything About Water was a fantastic opportunity for us to connect with industry professionals, showcase our latest bottling machines, and gain valuable exposure. The event was wellorganized, with high-quality attendees and meaningful interactions. We're proud to have been part of it and look forward to future editions.

Participating in the 20th Everything About Water Expo 2025 was a valuable experience for NICO Nanobubble India Co. and IOTA WATER. The event was seamlessly organized and provided an excellent platform to showcase our indigenous nanobubble technology while engaging with key stakeholders and industry leaders. We sincerely thank the EAW team for curating such a worldclass forum for innovation, collaboration and progress in the water sector.

Exhibiting at 20th Edition of Everything About Water was a fantastic opportunity for us to connect with industry professionals, showcase our latest bottling machines, and gain valuable exposure. The event was wellorganized, with high-quality attendees and meaningful interactions. We're proud to have been part of it and look forward to future editions.

A wonderful experience at EAW Expo Delhi 2025! Great to see the Indian market's response to international participants like Water Offsets Ltd (UK). We connected with many potential collaborators and clients—looking forward to what's ahead!

Grateful to be part of Everything About Water Expo 2025! The event strengthened our Mediqua brand presence across India, expanded our network, and inspired new ideas for the future.

Solinas was glad to exhibit at Everything About Water, showcasing our water and sanitation solutions while connecting with experts tackling water and wastewater challenges. A valuable experience—we look forward to future editions!

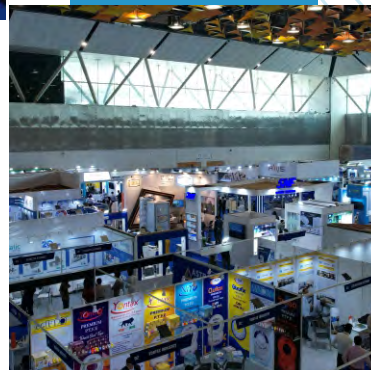

Driving Innovation in Water Quality Monitoring for a Sustainable Future
We are grateful to the Everything About Water exhibition team for the opportunity to showcase our innovative water quality monitoring solutions. The event was a valuable platform to connect with industry leaders, explore emerging trends, and highlight the importance of continuous, real-time monitoring for safe and sustainable water management. Our cutting-edge technology reflects our commitment to improving water infrastructure, supporting environmental stewardship, and building a cleaner, safer future for all.

Our participation at the Water Expo'25 was a valuable experience. The event was well-organized and provided us with an excellent platform to showcase our offerings, engage with prospective clients, and network with industry peers. We appreciated the support from the organizing team and the overall arrangements at the venue. Going forward, we believe that adding more promotional activities and interactive opportunities for exhibitors could further enhance visitor engagement. Overall, the exhibition was successful for us, and we look forward to participating in future editions.
