Securing Operations & Enabling Success in Complex Environments

Welcome to Ribat

Ribat International specialises in providing robust physical security solutions, tailored risk advisory, and ISO-aligned compliance support throughout Libya. We integrate tactical expertise, real-time operational risk analysis, and structured security practices to safeguard assets, personnel, and operations in dynamic environments.

With a strategic operational focus across Libya, Ribat delivers mobile security patrols, static security operations, and

protective services specifically designed to address local threats. Our team comprises seasoned professionals, including former military operatives, compliance specialists, and security risk consultants, experienced in complex operational settings.

Our structured security systems **align with ISO 31000, ISO 31030, ISO 18788, PSC.1, and ICoCA standards,** ensuring our services meet rigorous international benchmarks while

remaining adaptable to the operational realities of Libya.

From mobile patrols and secure transportation to static site security and incident response, we provide embedded support and practical solutions that enhance safety, operational integrity, and compliance under pressure.

Ribat is committed to operational effectiveness delivering tested security solutions, tangible results, and direct, actionable support.

Company **Overview**

Ribat is a Libya-based security provider specialising in protective security, operational risk management, and structured compliance solutions. Leveraging deep local expertise and risk analysis-driven strategies, we deliver ISO-aligned capabilities tailored specifically for Libya's complex operational landscape.

Operational **Expertise**

Ribat capabilities deliver targeted, measurable results through Libya-specific expertise and practical integration of global standards. Our differentiators lie in tactical execution, local knowledge, and compliance systems designed explicitly for Libya's operating context.

Protective Security

▶ **Static Security:** Site-specific guarding built around local threat profiles and community dynamics. Personnel selection, routines, and escalation protocols are tailored to each location's risk exposure.

▶ **Mobile Security:** Convoy support and response teams operating across high-risk routes, coordinated via live risk analysis and local sources.

▶ **Protective Planning:** Route analysis, advance team deployment, and contingency preparation for secure movement of personnel and assets.

Risk Management & Threat Analysis

▶ Real-time updates drawn from local sources, not generic data sets, ensuring direct operational relevance and actionable insights.

▶ Risk assessments customised specifically for Libya's nuanced threat landscape, delivering targeted, practical mitigation measures instead of generic strategies.

Compliance & Advisory

▶ Development of compliance systems explicitly structured around international standards, but uniquely calibrated for operational realities specific to Libya.

▶ Active compliance management with built-in monitoring, audit readiness, and adaptive policy development, ensuring regulatory confidence and operational resilience under scrutiny.

Vision & **Mission**

Strategic Intent & Operational Purpose

Vision

To become Libya's most trusted security provider, delivering integrated protection driven by deep local understanding and global best practice. From initial engagement through safe return, Ribat ensures consistent operational support, enabling clients to operate with confidence, clarity, and genuine peace of mind.

Mission

At Ribat, our mission is clear: Deliver tactical security solutions shaped by Libya's operational realities and grounded in local expertise and global standards.

We commit to:

▶ **Comprehensive Security Coverage:** End-to-end protection covering every operational stage, removing uncertainty and providing total operational coherence.

▶ **Precision Standards Alignment:** Explicit integration of international standards—ISO 9001, ISO 18788, PSC.1, ISO 31000, ISO 31030, ICoCA—tailored specifically to Libya's risk environment for absolute compliance assurance.

▶ **Embedded Operational Integrity:** Clearly defined policies, stringent ethical oversight, and rigorous accountability built directly into our daily operational practice.

▶ **End-to-End Operational Advisory:** Practical, ongoing support from initial policy and system design to audit readiness, operational training, and continuous compliance refinement.

▶ **Local Mastery & Global Best Practice:** Deep local understanding backed by global standards and strategic local networks, ensuring targeted solutions and actionable outcomes.

Ribat delivers more than just security. We provide structured, operationally proven solutions that directly address Libya's unique complexities, allowing clients to focus confidently on their core mission.

Our **Team**

Ribat's operational teams combine specialist military experience, deep compliance insight, and tailored capabilities precisely aligned with Libya's security landscape.:

▶ **Former Military Specialists:** Tactical leaders experienced in North African operational theatres, uniquely proficient in navigating Libya's complex security dynamics, cultural sensitivities, and threat patterns.

▶ **Compliance & Standards Experts:** ISO-accredited consultants specialised in designing Libya-specific management frameworks, explicitly structured to meet local regulatory and international compliance requirements.

▶ **Risk Analysts:** Field-tested analysts delivering Libya-focused, real-time threat reporting, directly informed by local networks, providing actionable insights rather than generic assessments.

Analysis-Led
Approach

Structured Risk Mitigation: ISO Standards in Practice

Ribat employs structured risk mitigation frameworks precisely aligned with ISO standards, explicitly designed to counter the specific operational threats found in Libya. Our solutions **directly integrate ISO 31000 (Risk Management), ISO 31030 (Travel Risk), and ISO 18788/PSC.1 (Security Operations Management) into actionable procedures** that protect personnel and maintain operational momentum under Libya's distinct conditions.

Integrated, Insight-Driven Security in Libya

Ribat delivers structured risk mitigation, real-time local insights, and dynamic compliance management tailored explicitly for Libya's complex operational environment. Our ISO-aligned frameworks, proactive threat monitoring, and continuous compliance oversight ensure precise threat management, operational continuity, and demonstrable regulatory assurance.

Localised, Operationally Relevant Real-Time Operational Awareness

We draw on trusted local networks embedded across Libya to convert raw data into accurate threat forecasts. Our real-time situational analysis is tailored to your operations, enabling pre-emptive, decisive action against emerging risks.

"Local Insight, Global Standards: Securing Libya's Operations"

Active Compliance Assurance

Compliance at Ribat is dynamic and operational,. We embed ISO 9001 quality standards and ICoCA ethical commitments directly into operational decision-making and daily practices. Our dedicated compliance team continuously audits procedures, identifies improvement areas in real-time, and ensures immediate policy adaptation **providing tangible evidence of compliance that withstands external scrutiny.**

03 Operational Outcomes
- ▶ Proactive Security & Personnel Protection
- ▶ Consistent Operational Continuity
- ▶ Reliable Compliance & Assurance

02 Operational Integration
- ▶ Structured Risk Mitigation
- ▶ Real-Time analysis (Trusted Local Sources, Online Platforms)
- ▶ Active Compliance Assurance (Continuous Audits)

01 Foundational Inputs
- ▶ Local Networks & Field Analysts
- ▶ Real-Time Audit, Monitoring & Policy Refinement
- ▶ Direct Integration of ISO & International Standards

03

02

01
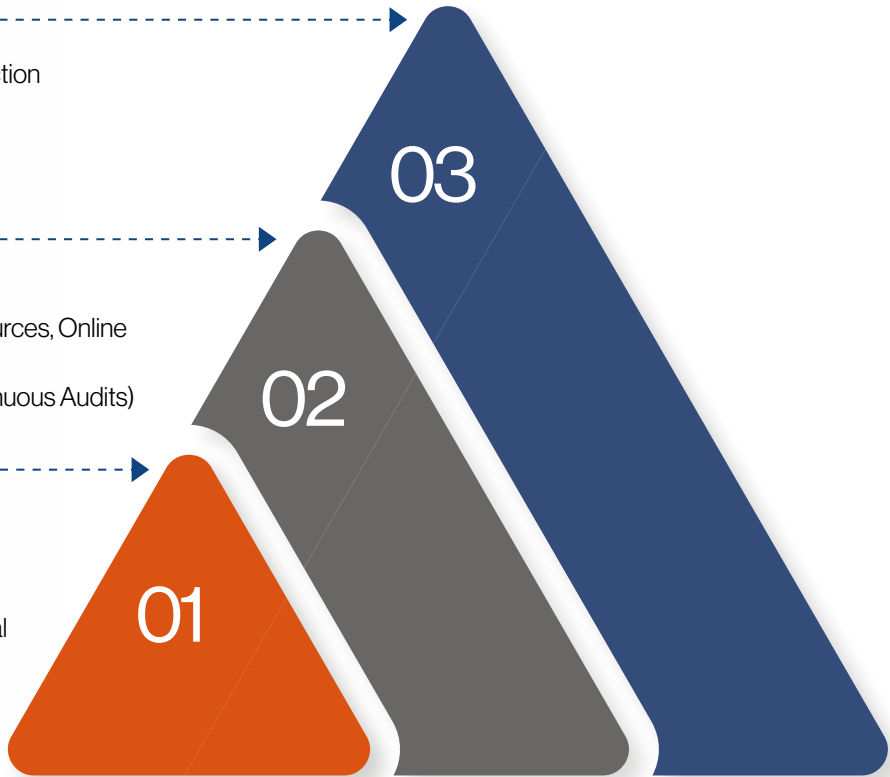

Ribat unifes rigorous standards, on-the-ground awareness, and active compliance into a single, structured operational moded, purpose-built for Libya.

At Ribat, local insight and compliance actively drive operational decisions. Practical tools that deliver genuine security outcomes.

Core Service Offerings

Integrated Security Capabilities - Structured for Libya's Operational Realities

Ribat provides a fully integrated suite of security services, purpose-built for Libya's challenging environment. Our structured offering combines protective, advisory, and compliance solutions into one coherent, insight-led framework. Clients can select individual components or adopt a comprehensive, turnkey solution, each precisely aligned to operational needs and ISO standards.

Core Services Include:

▶ Travel Risk Management

▶ Protective, Static & Maritime Security

▶ Security Risk Consultancy & Advisory

▶ Capacity Building & Operational Training

Start

Stage 1 - Pre-Travel Risk Planning
▶ Libya-specific threat assessments
▶ Detailed operational site analysis
▶ Tailored risk mitigation strategies (ISO 31030 Aligned)

Stage 2 - Secure Arrival & Airport Liaison
▶ Dedicated security liaison teams
▶ Managed immigration procedures
▶ Secure airport-to-operation transition

Stage 3 - Real-Time Threat Monitoring
▶ Dedicated security liaison teams
▶ Managed immigration procedures
▶ Secure airport-to-operation transition

Stage 6 - Management & Compliance
▶ Implementation of ISO 18788, PSC.1 frameworks
▶ Active compliance audits & policy refinement
▶ Risk assessments (ISO 31000)

Stage 5 - Static Security Operations
▶ Close protection (SOP-driven)
▶ Static security & perimeter defence
▶ Comprehensive mobile patrols

Stage 4 - Secure Transportation
▶ Information-informed secure transport
▶ Low-profile vehicles to convoy solutions
▶ Locally-experienced drivers and teams

Stage 7 - Emergency & Crisis Management
▶ Rapid, predefined incident response
▶ Crisis containment and stability
▶ Tailored emergency preparedness (ISO 22301)

Stage 8 - Training & Capacity Building
▶ Hostile Environment Awareness Training (HEAT)
▶ Compliance & human rights scenario training (ICoCA/VPSHR)
▶ Practical drills & readiness exercisesPractical drills & readiness exercises

Stage 9 - Secure Exit & Debrief
▶ Secure movement to departure points
▶ Structured post-operation debrief
▶ Continuous improvement feedback loop

Travel Risk Management (ISO 31030)

Ribat provides Libya-specific, insight-driven travel risk management, precisely designed to reduce vulnerabilities, maintain operational momentum, and enhance resilience throughout the entire travel lifecycle.

▶ **Pre-Travel Risk Planning:** Tailored Libya-focused risk assessments, detailed operational site analyses, and explicit mitigation strategies, ensuring your personnel are fully briefed, prepared, and equipped to manage Libya's specific threats before deployment.

▶ **Airport Liaison & Secure Entry:** Rapid in-country processing with dedicated security liaison teams managing all aspects of airport transit, immigration support, and secure onward travel, dramatically reducing initial vulnerability and operational friction.

▶ **Real-Time Monitoring & Tracking:** Libya-focused local networks deliver continuous, locally-sourced updates paired with active personnel tracking, providing not just information but genuine operational insight that directly enables pre-emptive threat response.

▶ **Secure Transportation Solutions:** Discrete, analysis-informed transport options ranging from low-profile vehicles to full convoys teams, planned and executed by locally experienced drivers and security teams, ensuring safe, reliable movement at every stage.

▶ **Emergency Response & Crisis Management:** Rapid, structured responses to critical incidents with pre-defined protocols explicitly tailored to Libya's operational reality, ensuring incidents are rapidly contained and operational stability is quickly restored.

Protective, Static & Mobile Security

Ribat delivers fully integrated protective solutions, static, mobile, and protective planning, that secure assets and personnel across Libya's diverse threat environment.

▶ **Close Protection & SOP Implementation:** Expertly trained close protection teams operate under rigorously tested Standard Operating Procedures tailored for Libya's unique threat landscape, ensuring discreet, confidential, and consistently reliable protection.

▶ **Static & Mobile Patrols:** Tailored security solutions from single-guard posts and vehicle patrols to fully equipped mobile response units. Comprehensive dynamic security management including site hardening, perimeter defences, access control systems, and integrated technical surveillance.

▶ **Site Security & Secure Escorts:** Professional, structured site security management integrated with secure escort services, ensuring operational continuity, facility integrity, and personnel safety even in the most complex Libyan operating contexts.

Compliance & Standards

Ribat compliance frameworks actively embed international standards into practical operational procedures. Our systems deliver verifiable operational outcomes explicitly calibrated to Libya's risk landscape and regulatory environment.

Security Risk **Consultancy & Advisory**

Ribat consultancy provides targeted, pragmatic guidance, embedding internationally recognised security frameworks into real operational practice specifically suited for Libya's dynamic threat environment.

▶ **Operational Security Management (ISO 18788, PSC.1):** Explicit design and practical implementation of security management systems specifically calibrated for Libya, ensuring robust operational accountability, measurable performance, and demonstrable compliance under scrutiny.

▶ **Risk Assessments & Security Audits (ISO 31000):** Detailed, locally-informed risk assessments and rigorous audits, directly identifying operational vulnerabilities unique to Libya's environment, providing clear, actionable recommendations rather than generic insights.

▶ **Crisis & Emergency Preparedness (ISO 22301):** Explicitly tailored emergency preparedness and continuity strategies that actively account for Libya-specific threats, enabling your organisation to rapidly respond, adapt, and sustain operations through any disruption.

Capacity Building & **Operational Training**

Ribat training solutions directly enhance operational capability, delivering practical, Libya-specific competencies and clear compliance assurance, preparing personnel for real operational threats rather than theoretical scenarios.

▶ **Security & Risk Awareness Training (HEAT):** Libya-focused Hostile Environment Awareness Training (HEAT) programs grounded in realistic scenarios, practical exercises, and local threat context, equipping personnel with genuinely usable skills for Libya's operational reality.

▶ **Human Rights & Compliance Training (ICoCA/VPSHR):** Scenario-based, practical human rights training precisely aligned with ICoCA standards and Voluntary Principles on Security and Human Rights (VPSHR), ensuring ethical, compliant security practices embedded directly into everyday operations.

▶ **Scenario Exercises & Compliance Drills:** Regularly executed scenario exercises and compliance drills explicitly modelled on Libya-specific threats and operational challenges, actively reinforcing readiness, compliance effectiveness, and measured, decisive threat responses.

"Securing Every Step: From pre-travel planning and secure arrival, to continuous monitoring, protective transport, and rapid crisis response, comprehensive protection tailored specifically for Libya"

01 Security **Management Systems**

▶ **ISO 31000 (Risk Management):** Structured risk identification, precise threat assessment, and targeted mitigation measures tailored explicitly to Libya's operational context.

▶ **ISO 18788 & PSC.1 (Operational Security):** Clearly documented and audited security procedures, ensuring operational consistency, accountability, and measurable effectiveness during real-world operations.

02 Duty of **Care**

▶ **ISO 31030 (Travel Security):** Fully integrated travel risk protocols protecting personnel at every operational stage, providing clear accountability, and enabling compliant, secure mobility.

03 Business **Continuity**

▶ **ISO 22301 (Continuity Management):** Operationally-tested continuity plans designed for rapid response, efficient crisis management, and reliable recovery from disruptions, explicitly aligned to local operational threats.

04 Information **Security**

▶ **ISO 27001 (Data Protection):** Robust management of operational, client, and personnel data, rigorously protecting information against breaches, cyber threats, and operational vulnerabilities.

05 Environmental & **Occupational Management**

▶ **ISO 14001 (Environmental Sustainability):** Proactive environmental management procedures minimising ecological impacts, actively promoting sustainability, and ensuring responsible operational practices.

▶ **ISO 45001 (Occupational Safety):** Comprehensive workplace safety systems, proactively identifying occupational hazards, ensuring rigorous safety standards, and maintaining full compliance with duty-of-care obligations.

06 Social **Responsibility**

▶ **ISO 26000, UNGPs, VPSHR, ICoCA:** Clearly structured, practically implemented ethical and human rights frameworks. Actively managing conduct, accountability, and sustainable operations through clearly auditable compliance processes.

Operational Excellence

Ribat operational excellence goes beyond standard compliance. Our processes actively reinforce accountability, demonstrable transparency, and localised social responsibility, delivering tangible outcomes tailored explicitly to Libya's operational environment.

Internal Audits & Compliance

Ribat uses a structured, proactive auditing programme aligned explicitly with ISO 9001, uniquely tailored to Libya's complex regulatory landscape. Unlike generic compliance checks, our internal audits provide detailed operational recommendations and actively drive continuous security performance improvements.

Continuous Improvement

we proactively drive measurable enhancements through structured ISO 9001 improvement cycles. Lessons learned from real-time operational feedback inform immediate policy adaptations, reducing risk exposure and tangibly enhancing client protection.

Ethical Governance

Ribat governance practices are actively modelled on OECD and DCAF-ICRC guidelines. Unlike passive policy adherence, our approach features explicit ethical decision-making frameworks that visibly demonstrate operational integrity, ensuring every action withstands scrutiny and aligns clearly with global ethical benchmarks.

The Ribat Operational Excellence Framework below provides a clear, visual representation of our structured and fully integrated approach. It actively embeds rigorous quality standards, ethical governance principles aligned with international best practices, and meaningful community engagement directly into daily operations. This proactive integration ensures transparency, accountability, and consistent performance, delivering measurable and verifiable results precisely tailored to address the unique operational complexities and challenges of Libya's security landscape.

Ribat sets itself apart by proactively managing excellence, clearly demonstrating ethical leadership, and delivering tangible, auditable outcomes that reinforce client confidence and operational credibility in Libya.
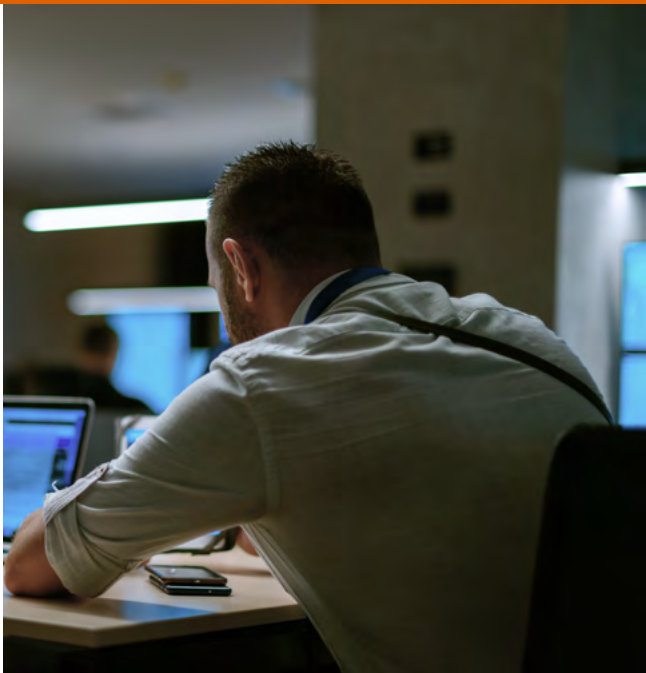

Social Monitoring & Community Integration

Our social monitoring actively involves direct local engagement and systematic grievance management tailored explicitly for Libyan communities. Operational impacts are transparently tracked, grievances receive timely, verifiable resolutions, and continuous community engagement is leveraged to build local trust and operational legitimacy.and aligns clearly with global ethical benchmarks.

Operational Excellence in Action: Accountability, Transparency, and Integrity

01: Internal Audits & Compliance
▶ Proactive ISO 9001 Audits
▶ Libya-specific Regulatory Checks
▶ Detailed Operational Recommendations

02: Continuous Improvement
▶ Structured Feedback Cycles
▶ Real-Time Performance Insights
▶ Immediate Policy Adaptation

04: Social Monitoring & Community Integration
▶ Active Local Engagement
▶ Transparent Grievance Resolution
▶ Ongoing Community Trust-building

03: Ethical Governance
▶ OECD, DCAF-ICRC Alignment
▶ Active Ethical Decision-Making
▶ Demonstrable Operational Integrityns.

Why Choose **Ribat**?

Distinct **Operational Advantages**

Tailored Local Insight

Our solutions are directly informed by local expertise and ground-level insight, specifically addressing Libya's security environment.

Actionable Data for Operational Decision-Making

Our real-time insight capability provides immediate operational clarity and precise threat mitigation, reducing uncertainty and enhancing client preparedness.

Integrated Service Delivery

Ribat offers cohesive protective, advisory, and compliance services within a single structured framework. Clients benefit from seamless coordination, eliminating operational gaps.

Ribat provides security solutions specifically built for Libya's operational environment. Our services combine explicit ISO compliance, direct local insight, and scalable adaptability to deliver measurable, reliable security outcomes.

Credible **Certification Highlights**

Active Compliance Management

Our adherence to international standards such as ISO 31000, ISO 31030, ISO 18788, PSC.1, ISO 22301, ISO 27001, ISO 14001, and ISO 45001 is practically integrated into our daily operations, regularly verified through transparent auditing.

Transparent Ethical Governance

We align clearly with international ethical guidelines, including OECD, DCAF-ICRC, and ICoCA. Our ethical commitments are actively managed, demonstrable, and auditable.

Operational Consistency

Proven ability to maintain consistent compliance and operational effectiveness even under complex conditions, providing reliable assurance rather than just certification.

Turnkey Security Solutions Tailored Specifically for Libya

Ribat designs and delivers complete, turnkey security solutions that integrate protective services, local insight, compliance management, and operational training. From initial assessment through to full implementation, we simplify complex operational requirements—enabling clients to focus on their mission with confidence.

Ribat delivers structured security solutions explicitly tailored for Libya's operating environment. **Our distinct combination of local insight, international compliance standards, and operational agility ensures clients are comprehensively protected.**

Choosing Ribat means partnering with a security provider focused solely on tangible results, actionable insights, and verifiable compliance. Our proactive approach directly addresses operational risks unique to Libya, enabling organisations to confidently navigate uncertainties and achieve clear operational outcomes.

"Choosing Ribat means selecting clear operational advantages, credible compliance assurance, and proven agility specifically tailored to Libya's complex environment".

Operational **Agility**

Rapid Scalability

Ribat solutions are designed explicitly for quick adaptability, providing immediate responsiveness to changing security conditions in Libya.

Flexible Customisation

Clients can precisely tailor our modular services to match their specific operational needs, ensuring each security solution remains relevant, effective, and agile.

Adaptive Risk Management

Our approach to risk is proactive, continuously adjusting through real-time insight and strategic policy refinement to effectively respond to Libya's evolving security challenges.
