

Answer Book – Spelling with Dyslexia

Note to Educators and Parents

Lesson 1 has been partially completed in the book to serve as an example for students/children. This **Answer Book** includes only the answers for the following activities:

- **Fill-in-the-Blanks**
- **Reading Comprehension Questions**
- **Synonyms and Antonyms**
- **Rhyming Words and Hidden Words**

These specific sections are included because they may require additional support when reviewing or correcting.

Activities such as **word searches and crosswords** are intentionally left without provided answers. With only six words per lesson, these puzzles are designed to be both accessible and engaging. They offer an excellent opportunity for students to think critically and apply their learning independently.

Each crossword includes the actual meaning or definition of the target words as clues, making it easier for students to understand and reinforce the vocabulary while completing the puzzle. This encourages deeper learning and builds confidence as children connect words with their meanings.

Please note that some crosswords may contain a few blank columns due to word arrangement constraints—this is completely normal and does not affect the overall completion of the activity.

Encourage students to take their time, explore different possibilities, and enjoy the process of discovery. These moments of challenge are where real learning happens!
