

Tailored AI Training for Your Business

What We Offer

Bespoke sessions
of trending AI
topics

Face-to-face
discussion of
how AI can help

Real-world use
cases

Follow-up support
for projects and
application

ABOUT US

We are a team of academics from the University of Birmingham, globally recognised for top-tier computer science research.

We work at the forefront of AI, developing cutting-edge approaches to solve real-world industrial challenges.

Selective Topics

- Predictive Analytics
- Large Language Models (e.g. ChatGPT, Copilot)
- Computer Vision
- Cyber Security
- AI-Driven Software Engineering (e.g. Copilot Coding)
- Industrial Optimization
- AI Regulations and Ethics

Our Strengths

We are experienced in both technology and education.

Our sessions are designed for non-technical professionals.

We offer flexible formats to suit your busy schedules.

We provide follow-up support.
