Vessel Care Solutions (VCS)

Global Marine Electronics & Automation: New & Refurbished Excellence

Vessel Care Solutions (VCS) is a premier Marine Electronics Service provider based in **Mumbai**. We are built on the principle of providing high-performance, one-stop solutions for **Navigation, Communication, and Automation** equipment. Whether your fleet requires the latest cutting-edge technology or reliable support for existing systems, VCS delivers quality service with a focus on cost-efficiency and global reach.

Our mission is to support **Ship Owners** and **Management companies** through the entire lifecycle of their equipment—from 24/7 remote troubleshooting and root-cause analysis to global service attendance and the procurement of both **New and Refurbished spare parts**. Our Dual-Supply Strategy: New & Refurbished

At VCS, we provide a flexible procurement model designed to suit your vessel's specific technical needs and annual budget.

1. New Equipment & Retrofit Solutions

- **Authorized Quality:** Through our global network and agreements with major OEMs (including Furuno, JRC, Beijing Highlander, Danelec, Raytheon, and Sperry Marine), we supply the latest NavCom technology.
- **Certified Installations:** Our trained and certified engineers manage full retrofit projects, ensuring all new equipment is installed to industry standards with Guaranteed Certification and full manufacturer warranties.

2. Specialized Refurbished & Obsolete Support

- **The Alang Advantage:** We are industry leaders in sourcing high-quality, well-tested refurbished equipment directly from the Alang Shipyard (Bhavnagar).

Legacy System Support: We specialize in supporting "**obsolete**" equipment that is no longer in production. This allows owners to maintain older vessels without the immediate need for expensive, full-system replacements.

- **Rigorous Testing:** Every refurbished part undergoes a strict quality-check process. We provide warranties on refurbished units based on the specific requirements of the case, ensuring peace of mind and operational reliability.

Key Service Offerings

- **Global Availability:** To ensure immediate support, we maintain extensive stocks of both New and Refurbished parts in **India, Dubai, and Singapore**.
- **24/7 Remote Technical Support (FOC):** Our technical team is available around the clock to provide basic troubleshooting steps to ship staff on a Free of Cost basis, helping to resolve issues remotely and save on attendance costs.
- **Comprehensive Maintenance (AMC):** We offer specialized Annual Maintenance Contracts and packages for **GMDSS, VDR, and Gyro overhauls, including X & S Band Radar servicing and magnetron replacements**.
- **Mechanical & Automation Services:** Beyond electronics, we supply and service main/auxiliary engine components, gearboxes, pumps, compressors, and hydraulic control systems.

Product Range (Available New & Refurbished)

- **Navigation:** RADAR, ECDIS, Gyro Compass, GPS, Speed Log, Autopilot, Echosounder.
- **Communication:** GMDSS, Navtex, AIS.
- **Mechanical:** Main Engine Spares, Valves, Pumps, and Deck Machinery.

Vessel Care Solutions—Bridging the gap between Innovation and Sustainability.

(VCS) provides solutions for various types of vessels

Electric motors for main and auxiliary propulsion, firefighting pumps, winches, and more

- Electric motors for main and auxiliary propulsion, firefighting pumps, winches, and more
- Water-cooled frequency inverters for main and auxiliary propulsion
- Alternators for main, emergency, auxiliary, port, and shaft-mounted diesel generator sets
- ESS - Energy Storage System
- Main and emergency electrical panels, low- and medium-voltage
- Distribution panels, demarcs, and shore power
- Power generation management systems—EMS and PMS
- Alarm monitoring systems – AMS
- Automation system for tank loading and unloading control (solid or liquid bulk)
- Telemetry and vibration monitoring systems for assets with remote supervision
- Integrated electrical room
- Specialized paints for hulls, tanks, and other areas of the vessel Low- and medium-voltage transformers
