

**MONSTER  
PLATE**

**3" Insulation  
Fastening Plate**

**MADE IN THE USA**

## Technical Product Information Sheet

### Description:

Monster Plate 3" Insulation Fastening Plates are by design an all purpose, exceptionally strong holding means of attaching roofing insulation as required by most manufacturers. We have designed and produce our plates to be the strongest on the market. It is well suited to work with many varieties of 1/4" application specific fasteners. These carbon steel plates are Galvalume coated to meet corrosion resistance requirements.

### Application:

Place Monster Plate insulation plates over insulation as specified by the manufacturer and any necessary code or engineering requirements. Position with the outer most flat flange down on the insulation. Fasten plates to the roof deck using the appropriate fastener.

- ◀ Tighten securely. Avoid overtightening. Overtightening may cause plate deformation.
- ◀ To be used for intended purpose only

### Packaging:

1000 per pail, approx. weight 40lb

## Product Specifications

<b>Material</b>	AZ50 Galvalume Coated Carbon Steel Fulfills FM 4470 Corrosion Resistance Criteria
<b>Nominal Thickness</b>	0.019"
<b>Diameter</b>	3" (75mm)
<b>1/4" Fastener Pull Thru Resistance</b>	500lb

### Disclaimer:

*Use and proper installation is the sole responsibility of the end user. Manufacturer recommends that onsite pull-out tests and necessary inspections be performed to ensure proper installation per local codes.*
