SHERWIN-WILLIAMS®

PASSIONATE PURSUIT

Fresh mindfulness.

Vintage workmanship.

Social engagement.

And technology and materials
that seem to come from
out of this world.

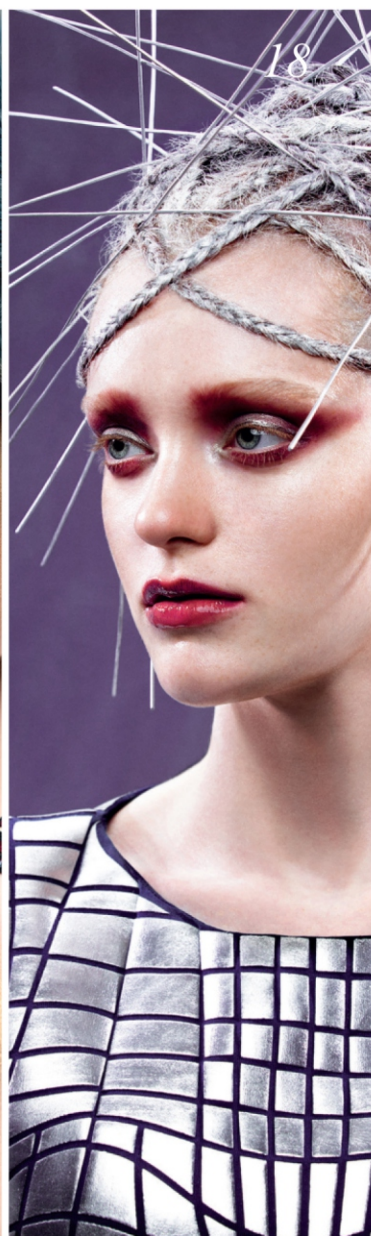

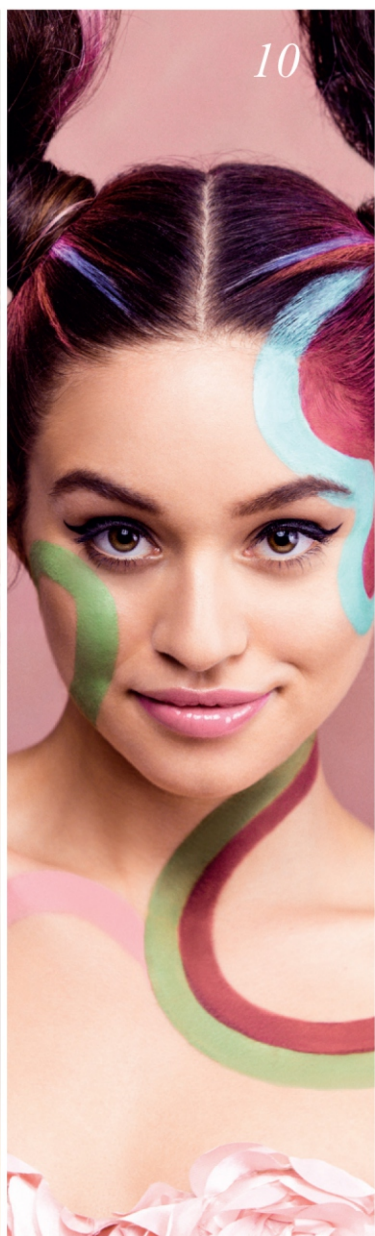

We're taking the best
of everything life has to offer
and indulging in the moment.

Prepare to come together
as we go in
passionate pursuit of
a shared color consciousness.

Interior Ideas

- Whites will visually expand a space so they are ideal for making rooms appear larger.
- Try several warm, creamy shades together to create a sophisticated look or go with soft tints for a relaxed vibe. Accent with neutral woods, tile, brick or stone and your space will feel comfortable and casual.
- If your home is built in the classic Georgian or Victorian style, choose an antique or off white in a glossy sheen to highlight period trim and molding elements.
- For modern, contemporary spaces, stunning and pure whites will offer a dramatic contrast when paired with colorful accents. Consider whites with a slight blue tone when you want to brighten up the room by magnifying sunlight.

LIGHT, DELICATE AND TRANSLUCENT

A sheer, simple aesthetic create the space we need to step into a dream - the place where our best ideas are waiting to be found.

NATURAL RUSTIC CLASSIC

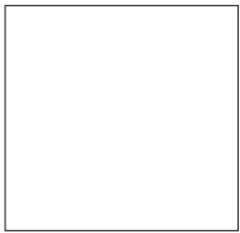

colorexpression

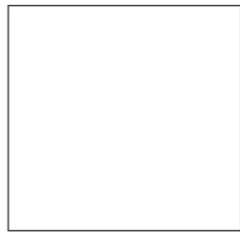

PURA VIDA

The elements that remind us to live well, be well, and stay well are vital to creating spaces to unplug. Natural materials, honed and sheer. Ancient alabaster and marble hues. Warmer grays turning to khaki and blushed neutrals. New therapies draw us to the colors of nomadic sand baths and holistic massage rooms. We're awakening from the recession, hungry for a new orderliness, ready to feed the spirit, make memories, and savor the moment.

Natural

Found extensively in both living and non-living material, browns and other natural shades are often associated with reliability, honesty, stability and wholesomeness. These colors can be used to convey a sense of masculinity and earthiness while creating a warm, comfortable environment.

MAS AMOR POR FAVOR

Meaningful change begins locally. Driven by social engagements as much as social media, we're coming together to rediscover the pleasures of intimate gatherings, garden parties, personalized outdoor weddings — along with playful indulgences like champagne towers and vintage florals. Multifamily living is back, and this palette connects across generations: dashing greens and cheeky pinks with a flower power that's as crisply modern as it is soulfully vintage.

Allure

There's a reason why the eye is usually drawn to red first. Full of excitement, passion, tenacity, flamboyance and courage, red make a strong statement. Using red suggests confidence and even a dash of danger. A spot of red in just the right place can make a room come alive.

NOUVEAU NARRATIVE

Our new industrial evolution may be small batch and grassroots, but it's built to last. Authentic 20th-century machinery is being dusted off and reconditioned as North American manufacturing re-emerges in the form of the Maker Movement. Looking to the past to inspire our future, dreamers and doers craft new aesthetics collaged from the pages of history books. Think rugged determination, olive and denim, dusky wools, and brass buttons glinting in the sunlight.

culture of curiosity

The intersection where the inner child and adult meet in surrealistic, cinematic color splash. Mischievous, vivid, purely escapist. The imagination is engaged with curiosity of tone and shade—deep fuchsia and serious navy play happily with joyful, transparent blues and yellows.

TRAJECTORY

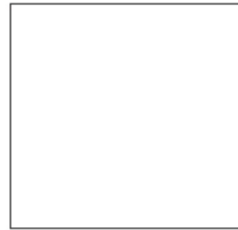

Technology's pace has us living in a constant state of wonder. The boundaries between art, science, and commerce continue to blur as increasingly powerful computer chips and extreme materials combine to expand the possible. Augmented reality, 3-D printers, drones, interiors that adapt to our bodies. Apps and sensors make everyday chores feel frictionless. The future keeps arriving, in icy blues, shimmering pewter, sophisticated plums, and other mesmerizing hues in stunning gloss finishes.

The soft Violets

We're bringing romance back with a bouquet of colors that could have been selected by Mother Nature herself. Brighter, floral-inspired accents burst forth when contrasted with neutral tones, while gray and charcoal provide a perfect backdrop to soft violets, greens and corals. It's a look rooted in vintage elegance, but updated with a stylish twist.

A Clean Slate for Creativity

There's nothing plain about white.
In fact, the Whites and Lights collection from
Sherwin-Williams® offers a range of colors
that are both expressive and inviting.

SAVING YOUR ENVIRONMENT

Your neighborhood Sherwin-Williams® paint store has low-VOC paints that have less impact on the environment and are great for your home.
Visit swgreensure.com for more information.

LIGHT SPACE

The foundation for a beautiful home.

advanced color matching system

Get the fastest, most accurate color-matching possible with our exclusive, advanced computerized technology.

While most color systems produce formulas to achieve a close match, Sher-Color's analysis takes into account the characteristics of the base and sheen to provide a truer color match.

- Analyzes a color chip or any sample material with a consistent color and finish (not porous, mirrored or high-gloss).
- Provides the most accurate match for colors from the Sherwin-Williams palette, regardless of sheen selected.
- Creates a custom formula and archives formulas for 6 years for easy retrieval and replication.

see it, snap it and we'll match it...
