

Infrastructure & Industrial Photography

(2026 — New Brunswick + Atlantic Canada)

What I Do

I specialize in documenting large-scale infrastructure, industrial, and public works projects across New Brunswick. My work supports contractors, developers, engineers, and public owners with professional imagery used for marketing, proposals, reporting, and long-term brand assets.

Typical Projects

- Construction and Infrastructure
- Transportation & bridge construction
- Industrial facilities, refineries, and utilities
- Ports, logistics, and waterfront development
- Hospitals, schools, and municipal infrastructure

Services

- Project life-cycle documentation
- Progress & milestone documentation
- Marketing & portfolio imagery for contractors
- Aerial / drone photography (where permitted)
- Night & low-light industrial photography

Why Clients Work With Me

- 10 years of professional experience in NB's industrial sector
- Experienced on active, safety-conscious job sites
- Understands construction timelines and milestones
- Reliable scheduling and consistent visual style
- Images designed for long-term reuse, not just one-off posts
