## Candle type filter

Media: Woven mesh, fiber sintered felt, sintered mesh, made of stainless steel 304, 304L, 316, 316L, 317L, 904L&Monel, Hastelloy, etc.

**Advantages:**

1. Good air permeability;
2. Excellent resistance to erosion, heat, pressure and abrasion;
3. Uniform gas hole, high filtration rate;
4. Large flow capacity;
5. Reusing possible after ultrasonic wave, chemical reagent washing, free replacement.

**Application:**

1. High polymer industry: synthetic, plastic or film production;
2. Chemical industry: petrochemical, petroleum or paint refining, etc.;
3. Pharmaceutical and food industry: medicine/food refining or cycling;
4. Mechanical and vessel industries: hydraulic machine/milling oil production, gas flow controlling;
5. Gas industry: flow controlling;
6. Air purification or water treatment: sterilization & filtration;
7. Others: High temperature, high viscosity, high pressure.
