Industry Challenges

Supply Chain

Supply chain disruptions and volatile pricing

Contract Risk

Complex contracts with hidden risks and compliance burdens

Data Fragmentation

Fragmented ERP and contract data across systems

Speed

Slow negotiations delaying operations and time-to-market

Margin Sensitivity Analysis

Legal Review.pdf · Risk: HIGH

All Contracts (Global)

Base Case Margin

18.0%

Expected margin

Worst Case

-18.3%

All risks materialize

Best Case

37.1%

All risks mitigated

Range

55.4%

Margin volatility

Tornado Chart - Risk Factor Sensitivity

Impact of each risk factor on margin percentage (sorted by total range)

Our Solution

AI Contract Intelligence

AI-driven contract intelligence extracting high-risk clauses

Predictive Risk Simulation

Predictive risk simulation for supply chain and pricing

Automated Compliance

Automated compliance across regulatory frameworks

Seamless ERP Integration

Seamless ERP integration for unified visibility

Core Platform Capabilities

Contract Intelligence

Clause extraction, obligations, compliance tracking

Risk Intelligence

Simulations, force majeure, exposure analysis

AI Negotiation

Redlining, smart proposals, negotiation agents

Predictive Analytics

Scenario modeling and forecasting

Advanced Modules

01

Tender Intelligence

Tender Intelligence and bid evaluation scoring

03

Integration Hub

Integration Hub with SAP/Infor and contract graph

02

Global Risk Dashboards

Global risk dashboards and commodity forecasting

04

Digital Twin

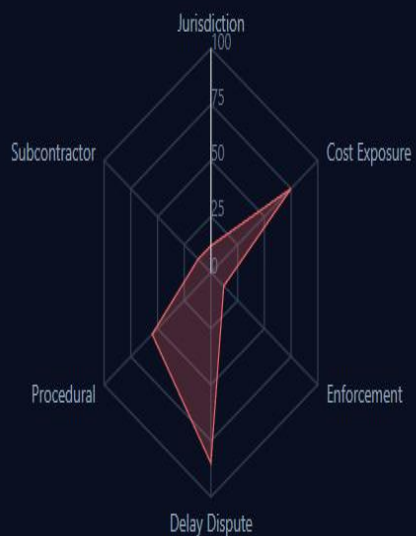

Digital Twin and what-if simulations

Overview Clause Analysis LegalBERT AI Rewrites

Contract Value
\$150,000,000

Arbitration Exposure
\$10,430,015
