THE PROBLEM

Industry Contract Challenges

The oil & gas sector faces mounting pressure from contract complexity, manual processes, and regulatory demands — creating hidden risk at every stage.

Manual Overload

Thousands of contracts requiring manual review, slowing operations and increasing error rates.

Paper-Based Risk

Legacy paper processes create hidden exposure, compliance gaps, and audit vulnerabilities.

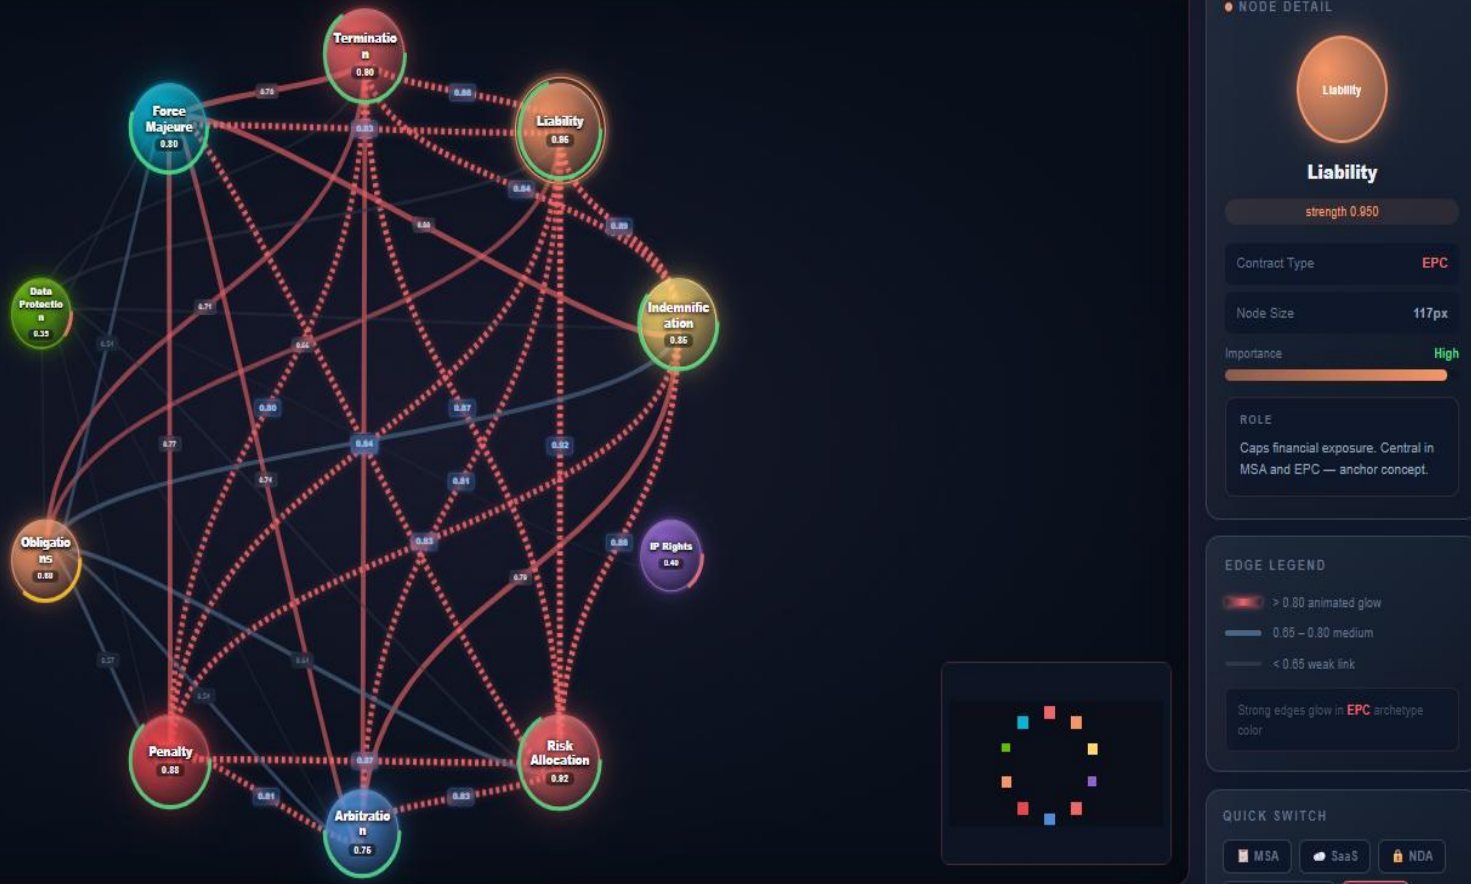

Regulatory Pressure

Increasing compliance complexity demands real-time visibility and proactive risk controls.

Revenue Leakage

Undetected obligation gaps and poor clause management drive **~40% legal risk exposure** and lost revenue.

How UniContractAI Addresses These Challenges

End-to-End Lifecycle Automation

Automate every stage – from drafting and negotiation through execution, monitoring, and renewal – eliminating manual bottlenecks.

Predictive Contracting

Proactive risk management powered by AI that identifies exposure before it becomes a dispute or compliance failure.

Enterprise Integration

Seamlessly connects with **SAP, Oracle, and Infor** – no rip-and-replace, just intelligent augmentation of existing workflows.

Strategic Intelligence Shift

Move legal and commercial teams from reactive firefighting to proactive, value-driving contract strategy.

Unique Features: Risk Intelligence & Compliance

Smarter Risk Detection

UniContractAI's oil & gas-specific risk models surface hidden exposure – from silent clause drift to obligation leakage – before they become costly disputes.

Advanced Risk Scoring

Tailored models score every clause against industry-specific risk benchmarks.

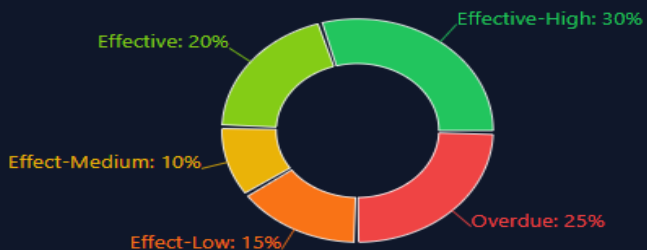

Silent Risk & Drift Detection

AI monitors contracts continuously, flagging deviations and emerging exposure.

Interactive Risk Heatmaps

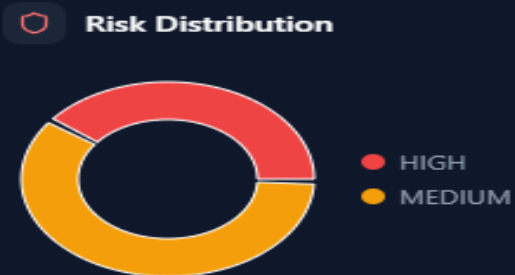

Visualize portfolio-wide risk exposure across counterparties, regions, and contract types.

Unique Features: Drafting, Simulation & Value

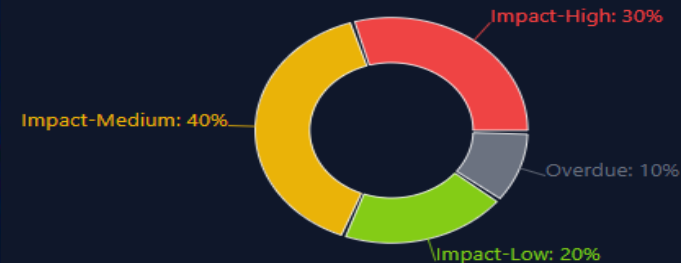

Multi-Clause Simulation

Predict outcomes across complex clause combinations before signing – reducing surprises and strengthening negotiating position.

AI Generation & Redlining

Auto-draft contracts and redlines using trained legal models – cutting review cycles and standardizing terms at scale.

Faster Deal Closure

Optimized terms, smart drafting, and lifecycle acceleration drive faster closings, reduced legal workload, and maximized contract value.

⚡ Faster Cycles

Accelerated contract workflows from draft to signature.

📄 Reduced Workload

Less manual review, more strategic legal focus.

📈 Maximized Revenue

Improved compliance and risk visibility unlock full contract value.
