EDUC Open Ended Questions

What did you like most about this course and instructor?

Comment
I loved how energetic every class was and he kept us so engaged in learning every class.
The class time was always used. Kyle was a great teacher, you could tell he cared about us and wanted us to do good
He was super personable and an overall great instructor.
I really like how friendly the environment of the class is. The instructor did an amazing job giving us critiques and finding ways to help us improve.
I liked that the course felt very relevant to my future career as a teacher. I always thought a lot in class and came to productive conclusions through discussions and personal reflection. The opportunity to discuss during each class was helpful. Kyle provided helpful feedback on assignments and created a good classroom culture. He made class enjoyable and was very accessible by email. He also emphasized takeaways from the course.
How engaging his classes are and how kind my instructor was. Kyle was hands down the best teacher I've had at IU. I have really disliked my classes up until this point and Kyle completely shifted my mindset of school. His class has been so much fun and I have learned so much from it. This class has made me so excited to teach and I hope to be even a fraction of the teacher that Kyle is.
Kyle is a nice guy. He is an entertaining teacher. He cares about his students. He made the course material easy to digest and accessible. He is also trying to innovate the field.
The comforting atmosphere in the classroom. Kyle is a great instructor and I hope he is given more opportunities to teach other classes.
The instructor was amazing!
The way the information was presented. We did multiple thing with the information allowing us to fully understand. The class was also very interactive.
Kyle, my goat, the legend, the best teacher to ever walk this earth. The second coming of Plato, he altered my brain chemistry. Hire him and give him lots of money.
I liked the activities incorporated into the lessons, as well as the slides that helped me follow along easily and take notes during the lecture.
I loved the atmosphere he created. I felt very comfortable raising my hand and contributing my thoughts, and even enjoyed it! By far the least anxiety inducing class I've had, I usually feel a little nervous to raise my hand but he made me feel like my ideas mattered and I was excited to contribute. I loved how it all applied really well to my future career (intrinsic motivation baby) and all the activities were so well matched with what we were learning!
I loved the structure. There were lectures, but there were also opportunities for group work and more creative assignments completed in class. My instructor seemed to be thinking out of the box to try and provide the best learning experience possible.
Very organized, personable, could tell kyle really cared about the course and student success
The effort Professor Beyersdorf put into each of the lesson and his care for his students to succeed.
Kyle Beyersdorf

What did you like least about this course and instructor?

Comment
I did not like anything the least.
Nothing.
I did complete the readings, but I know a lot of people who didn't. I learned the most from being in class and didn't take away too much from the readings, however, I did use them when completing video analyses. The class was a little bit inconsistent, with key principles becoming optional halfway through and sometimes having 2 readings a week while at other times having 1. Deadlines also changed more often than other courses.
Nothing it was incredible.
A tad bit heavy on the group work for my taste. Not everything MUST be group work in my opinion.
The only issue I had was the amount of video analysis's there were. This course is paired with M101, and both use video analysis's. It would be nice if we had other assignments for this class.
n/a
N/A
Nothing he's the goat
nothing.
There were no opportunities to apply what we learned in a real classroom but like that's to be expected if there's no service learning. I still learned a lot and can use it in the future when I work in classrooms so overall still great and no complaints really!
Nothing
There was nothing that I did not enjoy.
