PROJECT EXPERIENCE

1. PROJECT	Smart Truck Applications
CLIENT	Waste Management
TEAM SIZE	10+
ROLE	Salesforce Developer
DURATION	Sep 2023 – Present

- Worked as a Senior Developer and lead the team for maintenance as well as for the new enhancement of the system which was developed back in 2019.
- Improved the system performance and updated the legacy code with modern code standards and rejuvenated the whole Integration and Error Handling Structure to catch errors and logs in real time and reduced dependency from end users.
- Introduced OOTB Solutions to replace current solutions to make system future proof and less dependent on developers and also Modular at the same time to increase reusability.
- Got client appreciation time to time and helped in firm's revenue growth by identifying key identifiers which can potentially boost them financially
- Been part of major releases on time without any major issue reported and frequent connect with other track leads for better visibility or to have better bird eye view.

2. PROJECT	Tega
CLIENT	Tega Industries
TEAM SIZE	4
ROLE	Salesforce Developer
DURATION	Feb 2022 – Sep 2023

- Lead a team of developers to convert complex client requirements into workable UI Solutions which requires extensive Aura Component usage.
- Handled 10+ Integrations in between Salesforce and SAP using SOAP Architecture and also helped SAP Team for easy collaboration.
- Time to time POC of different concepts which I introduced to clients by going out of the box and also presented new SFDC Features which was coming in new upcoming releases.
- ANT Migration Tool is extensively used for all deployment related tasks and also handled cloning and refreshing sandboxes from time to time, version control of code via Bitbucket and streamlining the entire process with IV Documents
- 6 back to back major releases on time without any major issue reported and received various appreciation from client on work ethics.

3. PROJECT	SPOT
CLIENT	Roche Genentech
TEAM SIZE	8
ROLE	Salesforce Developer
DURATION	August 2019 – Feb 2022

- ◆ Implemented and maintained custom build application of Contract Management Oversight Lifecycle on the Salesforce Platform.
- ◆ Developed VF Pages, LWC Components & Apex Rest Code for custom functionality and to interact with external systems for data exchange
- ◆ Providing L3 support via JIRA & ServiceNow for all the bugs and also developing new user requirements for upcoming releases.
- ◆ Configuring the changesets for deployment, cloning and refreshing sandboxes from time to time, version control of code via Bitbucket and streamlining the entire process with IV Documents for a successful back to back releases and smooth onboarding of new functionalities.
