

**INTELLIGENT SYSTEMS.  
REAL-WORLD SOLUTIONS.**

**18–20 June 2027**

# ABOUT CMTECH

## Where Computing, Intelligence, and Connectivity Converge

CMTECH is the **Computing & Mobile Technologies Sector of HXG Expo 2027**, bringing together innovators, engineers, digital creators, and solution providers shaping the next era of intelligent technology. It is a sector focused on exploring how high-performance computing, mobile ecosystems, and AI-driven systems transform the way we work, live, and connect.

CMTECH covers the full landscape of modern digital infrastructure — from advanced devices and processors to cloud platforms, 5G/6G networks, automation systems, and intelligent applications. Whether you develop hardware, build software, design mobile products, or integrate AI into new experiences, CMTECH helps you connect with people and ideas driving digital progress.

At its core, CMTECH is a practical environment for business alignment. It brings together companies, researchers, investors, and public-sector leaders who are driving forward computing performance, mobility, and smart-system adoption across industries.

## MISSION

Our mission is to advance the future of computing and mobile technology by offering a structured platform that brings together innovation, collaboration, and industry insight. CMTECH aims to support companies and professionals developing solutions for a more connected, high-performance digital world.

We empower participants to explore breakthroughs, engage with experts, and build partnerships that accelerate product development and real-world deployment.

---

## VISION

We envision a future where computing is powerful, accessible, intelligent, and integrated seamlessly into daily life. CMTECH highlights solutions that simplify workflows, enhance communication, and improve productivity through responsible, human-centered technology.

Together, we help shape a digital ecosystem that is inclusive, efficient, and ready for the next wave of innovation.

---

## CORE VALUES

### Innovation First

We highlight technologies that push boundaries and create meaningful digital progress.

### Connected Thinking

We connect sectors - computing, mobile, AI, cloud, and cybersecurity - in one unified space.

### Transparency & Ethics

We encourage responsible innovation and trustworthy digital ecosystems.

### Collaboration Across Sectors

We link industries, developers, enterprises, and creators to accelerate product adoption.

### Education & Growth

We promote learning and knowledge sharing to support future-ready digital skills.

**CMTECH is where ideas take off.**

# SCOPE OF THE CMTECH SECTOR

## A Complete View of the Computing & Mobile Ecosystem

CMTECH presents the technologies and infrastructures driving digital transformation across Europe and beyond. The sector brings together high-performance systems, mobile platforms, AI tools, and connectivity frameworks that power the modern digital economy.

## What CMTECH Covers

### Hardware & Devices

PCs, laptops, smartphones, tablets, wearables, sensors, and specialized computing equipment.

### AI & Intelligent Systems

Machine learning, NLP, computer vision, automation tools, and responsible AI frameworks.

### Cloud & Edge Infrastructure

Cloud platforms, edge systems, distributed computing, and data-driven architectures.

### 5G/6G & Connectivity

Advanced mobile networks, device ecosystems, mobile OS innovations, and IoT connectivity.

### Cybersecurity & Governance

Mobile and cloud security, digital identity, encryption, and risk management.

### Cross-Industry Applications

Smart city platforms, fintech integrations, logistics automation, digital health, and immersive media.

CMTECH is where forward-thinking developers, businesses, and technology users explore the solutions shaping the next era of digital life.

# HIGHLIGHTS

## Explore the Future of Digital and Mobile Innovation

### 1. Artificial Intelligence & Intelligent Systems

Practical AI applications, deployment frameworks, model governance, and real-time automation.

### 2. High-Performance & Edge Computing

Processing power for scientific computing, enterprise workloads, and edge-level intelligence.

### 3. Mobile Ecosystems & 6G

Next-generation networks, device innovation, wearables, and mobile-first applications.

### 4. Cross-Industry Digital Transformation

Solutions that connect mobility and computing to healthcare, finance, retail, and public services.

### 5. Consumer Tech & Gaming

Immersive experiences, peripherals, entertainment platforms, and creator-driven technologies.

## WHY EXHIBIT

Exhibiting at CMTECH places your brand at the center of Europe’s dynamic technology ecosystem. It is a high-value environment where decision-makers engage directly with innovators shaping computing, mobility, and intelligent systems.

### As an exhibitor, you can:

- Present your latest hardware, software, and digital solutions
- Meet buyers, developers, distributors, and enterprise decision-makers
- Accelerate product adoption and gather real-world feedback
- Strengthen your brand among professionals and global partners
- Engage in technical sessions and expert discussions
- Explore collaborations across cloud, mobile, and AI ecosystems
- Gain visibility through HXG’s digital and media channels

CMTECH is where innovation gains traction and where businesses connect with customers, partners, and collaborators who drive real growth.

## EXHIBITOR BENEFITS

### High visibility

Strategic sector placement supporting strong engagement and footfall.

### Curated networking

Meet developers, CTOs, mobility planners, distributors, and technology buyers.

### Matchmaking opportunities

Connect with investors and corporate partners exploring new solutions.

### Media exposure

Presence across HXG’s communication channels and partner networks.

### Knowledge access

Opportunities for demonstrations, technical talks, and industry roundtables.

CMTECH helps companies communicate their value clearly and build meaningful relationships across the digital ecosystem.

# WHO CAN EXHIBIT

CMTECH welcomes organizations across the technology landscape, including:

- Computer hardware manufacturers
- Mobile device & accessory providers
- AI technology developers
- Cloud, data, and edge computing companies
- Software developers & application platforms
- Cybersecurity providers
- Connectivity & telecom innovators
- Gaming, peripherals, & consumer electronics brands
- IoT device manufacturers & integrators
- Digital infrastructure & smart system providers

Exhibitors are selected for innovation, relevance, and contribution to high-performance and mobile-first solutions.

# VISITOR PROFILE

Visitors to CMTECH include:

- CTOs and engineering leads
- Hardware and software developers
- AI researchers and data professionals
- Cloud and infrastructure specialists
- Network and telecom professionals
- Consumer electronics distributors
- Smart city and digital mobility planners
- Tech investors and analysts
- Students, creators, and early adopters

This diverse audience fosters productive environments for business development, talent discovery, and product engagement.

# HOW TO ATTEND

Visitors can participate in CMTECH through the official HXG Expo 2027 registration portal:

1. Register online
2. Select your attendee category (Professional, Investor, Student, Media)
3. Receive your digital badge
4. Explore the CMTECH sector and connect with partners

# Powering the Next Wave of Digital Innovation
