

Professional Electric Mobility

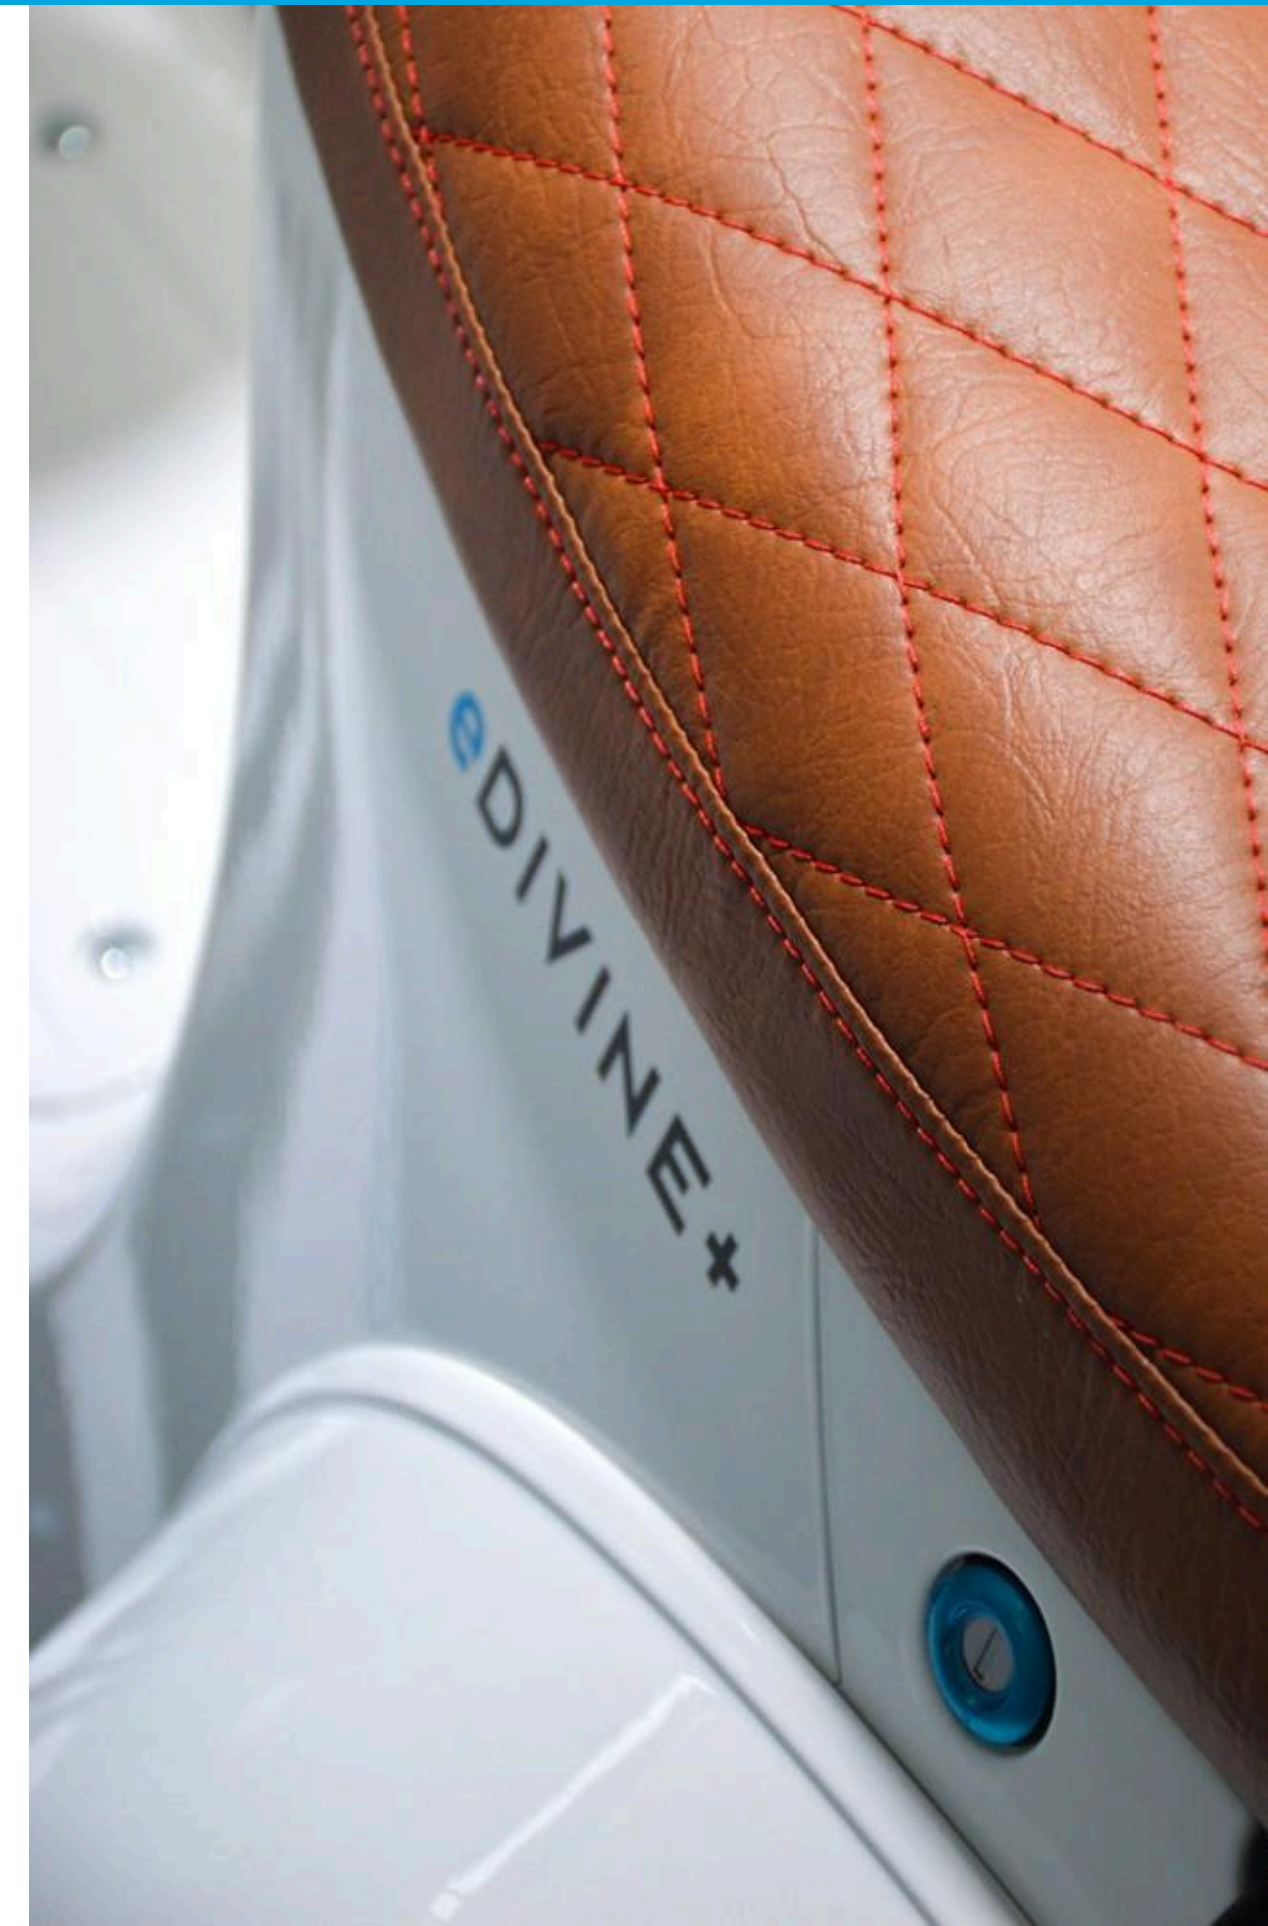

E D I V I N E

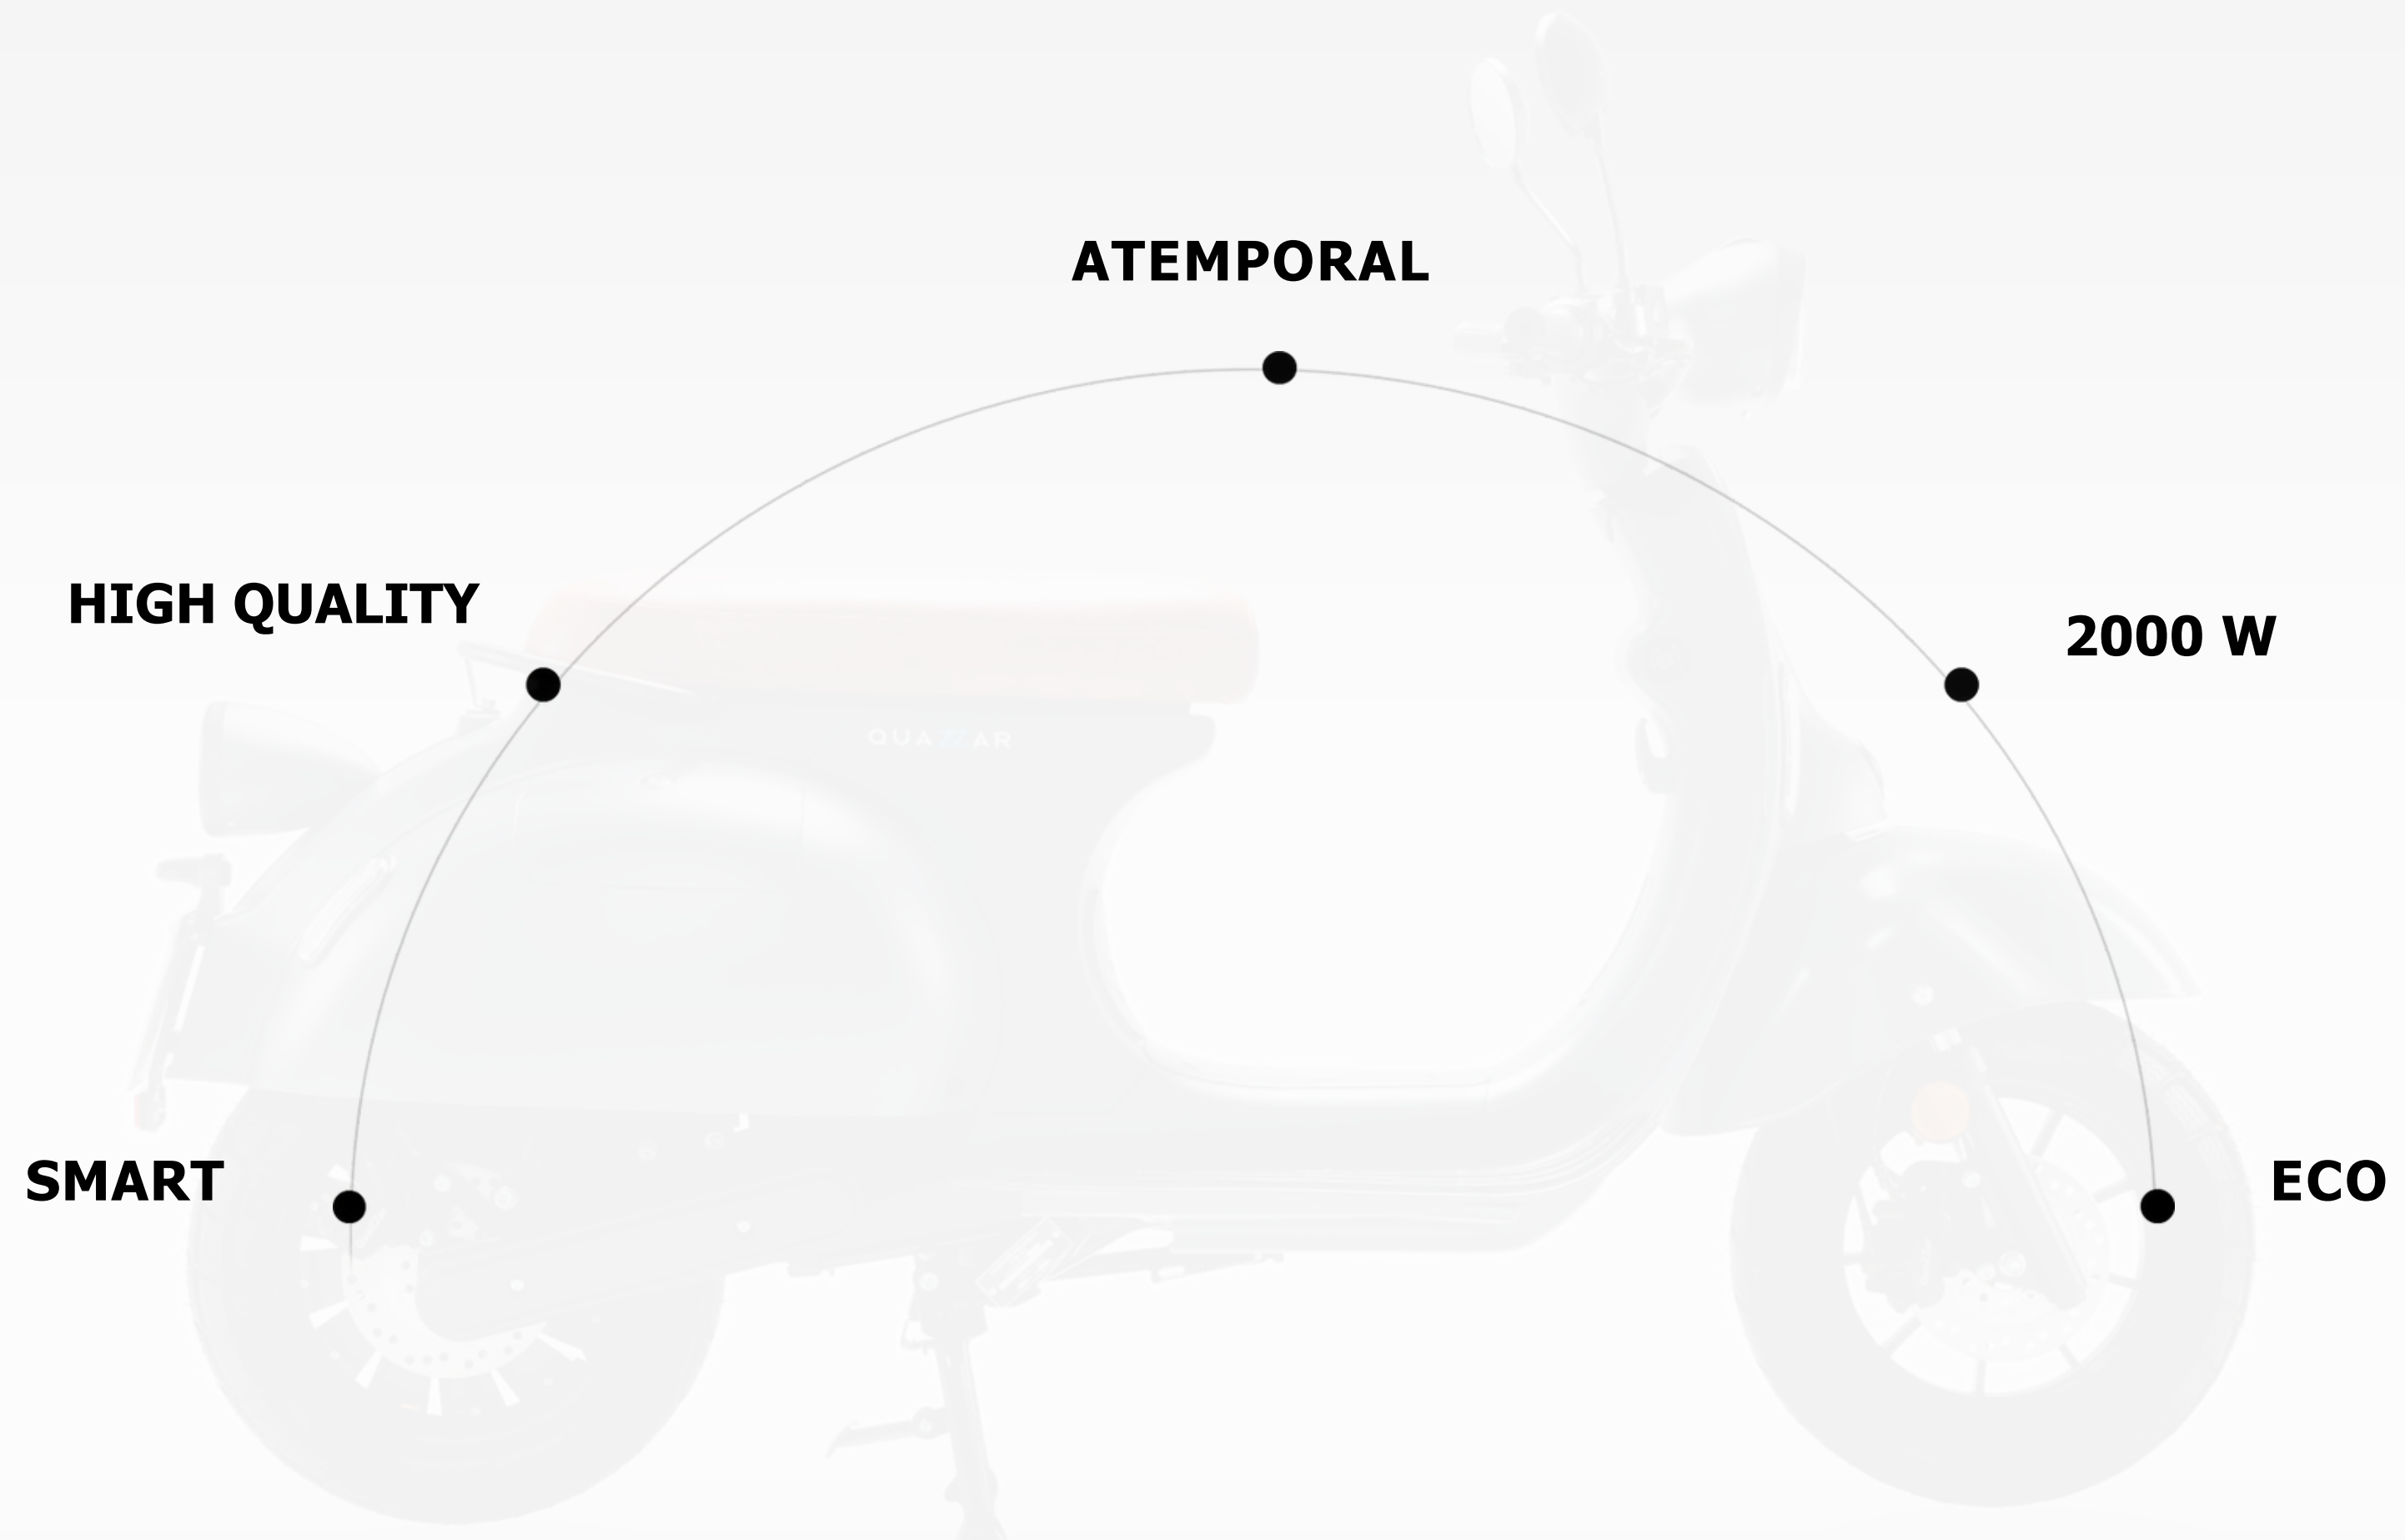

Never has walking with the classic been so compatible with new technologies, and at the same time contributing to respect for the environment, as doing it with the new QuaZZareDivine Plus.

QuaZZar Technologies presents its new model of electric motorcycle with 100% Spanish homologation and manufacture, capable of competing at the highest level and at the same time satisfying the highest demands of potential customers who are increasingly joining the electric movement in what we call EID. Concept (Eco Intelligent Driving).

(*) Our E-Divine Plus vehicle can be configured as a moped for those who do not have a driving licence and therefore need to make urban journeys without exceeding the 45km/h allowed by law in their e-divine model.
