Shockwave – “The Ultimate Doom” | Streetline™ Featured Vehicle

Streetline™ Performance & Accessories is proud to announce that one of our featured builds appears in the latest music video release from Shockwave, titled “The Ultimate Doom.”

The video was filmed in two segments:

- The first portion was recorded on location with the band during their northern shoot.
- The second portion was captured at the 6th Annual Florida J-Body Show, where the Streetline™ vehicle made an unannounced debut on April 30th, surprising attendees and enthusiasts alike.

This project was produced for submission to MTV2’s Headbangers Ball, marking a major milestone and exposure opportunity.

Streetline™ Performance & Accessories is honored to have been selected as part of this production and to contribute to a project of this scale.

About Shockwave

Shockwave is a six-member collective known for their aggressive sound and deep-rooted influence from Transformers culture.

Their catalog includes:

- Warpath 7
- Dominicon EP 12
- Autohate (full-length album)

These early releases are considered rare and highly collectible, as they were not mass-produced.

To consolidate their work, Shockwave released a collection album spanning 1996–2001, including the bonus track “Bruticus.”

Their latest release, “The Ultimate Doom,” stands as their most complete and powerful project to date.
