Emergency Water Storage Checklist

Practical Preparedness Guide for Modern Families

Prepared by

Global Survival Base

Prepare • Adapt • Survive

globalsurvivalbase.com

Introduction

Modern systems are complex and often fragile. Power outages, supply disruptions, natural disasters, and other unexpected events can disrupt daily life quickly.

Prepared families respond with calm and organization rather than panic.

This checklist provides practical steps to help households strengthen preparedness and improve resilience during emergency situations.

More preparedness resources are available at globalsurvivalbase.com

In any emergency, preparation and organization can make a critical difference. Complete the information below to personalize this checklist and ensure your preparedness plan is clear, organized, and ready when it matters most.

Preparedness Guide Contents

- 1. Step By Step Instructions**
- 2. Preparation and Storage**
- 3. Tools and Safety**
- 4. Planning and Notes**
- 5. Frequently Asked Questions (FAQ)**
- 6. Continue Your Preparedness Journey**

1. Step-by-Step Instructions

1. Review the Scenario

Read the overview section to understand the type of emergency situation this checklist is designed to address.

2. Start with Preparation

Begin by identifying your household needs and determining which supplies or actions are required.

3. Organize Storage

Store supplies in safe, accessible locations where all household members know how to find them.

4. Gather Essential Tools

Collect the equipment and tools needed to support emergency preparedness activities.

5. Review Safety Considerations

Ensure that safety procedures are understood and that supplies such as medical kits and emergency lighting are available.

6. Complete the Planning Worksheet

Use the planning section to document emergency contacts, meeting locations, and evacuation routes.

7. Review the Checklist Regularly

Preparedness plans should be reviewed every six to twelve months to ensure supplies remain functional and up to date.

Okey Lets Get Started

2. Preparation & Storage

Preparation

- Calculate minimum household water needs
 - Identify safe water storage containers
 - Determine storage locations inside the home
 - Plan additional emergency water sources
-

Storage

- Store at least 3–7 days of drinking water
 - Use food-grade water containers
 - Label containers with storage dates
 - Store water in cool and dark locations
-

3. Tools & Safety

Tools

- Maintain a portable water filter
- Store water purification tablets
- Keep metal pot for boiling water
- Maintain portable water containers for transport

Safety

- Rotate stored water every six months
- Protect water containers from contamination
- Seal containers properly
- Inspect water storage regularly

4. Planning & Notes

Planning

- Identify nearby natural water sources

- Learn basic water purification methods

- Maintain backup water collection plan

- Review household water preparedness annually

Notes

- Preparedness Notes
-
- Emergency Meeting Location
-
- Important Contacts
-

5. Frequently Asked Questions (FAQ) ?

? How much water should households store?

Many preparedness guidelines recommend storing at least 3–7 days of water.

? What containers are best for water storage?

Food-grade plastic containers or dedicated water storage containers are recommended.

? How often should stored water be replaced?

Stored water should generally be rotated every six months.

? Can rainwater be used for drinking?

Rainwater should always be filtered and purified before drinking.

? What if stored water runs out?

Households should identify backup water sources such as nearby lakes, rivers, or rainwater collection systems.

6. Continue Your Preparedness Journey

Continue Building Your Preparedness

Preparedness is a continuous process. Small steps taken today can significantly improve safety and resilience during unexpected disruptions.
