DATA-DRIVEN DECISIONS

Make smarter decisions
with analytics

POWERFUL MODULES

01

Multi-Location Asset Management

Manage and track assets
across multiple locations
from a centralized
platform.

02

User & Role Management

Define users, roles and
permissions to ensure
secure and role-based
access.

03

Vendor Management

Maintain vendor details,
track performance and
manage all vendor-
related activities.

04

Item & Asset Master Management

Create and manage item
and asset masters with
complete details and
attributes.

05

RFID Mapping & Asset Tracking

Map RFID tags to assets
and track their real-time
location, movement and
status.

06

Asset Request & Approval Workflow

Raise asset requests and
route through an approval
workflow for transparency
and accountability.

07

Asset Transfer & Return Management

Manage inter-location
or inter-department
transfers and ensure
timely returns.

08

Asset Acknowledgement

Capture user
acknowledgement for
issued assets to ensure
ownership and
accountability.

09

Preventive Maintenance Management

Plan, schedule and track
preventive maintenance
activities to maximize
asset uptime.

10

Support, AMC & Insurance Management

Track support tickets,
AMC contracts and
insurance details with
expiry alerts.

11

Reminder and Notification

Set reminders and get
real-time alerts for due
dates, renewals and
important actions.

12

Gate Passes workflow

Generate and approve
gate passes for asset
movement in and
out of the organization.

13

Condemnation, Loss & Theft Management

Record and manage
condemnation, loss or
theft of assets with
approvals and reports.

14

Accounting & Asset Depreciation

Track asset values,
calculate depreciation
and integrate with
accounting systems.

15

Auditing and Audit Logs

Maintain complete audit
trails and logs for all
transactions and system
activities.

16

MIS, Dashboards & Analytics

Get real-time dashboards,
insightful reports and
analytics to support
data-driven decisions.
