

## How are the Markets looking like ?

Markets had a good start to this week with IT and metals leading the rally. Smallcap moved above the crucial 200 DMA support and will be interesting to see if it can sustain the upmove. Similarly microcap made the upmove but still below 50 and 200 DMA

As mentioned above, largecaps look in good trend with more than 50% above both 50 and 200 DMA and 30% + near their high. For micro and small, significant correction has happened in the segment with less than 10% within 52 week high. In Filtered stock list, as mentioned below too, we got max participation from largecap segment. however, participation has increased now in microcap segment

## What about RSI

| Index            | RSI |
|------------------|-----|
| Nifty 50         | 55  |
| Nifty 500        | 51  |
| NIFTY MIDCAP 150 | 50  |
| NIFTY SMALLCAP 2 | 46  |
| NIFTY MICROCAP 2 | 45  |

RSI we are looking at 14 days, so above 50 indicates that 14 day return is positive. 50 to 100 is dependent on how volatile was the movement within those 14 days with 100 as all days positive and lower the number indicating higher volatility. As suggested above, nifty 50, is in strong uptrend while smallcap and micro cap look weak

Banks, Auto and Insurance look the strongest and we got maximum number of stocks in banks and auto. On other side, L&T in construction is the only strong stock in otherwise weak sector. Industrial production looks interesting with good number of stocks looking strong, though overall sector is still weak
