

CORINTIA
DATA & STRATEGY LAB

GOVERNMENTS &
PUBLIC ENTITIES

Key questions

Do data and processes support decision-making?

How are public resources and management time being used?

Is there a clear and up-to-date view of the status of projects and programs?

Are current risks and opportunities clearly identified?

What we aim to achieve

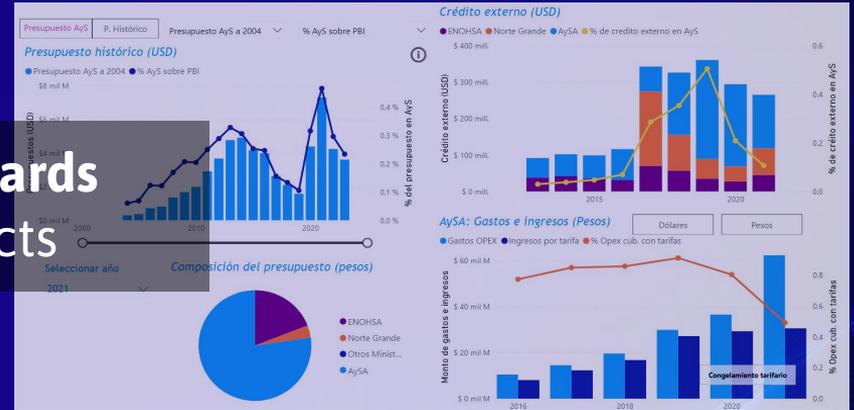

- Strengthen management and coordination capacity
- Clear and up-to-date visibility into the status of projects
- Evidence-based decisions, not intuition-based
- Automation of repetitive tasks and reporting
- Early detection of deviations and risks
- Strategic planning with technical and political perspective

Services

Management and monitoring dashboards
Clear tracking of programs and projects

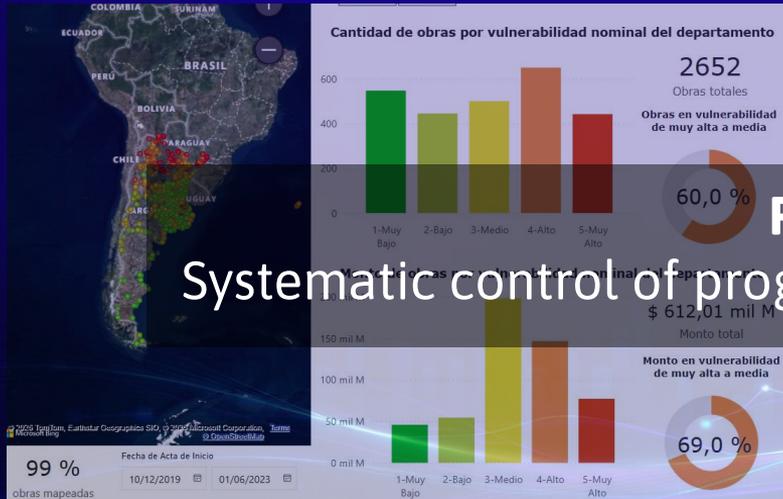

Institutional data integration and quality
Information for decision-making

CORINTIA
DATA & STRATEGY LAB

Services

Design of strategic plans and roadmaps
Clear priorities and management direction

Project and public works tracking system
Systematic control of progress, milestones, and responsible parties

CORINTIA
DATA & STRATEGY LAB

Services

Mapping and optimization of administrative processes

Reduced delays and greater operational efficiency

Environmental and sustainability indicators Impact measurement and alignment with standards
