

# THE SPRAY EDGE™

The Liquid Weed Eater. The Liquid Edger.

The Spray Edge™ is a precision herbicide spray attachment that creates sharp, professional turf edges without string trimming, hand edging, or overspray. By converting your existing sprayer into a guided chemical edging system, The Spray Edge delivers cleaner lines faster, with less labor, less equipment, and significantly reduced chemical waste compared to traditional edging methods.

## What It Does

- Produces crisp, straight chemical edges along sidewalks, driveways, curbs, fences, and hardscapes
- Replaces manual edging and string trimming with a single smooth, controlled pass
- Reduces labor time by up to 75% while improving consistency and appearance
- Eliminates overspray and wind drift, protecting turf, plants, and surrounding landscapes

## Key Features

- Spray Shield + Glide Sled ensures straight tracking
- Self-aligning front steering wheels guide motion
- Universal nozzle connection fits standard sprayers
- Corrosion-resistant materials for daily professional use

## Environmental Benefits

- Herbicide applied only where needed
- Reduced chemical usage per application
- Protects lawns, plants, and ecosystems
- Supports responsible vegetation management

## Ideal For

- Landscape contractors
- Municipalities & parks departments
- Golf courses & sports fields
- Schools, campuses & homeowners
