

Online Certificate Course on **MOLECULAR BIOLOGY TECHNIQUES** 07-11 JULY 2026 (IST 6:00 PM)

About the Course

The Molecular Biology Techniques course aims to provide an in-depth understanding of various molecular biology methodologies. It encompasses topics related to the mechanisms, applications, and future implications of these techniques. The curriculum will explore a broad spectrum of research areas, including an introduction to molecular biology, DNA isolation and sequencing, as well as PCR, electrophoresis, and autoradiography techniques. This course will equip students with practical knowledge of the techniques utilized in molecular biology, the experiments conducted with these methods, and the instruments required for their application.

Highlights of the course

- Molecular Biology Techniques
- Isolation of DNA
- Electrophoresis
- PCR Techniques
- Blotting
- Autoradiography
- Nucleic Acid Sequencing
- DNA Microarray

Time Schedule

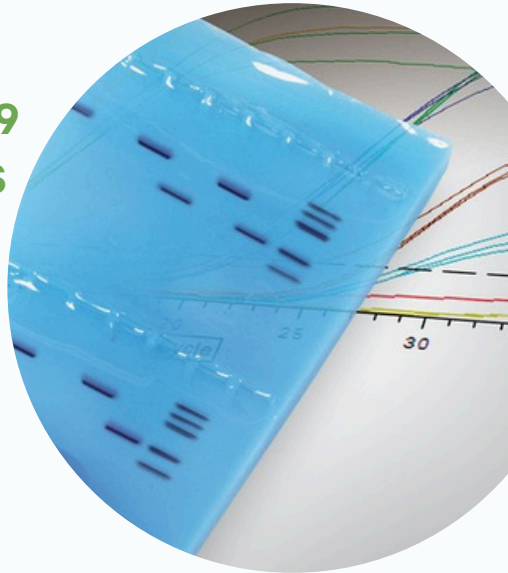

🇮🇳 India (IST) – 6:00 PM | 🇺🇸 New York (EDT) – 8:30 AM | 🇦🇪 Dubai (GST) – 4:30 PM | 🇸🇦 Saudi Arabia (AST) – 3:30 PM

Fee and Features
Indian Participants: Rs 699
Other Participants: \$45 US

- E-Certificate to participants
- Live and Interactive Sessions
- 24X7 Chat Support
- Session Recordings
- E-material
- Lecture PPTs to Participants

Who can Join?

Graduates, postgraduates, research scholars, faculty, and professionals from Life Sciences (ZBC, Biotech, Biochem, Microbio), MBBS, Pharmacy, Chemical Sciences, and related fields.
