

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
The Hart Family	California / Washington / Oregon	2018	Interstate cross-border tracking failures; separate state child welfare registries operated in informational silos, allowing parents to evade active abuse investigations by repeatedly relocating.
Victoria Rose Smith	South Carolina	2021	Deficient screening and home evaluation; private placement agency failed to detect acute emotional instability during home studies, allowing a highly volatile environment to pass standard checklists.
Hana Williams	Washington	2011	Thirteen-year-old Hana, adopted from an Ethiopian orphanage, died of hypothermia and severe malnutrition in her backyard. Her adoptive parents, Carri and Larry Williams, subjected her to daily physical battery, forced her to sleep in a locked closet, and compelled her to eat frozen meals outside in the cold.
Minnet (9) & Jasmine (7) Bowman	Maryland	2008	Subsidized adoption monitoring failure; remains hidden in a freezer for years while the mother automatically collected monthly state subsidies due to a complete lack of physical verification mandates.
Sophie & Jonathan Gray	Tennessee	2020	Complete breakdown in state wellness visits; state conducted zero post-finalization check-ins, allowing the parents to hide a double homicide under fabricated homeschooling progress logs.
Erica Parsons	North Carolina	2011	Delayed missing persons reporting; tracking framework lacked a requirement for recurring physical verification, allowing parents to collect subsidies for years by claiming the missing child was with relatives.
Sherin Mathews	Texas	2017	International vetting vulnerabilities; family consistently missed mandatory post-placement follow-up screenings with international agencies without triggering a domestic public safety or wellness check.
Grace Packer	Pennsylvania	2016	Unresolved reports to child welfare registries; separate municipal tracker databases operated in silos, preventing field caseworkers from connecting multiple independent abuse reports into a unified warning file.
Natalie Finn	Iowa	2016	Ignored third-party neglect reports; child protective services closed multiple high-risk logs from neighbors and teachers without executing a mandatory independent physical audit of the boarded-up home.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Jackson Adopted Children	New Jersey	2010	Abuse masqueraded as a medical condition; post-finalization tracking failed to independently cross-verify parental claims of a "genetic medical eating disorder" with objective clinical registries.
Candace Newmaker	Colorado	2000	Unregulated alternative medical therapies; severe lack of state oversight or tracking protocols regarding dangerous, alternative behavioral interventions used on adopted children experiencing trauma.
Nathaniel Craver (Alexei Geiko)	Pennsylvania	2009	Severe Reactive Attachment Disorder (RAD) diagnostic abuse; tracking framework lacked independent forensic oversight to cross-examine parental claims that extensive deep-tissue bruising was entirely "self-inflicted."
Dennis Jurgens	Minnesota	1965 Homicide / 1987 Prosecution	Historical precedent; absolute absence of automated forensic tracking alerts for suspicious child fatalities inside subsidized homes, allowing an early administrative cover-up to stall justice for 22 years.
Risky Holland	Michigan	2005	Financial-to-physical tracking disconnect; state financial tracking networks continued automatically issuing monthly subsidy checks long after the child's death because payouts were decoupled from physical safety checks.
Isabella Kalua (Ariel Sellers)	Hawaii	2021	Sudden withdrawal from public eye; child welfare registries lacked an automated flag to trigger emergency face-to-face safety audits when a high-risk foster-to-adopt child was abruptly pulled from public school for homeschooling.
Viktor Matthey	New Jersey	2000	Post-finalization tracking void; local social service agencies lacked the statutory mandate to execute unannounced physical audits of the home environment once the legal adoption decree was signed.
David Polreis Jr.	Colorado	1996	Manipulation of post-placement integration checks; adoptive mother weaponized clinical jargon regarding international orphanage behavior to successfully mask severe, acute physical child battery.
Blake and London Devon	North Carolina	2023	Total absence of cross-jurisdictional compliance tracking; family maintained complete domestic isolation and cut off all community networks for years without triggering an automatic state welfare audit.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Chase Harrison	Virginia	2008	Fatal integration neglect; critical void in immediate post-placement transition support, emergency respite resources, and mandatory family tracking metrics during high-stress initial placement windows.
Lydia Schatz	California	2010	Unmonitored behavioral compliance frameworks; child welfare infrastructure lacked an integrated dashboard to flag or intercept the deployment of extreme, abusive fundamentalist disciplinary guides inside subsidized homes.
Timothy Boss	Iowa	2000	Cross-state flight used to evade oversight; adoptive parents intentionally crossed state lines to sever contact with tracking officials, exploiting a lack of interstate communication to dodge local wellness checks.
Austin & Edward Bryant	Colorado/Texas	2011	Decade-long undetected missing status; parents combined homeschooling exemptions with an un-tracked interstate move to pocket nearly \$175,000 in adoption subsidies for children no longer in their care.
Sean Paddock	North Carolina	2006	Weaponization of basic online school registration; parent utilized lax state home-school logging to pull multiple adopted children completely out of institutional view, turning the home into an un-tracked compliance labor site.
The Gravelle Children	Ohio	2005	Failure to restrict "serial adoption"; placement vetting networks failed to flag or limit the compounding risk of permitting a single household to continuously adopt multiple high-needs children to accumulate concurrent state subsidies
Hannah Carrol & Siblings	Ohio	1992	Failure to track recurring domestic fatalities; localized tracking tracking systems failed to cross-reference multiple child deaths within a single household, allowing the parents to retain custody of surviving dependents.
Meela Rose Miller	Washington / South Dakota	2022	Complex domestic surveillance used to enforce confinement and hide severe starvation; lack of mandatory routine community contact points.
Landon Maloberti	Pennsylvania	2023	Fatal blunt force trauma and torture; post-finalization monitoring failed to catch severe physical erosion hidden within an isolated household.
The Schindley Child	Georgia	2023	Extreme nutritional deprivation and confinement; child kept structurally invisible from welfare tracking due to a lack of automated post-placement wellness checks.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
The Trebilcock Children	Washington	2012	Kitchen motion detectors used by parents to block access to food; deception facilitated by keeping biological children healthy to deflect mandatory reporter suspicion.
Nubia Barahona	Florida	2011	Years of torture and starvation hidden behind positive progress letters sent to courts; hotline handlers lacked real-time integration with prior screened-out abuse data.
Aundria Bowman (Alexis Badger)	Michigan	1989-2020	Fatal trauma misclassified as a "runaway" file for 30 years; total failure to execute independent forensic checks or active physical investigative audits on reported missing youth.
Logan Marr	Maine	2001	Fatal duct-tape containment inside a pre-adoptive foster home; institutional deference and a lack of critical tracking checks due to the caretaker's status as a former state caseworker.
Lisa Steinberg	New York	1987	Fatal physical battery occurring within an illegal, unregulated private adoption broker loop; completely bypassed state home studies, background screening, and physical audits.
Dennis Gene Merryman	Texas	2005	Death from advanced starvation; parents successfully deflected inquiries by falsely blaming the child's deterioration on international orphanage genetics due to a lack of independent medical cross-verification.
Max Alan Shatto	Texas	2013	Suspicious death with extensive multi-staged bruising; exposed a critical deficit in transparent post-placement safety verification for international adoptees.
Alex Pavlis	Illinois	2003	Fatal internal trauma inflicted within six weeks of arrival; un-vetted private international broker bypassed standard state-level protective transition and behavioral support services.
Nina Hilt	Virginia	2005	Fatal physical battery and shaking; total lack of cross-border post-placement tracking or statutory mandates forcing face-to-face professional wellness evaluations post-finalization.
Nicolai Emelyantsev	Utah	2008	Fatal skull fracture inflicted within five months of adoption; local tracking systems failed to evaluate or monitor the household's capacity to handle a high-stress integration environment.
Jason Lindorff	New Jersey	2001	Fatal blunt force head trauma and systematic neglect; parents easily maintained complete domestic isolation by dropping out of voluntary, non-mandated post-placement programs.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Logan Higginbotham	Massachusetts	1998	Fatal shaken-baby syndrome shortly after finalization; lack of mandatory tracking checkpoints or specialized pediatric forensic reviews to cross-examine parental claims of a "playground fall."
Zachary Higier	Florida	2002	Fatal head trauma occurring within 14 days of domestic entry; international screening and pre-placement domestic tracking pipelines failed to catch acute environmental risk factors.
Maria Anastasia Bennett	California	2002	Fatal traumatic brain injury from child battery; post-placement home observation cycles failed to capture active physical markers of abuse.
Jessica Albina Hagmann	Virginia	2003	Severe head trauma from physical battery; child welfare registries lacked an integrated electronic dashboard to flag recurring emergency room visits across different hospital networks.
Liam Thompson	Vermont	2003	Severe trauma and profound physical neglect; tracking metrics completely evaporated once the financial and legal parameters of the adoption subsidy were finalized.
Anatoliy & Yana Kolenda	New Jersey	2002	Double filicide and murder-suicide; mental health tracking and domestic distress logs operated in complete isolation from central child welfare registries.
The Collingswood Boys	New Jersey	2003	Severe starvation of four boys; parents successfully deflected regulatory tracking by bringing emaciation victims to community events and claiming they suffered from an untreatable medical eating disorder.
Mary Ellen Wilson	New York	1874	Historic foundational case; total legal non-existence of child safety laws, forcing early advocates to utilize animal cruelty statutes to execute a physical safety extraction.
The Sueppel Children	Iowa	2008	Quintuple murder-suicide; post-finalization systems lacked any statutory monitoring triggers to alert welfare agencies when a parent experiences a catastrophic legal indictment or psychiatric breakdown.
Marcus Fiesel	Ohio	2006	Fatal closet confinement and hyperthermia; private foster agency failed to identify an unvetted adult living in the home or track the foster father's recent arrest for domestic violence.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Karreon Franks	Washington	2020	Autistic child starved to a skeletal 61 pounds; investigators failed to execute independent, face-to-face interviews outside the presence of the parents despite 2.5 years of explicit hotline safety logs.
JJ Vallow	Idaho	2019	Doomsday cult filicide; parents exploited rapid cross-border interstate flight to sever contact with local schools and family, exposing the lack of a real-time tracking registry.
Adams Foster Child	Massachusetts	2020 / March 2026	Fatal treatable strep infection and medical neglect; the state-licensed pipeline lacked an automated flag to alert caseworkers when a medically vulnerable infant missed critical pediatric checkpoints.
Rilya Wilson	Florida	2000-2002	Disappearance undetected by the state for over eight months because the assigned case tracker systematically falsified monthly logs, proving the necessity of metadata-verified digital tracking.
Lucas Ciambrone	Florida	1995	Fatal traumatic brain injury and systematic torture; parents weaponized a Reactive Attachment Disorder (RAD) diagnosis to falsely claim extensive bodily contusions were entirely "self-inflicted."
The Baraboo Boon Children	Wisconsin	2021	Adopted siblings padlocked and chained to beds; parents effectively blocked external monitoring by filing standard state homeschooling exemptions to sever contact with mandatory reporting networks.
Amari Boon	Texas	2002	Pre-adoptive toddler beaten to death; critical historical abuse logs and automated risk-assessment flags were entirely siloed between the private foster contractor and the central state registry.
Masha Allen	Federal Case	2000s	Private web-brokered international adoption resulting in severe commercial sexual exploitation; bypassed state child welfare audits, background screening, and physical safety verification.
Gillian Elmore	Oklahoma	2021	Campaign of physical assault and water deprivation; state-funded adoption subsidies were distributed automatically for years without requiring any periodic, face-to-face safety validation audits.
Cook County Foster Siblings	Illinois	1995	Fatal internal battery and severe environmental neglect; extreme administrative caseload saturation (over 100 active files per tracker) made regular physical audits operationally impossible.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Marcella's Pierce	New York	2010	Fatal physical battery; total absence of real-time electronic data sharing between family courts, private foster tracking databases, and hospital emergency room networks.
The Roman Children	California	2019	Serial adoption breakdown; vetting networks failed to flag or limit the compounding risk of permitting a single household to continuously adopt multiple high-needs children to accumulate subsidies.
Christopher Cho	Virginia	2011	Fatal physical battery of an international adoptee; complete tracking void and structural disconnect between international post-placement reporting loops and domestic networks.
Deondre and Brandon Howard	Georgia	2004	Basement confinement and starvation; state databases issued automated monthly direct-deposit subsidy payments for years without requiring independent physical proof of dependency.
Isabella Thompson	Arizona	2018	Fatal medical neglect of a child with cerebral palsy; state healthcare tracking infrastructure lacked an automated flag to alert authorities when a medically fragile child dropped off all clinical registries.
The Malibu Court Homicide	California	2022	10-year-old child tortured to death; once adoption paperwork was finalized, social services possessed no statutory mandate or tracking trigger to execute unannounced physical audits of the home.
Jaliek Rainwalker	New York	2007	Disappearance of a 12-year-old child under highly suspicious circumstances; structural failure to track active, high-risk "adoption disruptions" when households attempt to return dependents to state care.
Alex B.	Connecticut / Florida	2000s	Fragile ward dead within three weeks of transfer; caseworkers explicitly violated the Interstate Compact (ICPC) by failing to conduct background screens or secure out-of-state health coverage.
Susan Helton	Texas	2018	Adopted children confined to homemade wood-and-wire cages; parent weaponized an "exemplary" foster advocate status to completely deflect community alerts and active tracking loops.
Lauren Kavanaugh	Texas	2001 - 2026	Severe closet confinement and starvation; abusers successfully neutralized child protective investigations by repeatedly moving across municipal borders and mobile home parks.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Asunta Basterra (Yong Fang)	International (Spain)	2013	Systematic poisoning and asphyxiation; affluent socioeconomic and professional status blinded pre-placement vetting filters, which failed to track the mother's active psychiatric hospitalizations.
Raven Thompson	North Dakota	2020 / March 2026	Foster placement fatality with a body discovered on a concrete basement floor; failure to track and limit over-crowded foster home environments containing eight children simultaneously.
Laola Daniel	Georgia	2015	Catastrophic blunt force trauma; caseworkers repeatedly ignored extensive bruising logged by external observers due to the foster mother's prominent local political and professional status.
Sy'vir Hill	Pennsylvania	2024-2026	20-month-old infant drowned while left unattended in a bathtub; tracking highlighted severe multi-month processing backlogs in state-contracted foster management systems.
Aedyn Agminalis	Florida	2016-2017	Fatal non-accidental head trauma; system failed to coordinate a protective extraction or automated tracking flag after the child was previously hospitalized for a separate suspicious choking event.
The Blakley Child	California	2024-2026	Adoptive parents arrested for physical battery and homicide; abuse hidden behind a public-facing "perfect family" persona that successfully deflected standard, post-placement wellness checks.
Dakota Stevens	Indiana	2024	Mechanical asphyxia from foster mother's body weight; highlights a complete failure to track, audit, or restrict dangerous physical disciplinary compliance methods within state-licensed foster networks.
Bryson Lowell	Oklahoma	2015	Dead from multi-staged blunt force trauma; the state's welfare hotline screened out an active abuse report as a minor policy violation rather than a battery indicator, leaving the toddler in the home.
Mackenzie Felmlee	Illinois	2024	Years of starvation and physical torture caught on camera; private case management trackers completely failed to conduct longitudinal physical welfare audits or document obvious physical degradation.
Alex Hill	Texas	2013	2-year-old foster toddler stomped to death; state-contracted private placement vendors failed to execute thorough, independent background screens and environmental audits on the household.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Tony Day and Sherry Folts	New Mexico	2012	Double homicide of adoptive family members by adopted youth; highlights a critical lack of reactive psychological trauma tracking and post-finalization therapeutic support for older international adoptees.
Bennett Kieron Pladl	North Carolina	2018	Interconnected filicide and parricide; total absence of integrated post-adoption transition services to guide, monitor, and protect young adult adoptees navigating complex biological reunions.
Robbie and Jennifer Tower	Florida	2023	Double parricide by adopted son following severe integration breakdowns; family lacked access to a state-integrated, mandatory forensic behavior monitoring pipeline capable of deploying intensive therapeutic support.
Zebachiah Shaw	Texas	2017	Fatal abdominal blunt force trauma inside a relative kinship foster placement; kinship frameworks applied relaxed oversight metrics and failed to execute legally mandated physical audits of the home.
Xavier Mora	California	2020	Foster child beaten to death; massive case management backlogs and severe employee turnover left the household with zero face-to-face safety checks for three consecutive months.
The O'Brien Children	International Precedent	2012	Six children locked in feces-covered outdoor pens and starved; parents successfully bypassed monitoring by combining homeschooling exemptions with fraudulent progress reports sent to private brokers.
Demirez and Deonte Logan	Wisconsin	2018	Foster brothers severely beaten, resulting in a fatality; separate emergency room visits went untracked due to the lack of a centralized forensic database to connect cross-jurisdictional medical patterns.
Gideon and Isaac L.	Ontario	2024-2026	Pre-adoptive foster brothers starved and tortured; child welfare networks failed to execute basic, unannounced physical tracking checks despite multiple active red flags reported by community observers.
Heaven Cox	Texas	2017	Tragic tracking failure illustrating a severe structural disconnect between specialized post-adoption psychiatric care registries and central child protective tracking databases.
Chassity and Christian Boyd	Mississippi	2019	Infant foster sibling succumbed to untreated traumatic brain injuries; state placement networks routinely deferred to the foster parent's historical record, creating a fatal blind spot for fresh trauma signals.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Serenity Dennard	South Dakota	2019	9-year-old missing foster child; highlights the critical absence of an integrated, real-time electronic tracking protocol for high-risk foster youth presenting an active flight risk.
Martonia Wilder	Ohio	2023	Emaciated body found hidden in an attic; the assigned private contractor caseworker faked case logs to conceal a total absence of child safety tracking and mandatory monthly physical wellness checks.
Zahra Baker	North Carolina	2010	Cancer survivor tortured and dismembered; local social services treated separate cross-jurisdictional missing logs and abuse alerts as isolated incidents rather than a compounding chronicle.
Zaijan Atwell	Florida	2023	Disabled child starved to death inside a specialized care home; healthcare and foster care tracking infrastructure completely failed to flag a Medicaid fraud scheme that decoupled automated payouts from physical verification.
Noah Cuatro	California	2019	4-year-old tortured to death after being returned to biological parents; the lack of a real-time tracking dashboard allowed court-ordered, high-priority emergency extraction files to languish in administrative queues.
Harmony Montgomery	New Hampshire	2019	5-year-old murdered after being handed to an abuser; the family court system completely bypassed the Interstate Compact (ICPC), transferring custody across state lines without a mandatory home study or tracking supervision.
Nicholaus Contreras	Arizona	1998	Died of physical exhaustion and medical neglect at a private institutional foster repository; tracking loops failed to audit the facility independently, relying instead on superficial, self-reported paper checklists.
Tae-Lynn Fackrell	Utah	2016	4-year-old foster child beaten to death under the guise of an "exorcism"; tracking network lacked an automatic risk flag to trigger emergency audits when an active home completely withdrew from routine check-ins.
Kendall Chick	Maine	2017	Fatal physical abuse inside a kinship foster placement; state infrastructure completely ceased active oversight and failed to execute a single physical wellness visit for over a year post-handoff.

VICTIMS	LOCATION	DATE	PRIMARY SYSTEMIC OVERSIGHT FAILURE
Adrian Jones	Kansas	2015	Child tortured, starved, and killed; the abusers effectively neutralized active tracking loops by executing rapid residential relocations across county and state lines to exploit cross-jurisdictional blind spots.
Andrew “AJ” Freund	Illinois	2019	5-year-old returned from foster care and beaten to death; caseworkers systematically minimized active field files, faked assessments, and closed tracking logs while completely ignoring automated local police alerts.
