Our Expertise

End to end Consultancy Services across Railway Infrastructure Projects

Track Construction Advisory

Comprehensive support in track linking, alignment and levelling, track geometry control, activity sequencing, quality inspections, and coordination between engineering drawings and on-site execution.

Yard & Turnout Consultancy

Support for turnout and crossover layout planning, turnout installation methodology, yard remodelling activity sequencing, and on-site coordination during turnout installation and related track works.

Billing and Measurement Support

Comprehensive support for quantity measurement, abstract preparation, contractor billing, variation analysis, and documentation coordination for execution and payment processes.

CRS Inspection Support

Execution-led support for CRS documentation, compliance management, inspection register preparation, site readiness coordination, and technical assistance during inspection and commissioning activities.

Engineering Drawings

Support in preparation, review, and coordination of engineering drawings related to track works, yard layouts, turnout arrangements, execution details, and site modifications.

Material & Store Advisory

Support in material planning, store coordination, inventory monitoring, material reconciliation, and documentation management for railway infrastructure execution works.

Tender Documentation Support

Support in preparation and coordination of technical documents, quantity details, execution methodologies, compliance submissions, and bid-related engineering inputs for railway infrastructure tenders.

Project Execution Support

Execution-led support in construction planning, site coordination, activity sequencing, technical supervision, execution monitoring, and progress management for railway infrastructure projects.

Engineering Growth. Delivering Precision.

03

Our Approach. Our Strength.

A Systematic Approach Backed by Experience and Engineering Excellence

Our Approach

1. Understand

Study project, drawings & constraints

2. Analyse

Examine technical scope in detail

3. Deliver

Practical, site-feasible recommendations

4. Support

Documents, drawings, coordination inputs

Our Strength

Domain Expertise

Deep knowledge of Indian Railways, processes and technical standard

Execution Focused

Hands-on approach with strong site understanding and problem-solving.

Cost & Time Efficiency

Optimized solutions that save time, reduce cost and improve project outcomes.

Quality & Safety

Committed to highest quality standards and safety in every deliverable.

Trusted Partnership

Strong relationships with clients, agencies, vendors and stakeholders.

Documentation Precision

Support in Measurement, billing, CRS and tender documentation.

Our Project Exposure

New Line & Gauge Conversion

Doubling

Yard Remodelling

Coaching Depot Works

Thank You.

For exploring KoreKraft Engineering.

We appreciate your time and interest in our capabilities. At **KoreKraft Engineering**, we are committed to delivering execution-led, high-impact railway infrastructure solutions that create long term value and drive engineering excellence.

Let's build the future of rail infrastructure together.

Our Values

Execution First

We focus on deliverability, not just documents.

Integrity

Honest advice, transparent process, ethical approach.

Collaboration

We work as an extension of your team.

Excellence

Committed to quality, safety and long term performance.

Sustainable Impact

Engineering solutions that create enduring value.

Our Clients & Partners

Indian Railways & PSUs

Railway Contractors

EPC Companies

Infrastructure Developers

PMC Firms

Track & Civil Teams

Let's Connect.

We are always open to new opportunities, partnerships and collaborations. Reach out to discuss how we can support your next project.
