

PRODUCT CATALOG

Global sourcing for agricultural commodities.

GLOBAL SOURCING & TRADE SOLUTIONS

CameX Trade connects global buyers with trusted suppliers, ensuring reliable sourcing, structured execution, and consistent delivery of high-quality agricultural commodities and ingredients.

GLOBAL SOURCING

Access to a wide network of qualified suppliers across key producing regions.

STRUCTURED EXECUTION

End-to-end management with a focus on quality, compliance, and transparency.

RELIABLE PARTNERSHIP

Built on trust, integrity, and a commitment to long-term value.

GLOBAL SOURCING & TRADE SOLUTIONS

We connect global buyers to trusted suppliers and deliver high-quality commodities through structured execution and reliable partnerships.

01

STRATEGIC SOURCING PARTNER

Access to a wide network of trusted producers across key global markets.

02

STRUCTURED EXECUTION

End-to-end management with a focus on quality, compliance, and operational excellence.

03

RISK CONTROL & RELIABLE DELIVERY

Rigorous risk management and efficient logistics ensuring safe and on-time delivery worldwide.

COFFEE

Building on Brazil's leadership in global coffee production, our portfolio connects international buyers to consistent, high-quality coffee solutions. From green Arabica and Robusta beans to specialty graded coffees, our products meet the demands of roasting, blending, and large-scale industrial applications. With strict quality control, traceability, and diverse processing methods, we ensure reliability, scalability, and competitive performance across global markets.

**HIGH-QUALITY
BEAN SELECTION**

**SCALABLE SUPPLY FOR
GLOBAL DEMAND**

**CONSISTENT CUP PROFILE
& GRADING STANDARDS**

**TRACEABLE ORIGINS &
CONTROLLED PROCESSING**

**SPECIALTY COFFEE OPTIONS
(SCA 80+ SCORING)**

**VERSATILE APPLICATIONS
(ROASTING, BLENDS,
INDUSTRIAL USE)**

COFFEE SOLUTIONS

A comprehensive portfolio of coffee solutions, sourced from trusted origins and tailored to the highest quality standards for global markets.

GREEN COFFEE – ARABICA

Balanced, aromatic, and complex. Arabica beans deliver superior cup quality with refined acidity, natural sweetness, and nuanced flavors.

GREEN COFFEE – ROBUSTA / CONILON

Strong, resilient, and high yielding. Robusta offers higher caffeine content and consistent performance for industrial and large-volume applications.

GOOD CUP / PRIME CUP

Coffees graded for quality based on cup profile, defect count, and sensory evaluation. From standard commercial grades to specialty coffees scoring 80+ points under SCA protocols.

FERMENTED COFFEE

Advanced processing enhances flavor complexity and aromatic intensity. Techniques like anaerobic or extended fermentation create unique profiles for differentiated markets.

INSTANT COFFEE

Produced through spray or freeze drying processes to ensure high solubility, long shelf life, and consistency. Ideal for the food industry, beverages, and retail markets worldwide.

ANIMAL NUTRITION

Our animal nutrition portfolio includes high-performance ingredients such as DDG, plant protein meals, and animal protein meals, developed to support efficient and balanced feed formulations.

HIGH NUTRITIONAL DENSITY

Concentrated nutrients to maximize animal health and productivity.

IMPROVES FEED EFFICIENCY

Enhances digestibility and conversion for better performance.

RICH IN PROTEIN AND AMINO ACIDS

Essential building blocks to support growth and development.

SUPPORTS GROWTH AND PERFORMANCE

Optimizes animal health and increases overall production results.

VERSATILE LIVESTOCK APPLICATIONS

Suitable for a wide range of livestock and feed formulations.

CONSISTENT QUALITY AND SUPPLY

Reliable raw materials and strict quality control for every batch.

ANIMAL NUTRITION PRODUCTS

Our animal nutrition portfolio includes high-performance ingredients developed to support efficient and balanced feed formulations, delivering essential nutrients that drive animal growth, health, and productivity.

PLANT PROTEIN MEALS

Derived from sources such as soy, corn, and other plant-based raw materials, protein meals are essential components in animal nutrition and food applications. They provide a concentrated source of protein and amino acids, supporting balanced formulations, performance, and cost efficiency across industries.

DDG

DDG is a high-value ingredient for animal nutrition, widely used in feed formulations for cattle, poultry, and swine. Produced from grains such as corn, it concentrates essential nutrients during processing, delivering a cost-efficient and nutritionally dense solution that supports performance and feed optimization.

ANIMAL PROTEIN MEALS

Produced from processed animal by-products, these protein meals are widely used in animal nutrition to deliver highly bioavailable protein and essential nutrients. Common sources include poultry, fish, and meat meals, offering a dense nutritional profile that supports growth, performance, and feed efficiency across livestock sectors.

SPECIALTY INGREDIENTS

A range of functional ingredients designed to enhance feed quality, palatability, and animal health. Our solutions include amino acids, enzymes, vitamins, and other additives that optimize nutrition and support overall productivity in livestock.

HIGH NUTRITIONAL DENSITY

IMPROVES FEED EFFICIENCY

RICH IN PROTEIN AND AMINO ACIDS

VERSATILE LIVESTOCK APPLICATIONS

SUPPORTS GROWTH AND PERFORMANCE

CONSISTENT QUALITY AND SUPPLY

SUGAR

Our sugar portfolio connects international buyers to reliable, high-quality solutions. From refined ICUMSA 45 to ICUMSA 150, our products meet the requirements of food manufacturing, beverages, pharmaceuticals, and industrial applications, ensuring consistency, scalability, and cost efficiency across markets.

HIGH PURITY STANDARDS

Up to 99.8% purity.

COST-EFFICIENT SOLUTIONS

Competitive pricing with consistent quality.

CONSISTENT COLOR CLASSIFICATION

Available in ICUMSA specifications.

GLOBAL MARKET ACCEPTANCE

Compliant with international standards.

VERSATILE INDUSTRIAL APPLICATIONS

Ideal for food, beverages, pharmaceuticals, and industry.

RELIABLE BRAZILIAN SOURCING

Sourced from trusted mills across Brazil.

SUGAR VARIETIES

We offer a range of high-quality sugar solutions to meet diverse industry needs. Our ICUMSA sugars are refined to the highest standards, ensuring purity, consistency, and reliability for global markets.

FINEST //

ICUMSA 45

ICUMSA 45 is a highly refined sugar with 99.8% purity and bright white color, meeting international standards for direct consumption and industrial use, including beverages and pharmaceuticals. Sourced mainly from Brazil, it features a low color index (45).

ICUMSA 150/180/300

ICUMSA 150 is a high-quality white crystal sugar suitable for food production and industrial applications. It offers a balanced combination of purity and cost efficiency, making it a widely used option in global markets.

ICUMSA 600-1200

ICUMSA 600-1200 is less refined sugar with a higher color index, suitable for a variety of industrial applications where functionality and cost efficiency are key factors.

SESAME & DERIVATIVES

Building on the versatility and nutritional value of sesame, CameX connects global buyers to a **diverse portfolio** of sesame-based products. From raw seeds to processed derivatives such as tahini and oils, these solutions meet the demands of food manufacturers, food service, and private label operations, enabling **scalable and value-added applications** across multiple markets.

NUTRIENT-RICH COMPOSITION

NATURAL ANTIOXIDANTS

HEALTHY FATS (OMEGA 3, 6, 9)

VERSATILE APPLICATIONS

MULTIPLE PRODUCT FORMATS

CHEMICAL-FREE PRODUCTS

SESAME PRODUCTS

Building on the versatility and nutritional value of sesame, CameX connects global buyers to a **diverse portfolio** of sesame-based products for multiple markets and applications.

MIX SESAME SEEDS

Blend of roasted hulled sesame seeds and lightly roasted whole black sesame, delivering a rich, nutty flavor and refined finish. Ideal for Asian cuisine, including sushi and fish crusts, as well as dish finishing. Rich in protein, calcium, magnesium, and natural antioxidants. Chemical-free product.

EXTRA VIRGIN SESAME OIL

Cold-pressed from whole white sesame seeds, Extra Virgin Sesame Oil is rich in natural antioxidants, including sesamin, sesamol, and vitamin E. A source of omega 3, 6, and 9, it is suitable for both finishing dishes and high-temperature cooking. Widely used in Eastern traditions, including Ayurvedic practices.

TRADITIONAL TAHINI

Creamy, chemical-free tahini made from mechanically ground hulled white sesame seeds. A staple of Middle Eastern cuisine, ideal as a versatile base for hummus, sauces, and nutritious breakfast bowls.

SESAME SEEDS

Ready to use and ideal for finishing both sweet and savory dishes. Widely used in Eastern cuisine, it adds aroma, crunch, and visual appeal—perfect for desserts or warm rice. Provides vegan protein, calcium, magnesium, and vitamin E.

COCOA TAHINI

Nutritious “superfood” spread made from sesame paste, cocoa nibs, and organic demerara sugar. Rich in antioxidants, it offers a healthier alternative to traditional sweets.

TOASTED SESAME OIL

Made from pressed toasted sesame seeds, roasted sesame oil has an intense, nutty flavor and aroma typical of Asian cuisine. Ideal for adding authentic taste to dishes like yakisoba.

GRAINS & STAPLES

SOURCING OVERVIEW

We structure global sourcing of essential grains and staple commodities, ensuring consistent supply for food production, distribution, and industrial applications.

RELIABLE GLOBAL SOURCING

Access to trusted producers worldwide.

SCALABLE SUPPLY CAPACITY

Flexible solutions aligned with demand.

CONSISTENT QUALITY STANDARDS

Rigorous control to ensure reliability.

EXPORT-READY PRODUCTS

Compliant with international markets.

CORE PRODUCT CATEGORIES

GRAINS & STAPLES

RICE

Various grades and origins for global food supply and distribution.

CORN & DERIVATIVES

Reliable sourcing for food production, animal feed, and industrial use.

SOYBEANS

High-quality soybeans for crushing, protein production, and export markets.

LENTILS & PULSES

Nutrient-rich legumes for food manufacturing and retail applications.

OATS & DERIVATIVES

Versatile ingredients for cereals, snacks, and processed food products.

BULK SUPPLY SOLUTIONS

Scalable sourcing with standardized quality and efficient logistics.

SPECIALTY & VALUE-ADDED PRODUCTS

SOURCING OVERVIEW

Customized sourcing of specialty and processed products, tailored to specific market requirements and value-added applications.

TAILORED SOLUTIONS

Customized sourcing to meet unique market needs.

PREMIUM QUALITY

Carefully selected products with consistent standards.

GLOBAL SOURCING

Access to reliable suppliers across key regions.

VALUE-ADDED FOCUS

Products with enhanced value for diverse applications.

CORE PRODUCT CATEGORIES

SPECIALTY & VALUE-ADDED

HONEY AND NATURAL SWEETENERS

High-quality honey and natural sweeteners for food, beverages, and industrial use.

COCONUT AND DERIVATIVES

Coconut products and derivatives for food, beverages, and personal care applications.

AÇAÍ (POWDER AND PULP)

Premium açaí in powder and pulp form for nutrition, beverages, and food industry.

WINE AND BEVERAGES

Carefully selected wines and beverages for diverse markets and consumer preferences.

POWDERED MILK AND DAIRY DERIVATIVES

High-quality dairy ingredients and derivatives for food manufacturing and distribution.

MUSTARD AND SPECIALTY INGREDIENTS

Mustard and specialty ingredients to enhance flavor and meet industry needs.

WHY CAMEXTRADE

BEYOND SOURCING

Not just products — we structure, align,
and deliver sourcing operations end-to-end.

One partner. Global access. Complete solutions.

01

CUSTOM SOURCING

We find and develop products
beyond standard catalogs.

02

END-TO-END EXECUTION

From specification to delivery,
we manage the full process.

03

STRUCTURED OPERATIONS

Aligned sourcing across quality,
logistics, and commercial terms.

04

GLOBAL SUPPLIER NETWORK

Access to reliable, vetted producers
across key markets.

05

SCALABILITY & FLEXIBILITY

Solutions adapted to volume,
application, and market needs.

CAMEXTRADE

Strategic sourcing partner
for global commodities.

One partner. Global access. Complete execution.

Built for scale. **Structured for performance.**
