

SUGAR

SOURCING OVERVIEW

From refined ICUMSA 45 to versatile ICUMSA 150, our sugar portfolio connects global buyers to reliable, high-quality solutions with consistency, scalability, and cost efficiency across markets.

SUGAR VARIETIES

ICUMSA 45

A highly refined sugar with 99.8% purity and bright white color, meeting international standards for direct consumption and industrial use. Sourced mainly from Brazil, it features a low color index (45).

ICUMSA 150/180/300

High-quality white crystal sugar suitable for food production and industrial applications. It offers a balanced combination of purity and cost efficiency, making it a widely used option in global market.

ICUMSA 600-1200

A highly refined sugar with 99.8% purity and bright white color, meeting international standards for direct consumption and industrial use, including beverages and pharmaceuticals. Sourced mainly from Brazil, it features a low color index (45).

KEY BENEFITS

- High Purity Standards (up to 99.8%)
- Consistent Color Classification (ICUMSA)
- Versatile Industrial Applications
- Cost-Efficient Solutions
- Global Market Acceptance
- Reliable Brazilian Sourcing

HOW WE WORK

MULTIPLE ORIGINS & SUPPLIER NETWORKS

Access to key producing regions through a curated network of reliable and verified suppliers.

FLEXIBLE SPECIFICATIONS BASED ON APPLICATION

Flexible sourcing aligned with application needs — food, beverages, pharmaceuticals, and industrial uses.

VOLUME SCALABILITY ALIGNED WITH DEMAND

From container loads to large-scale programs, we scale supply according to client demand and market conditions.

QUALITY CONTROL & TRACEABILITY STANDARDS

Consistent quality supported by standardized processes and full traceability across the supply chain.

CUSTOMIZED SOURCING BASED ON PROJECT NEEDS

Sourcing strategies tailored to each project, aligning specifications, goals, and market requirements.

 Detailed specifications and technical data sheets are available upon request.
